

MODEL 38-VIV205-01

User's Manual

TO THE OWNER

Before operating this projector, read this manual thoroughly and operate the projector properly.

This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time.

Improper operation may result in not only shortening the product-life, but also prevents malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Trouble-shooting" section at the end of this booklet. If the problem still persists, contact the sales dealer where you purchased the projector or the service center.

▲ SAFETY PRECAUTIONS

WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PROJECTOR TO RAIN OR MOISTURE.

- This projector produces intense light from the projection lens. Do not stare directly into the lens. Eye damage could result. Be especially careful that children do not stare directly into the beam.
- This projector should be set in the way indicated. If not, it may result in a fire hazard.
- Take appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum distance should be taken. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat build-up can reduce the service life of your projector, and can also be dangerous.

- Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes.
- The Remote Control Unit, supplied with this projector, emits a laser beam with the laser pointer function from Laser Light Window while pressing LASER button (for 1 minute / LASER POINTER INDICATOR lights red to indicate laser emission). Do not look into Laser Light Window or shine the laser beam on yourself or other people. Eye damage may result.
- If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS USER'S MANUAL FOR LATER USE.

SAFETY INSTRUCTIONS

All the safety and operating instructions should be read before the product is operated.

Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

Follow all warnings and instructions marked on the projector.

For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges.

Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc...

Do not use attachments not recommended by the manufacturer as they may cause hazards.

Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers.

An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided.

Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector. This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company.

Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it.

Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions:

- a. When the power cord or plug is damaged or frayed.
- b. If liquid has been spilled into the projector.
- c. If the projector has been exposed to rain or water.
- d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.
- e. If the projector has been dropped or the cabinet has been damaged.
- f. When the projector exhibits a distinct change in performance-this indicates a need for service.

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons.

Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition.

Federal Communication Commission Notice

Note : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment.

AC POWER CORD REQUIREMENT

The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it.

AC Power Cord for the United States and Canada :

AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA).

AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician.

THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE.

- Each name of corporations or products in the user's manual is a trademark or a registered trademark of its respective corporation.

FEATURES AND DESIGN

This Multimedia Projector is designed with most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

Compact Design

This projector is extremely compact in size and weight. It is designed to carry and work anywhere.

Compatibility

This projector accepts various video and computer input signals including;

• Computers

IBM-compatible or Macintosh computer up to 1280 x 1024 resolution.

6 Color Systems

NTSC, PAL, SECAM, NTSC 4.43, PAL-M or PAL-N color system can be connected.

Component Video

Component video signal, such as from a DVD player, high definition TV signals including 480i, 480p, 575i, 575p, 720p, 1035i or 1080i, can be connected.

• S-Video

S-Video signal, such as a S-VHS VCR output signal, can be connected.

High Resolution Image

This projector provides 1024×768 dots resolution for computer input and 800 horizontal TV lines. Resolution from a computer between XGA (1024×768) and SXGA (1280×1024) is compressed into 1024×768 dots. This projector can not display images over 1280×1024 dots. When resolution of your computer is more than $1280 \times$ 1024, reset a computer output for lower resolution.

Multi-Scan System

This projector has Multi-Scan System to conform to almost all computer output signals quickly. There is no need for troublesome manual adjustment of frequency and other settings.

One-Touch Auto PC Adjustment

Incoming computer video signals are recognized and the best adjustment is automatically set by Auto PC Adjustment. No complicated setup is necessary and projection is always precise.

Motor-driven Lens Shift

The projection lens can be moved up and down with the motor-driven lens shift function. This function makes it easy to project the image where you wish.

Zoom and focus can be also adjusted with motor-driven operation.

Digital Zoom (for Computer)

The Digital Zoom function adjusts the image size to approx. $1/4 \sim 49$ times of original image size, allowing you to focus on crucial information at a presentation.

Keystone Correction

Positioning of a projector may result in distorted image being displayed in a trapezoid shape. Keystone Correction solves this problem by digitally altering projection to produce undistorted images.

Power Management

Power Management function is provided to reduce power consumption while the projector is not in use.

This Power Management function operates to turn the Projection Lamp off when the projector detects signal interruption and any button is not pressed within 5 minutes. The Projection Lamp is automatically turned on again when the projector detects signal or any operation button is pressed.

This projector is shipped with this function ON.

Digital Visual Interface

This projector is equipped with DVI 24-pin terminal for connecting DVI output from a computer.

Laser Pointer Function

The Remote Control Unit supplied with this projector includes a Laser Pointer function. This function helps you to make a smart presentation on a projected screen.

Wireless Mouse

The Remote Control Unit supplied with this projector has a Wireless Mouse function for a connected computer. This function enables you to operate both the projector and computer only with the Remote Control Unit.

Multilanguage Menu Display

The Operation menu is displayed in: English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Chinese, Korean or Japanese.

ChristieNet (Optional)

ChristieNet is an optional product to control and set up a projector via the network cable. By accessing to the connected projector using the web browser on your computer. It can be controlled and set up the projector remotely. Contact the sales dealer where you purchased this projector for optional parts.

PREPARATION

NAME OF EACH PART OF PROJECTOR

SETTING-UP PROJECTOR

CONNECTING AC POWER CORD

This projector uses nominal input voltages of 100-120 V or 200-240 V AC. This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system.

Consult your authorized dealer or service station if you are not sure of the type of power supply used.

Connect the projector with peripheral equipment before turning the projector on. (Refer to pages $11 \sim 13$ for connection.)

For safety, unplug AC Power Cord when an appliance is not used.

When this projector is connected to the outlet with an AC Power Cord, the appliance is in Stand-by Mode and consumes a little electric power.

Connect the AC Power Cord (supplied) to the projector.

The AC outlet must be near this equipment and must be easily accessible.

CAUTION

The AC Power Cord must meet the requirement of the country where you use the projector. Confirm the AC plug type with the chart below. The proper AC Power Cord must be used. If the supplied AC Power Cord does not match the AC outlet, contact your sales dealer.

Projector side	AC Outl	et side
	For U.S.A. and Canada	For Continental Europe
To POWER CORD CONNECTOR on the projector.	Ground To AC Outlet. (120 V AC)	To AC Outlet. (200 - 240 V AC)

LENS INSTALLATION

Before setting up a projector, install Projection Lens on Projector.

- 1. Before installation, check where a projector is used and prepare a suitable lens. For specifications of a Projection Lens, contact sales dealer where you purchased a projector.
- 2. For installation, refer to installation manual in the optional lens.

NOTE;

When installing the lens, remove the cover cap in the projector.

POSITIONING PROJECTOR

This projector is designed to project on a flat projection surface.

ROOM LIGHT

Brightness in a room has a great influence on picture quality. It is recommended to limit ambient lighting in order to provide best image.

LENS SHIFT ADJUSTMENT

Projection lens can be moved up and down with motor-driven lens shift function. This function makes it easy to provide projected image where you want. U/D ratio can be adjusted $10 : 0 \sim 1 : 1$ (refer to figure below.). Refer to P 20 for operation.

ADJUSTABLE FEET

Picture tilt and projection angle can be adjusted by rotating ADJUSTABLE FEET. Projection angle can be adjusted to 10.5 degrees.

- *I* Lift front of a projector and pull FEET LOCK LATCHES on both sides of a projector.
- 2 Release FEET LOCK LATCHES to lock ADJUSTABLE FEET and rotate ADJUSTABLE FEET to fine tune position and tilt.
- **3** To shorten ADJUSTABLE FEET, lift front of a projector and pull and undo FEET LOCK LATCHES.

Position and keystone distortion of image can be adjusted using Menu Operation. (Refer to P 20 and 35.)

NOTE : THIS PROJECTOR SHOULD BE SET IN THE WAY INDICATED. PROJECTION LAMP MAY MALFUNCTION.

MOVING PROJECTOR

Use Carry Handle when moving a Projector. When moving a projector, replace lens cover and retract feet to prevent damage to lens and cabinet. When this projector is not in use for an extended period, put it into case (dust cover) supplied with this projector.

CAUTION IN CARRYING OR TRANSPORTING A PROJECTOR

- Do not drop or bump a projector, otherwise damages or malfunctioning may result.
- When carrying a projector, use a suitable carrying case.
- Do not transport a projector by using a courier or transport service in an unsuitable transport case. This
 may cause damage to a projector. To transport a projector through a courier or transport service, consult
 your dealer for the best method.

CONNECTING PROJECTOR

TERMINALS OF PROJECTOR

This projector has input and output terminals on its back for connecting computers and video equipment. Refer to figures on pages 11 to 13 and connect properly.

Cables used for connection (* = Cable or adapter is not supplied with this projector.)

- VGA Cable (HDB 15 pin)
- DVI-Digital Cable (for Single Link T.M.D.S.) *
- BNC Cable *
- Control Cable for PS/2 Port, Serial Port or ADB Port
- USB Cable *
- MAC Adapter (When connecting to Macintosh computer)
- Audio Cables (RCA x 2 and Mini Plug (stereo) x 1) *

CONNECTING TO VIDEO EQUIPMENT

Cables used for connection (* = Cable is not supplied with this projector.)

- Video Cable (RCA x 1 or RCA x 3) *
- BNC Cable *
- S-VIDEO Cable *
- Audio Cable (RCA x 2) *

When connecting the cable, the Power Cords of both the projector and the external equipment should be disconnected from the AC outlet.

BEFORE OPERATION

OPERATION OF REMOTE CONTROL

LASER POINTER FUNCTION

This Remote Control Unit emits a laser beam as laser pointer function from Laser Light Window. When LASER button is pressed, laser light goes on. And when LASER button is being pressed for more than 1 minute or LASER button is released, light goes off. LASER POINTER INDICATOR lights RED and Laser is emitted with RED light to indicate laser beam is being emitted.

Laser emitted is a class II laser; therefore, do not look into Laser Light Window or shine laser beam on yourself or other people. Three marks bellow are caution labels for laser beam.

CAUTION: Use of controls, adjustments or performance of procedures other than those specified herein may result hazardous radiation exposure.

TOP CONTROL PANEL AND INDICATORS

This projector has CONTROL BUTTONS (TOP CONTROL PANEL) and INDICATORS on its top.

OPERATING ON-SCREEN MENU

HOW TO OPERATE ON-SCREEN MENU

You can control and adjust this projector through the ON-SCREEN MENU. Refer to the following pages to operate each adjustment on the ON-SCREEN MENU.

1 DISPLAY MENU

Press MENU button to display ON-SCREEN MENU.

2 MOVING POINTER

Move the pointer (* see below) or adjust the value of the item by pressing POINT button(s) on Top control panel or on Remote Control Unit.

* Pointer is the icon on ON-SCREEN MENU to select the item. See the figures on the section "FLOW OF ON-SCREEN MENU OPERATION" below.

3 SELECT ITEM

Select the item or set selected function by pressing SELECT button.

FLOW OF ON-SCREEN MENU OPERATION

Display ON-SCREEN MENU

 Press MENU button to display ON-SCREEN MENU (MENU BAR). A red frame is POINTER.

Select Menu to be adjusted

2 Move POINTER (red frame) to MENU ICON that you want to select by pressing the POINT RIGHT / LEFT buttons.

Control or adjust item through ON-SCREEN MENU

- 3 Press the POINT DOWN button and move POINTER (red frame or red arrow) to ITEM that you want to adjust, and then press SELECT button to show ITEM DATA.
- Adjust ITEM DATA by pressing the POINT RIGHT / LEFT buttons.
 Refer to the following pages for details of respective

adjustments.

FOR VIDEO SOURCE

Press MENU BUTTON while connecting to VIDEO input source.

TURNING ON / OFF PROJECTOR

TURNING ON PROJECTOR

- 1 Complete peripheral connections (with Computer, VCR, etc.) before turning on projector. (Refer to "CONNECTING TO PROJECTOR" on pages 11~13 for connecting that equipment.)
- 2 Connect a projector's AC Power Cord into an AC outlet. LAMP Indicator lights RED, and READY Indicator lights GREEN.
 - NOTE : When "On start" function is ON, this projector is turned on automatically by connecting AC Power Cord to an AC outlet. (Refer to pages 35, 36.)
- **3** Press POWER ON-OFF button on Top control panel or on Remote Control Unit to ON. LAMP Indicator dims, and Cooling Fans start to operate. Preparation Display appears on a screen and count-down starts. Signal from PC or Video source appears after 30 seconds.

Current Input position and Lamp mode status are also displayed on screen for 5 seconds. (Refer to "LAMP MODE" on page 36.)

TURNING OFF PROJECTOR

- Press POWER ON-OFF button on Top control panel or on Remote Control Unit, and a message "Power off?" appears on a screen.
- Press POWER ON-OFF button again to turn off projector. LAMP Indicator lights bright and READY Indicator turns off. After projector is turned off, Cooling Fans operate (for 90 seconds). During this "Cooling Down" period, this appliance can not be turned on.
- 3 When projector has cooled down, READY Indicator lights GREEN again and you can turn projector on. After cooling down completely, disconnect AC Power Cord.

TO MAINTAIN LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF.

When "Power Management" function is ON, projector detects signal interruption and turns off Projection Lamp automatically. Refer to "Power Management" on page 35.

When WARNING TEMP. Indicator flashes red, projector is automatically turned off. Wait at least 5 minutes before turning on projector again.

- When WARNING TEMP. Indicator continues to flash, follow procedures below:
- 1. Press POWER ON-OFF button to turn a projector off and disconnect AC Power Cord from an AC outlet.
- 2. Check Air Filters for dust accumulation.
- 3. Clean Air Filters. (See "AIR FILTER CARE AND CLEANING" section on page 38.)
- 4. Turn a projector on again.

If WARNING TEMP. Indicator should still continue to flash, contact sales dealer where you purchased this projector or service center.

Preparation Display disappears after 30 seconds.

Message disappears after 4 seconds.

ADJUSTING SCREEN

ZOOM ADJUSTMENT

- 1 Press ZOOM button on Top control panel or ZOOM ▲/▼ button on Remote Control Unit. Message "Zoom" is displayed.
- Press ZOOM ▲ button or the POINT UP button to make image larger, and press ZOOM ▼ button or the POINT DOWN button to make image smaller.

Message disappears after 4 seconds.

FOCUS ADJUSTMENT

- I Press FOCUS button on Top control panel or FOCUS ▲/▼ button on Remote Control Unit. Message "Focus" is displayed.
- 2 Adjust focus of image by pressing FOCUS \blacktriangle/ ∇ button or the POINT UP/DOWN button(s) .

NOTE;

Focus adjustment may not function properly if the image is corrected by KEYSTONE adjustment.

LENS SHIFT ADJUSTMENT

- I Press LENS SHIFT button on Top control panel or LENS SHIFT ▲/▼ button on Remote Control Unit. Message "Lens shift" is displayed.
- Press the POINT UP button or LENS SHIFT ▲ button to move image up, press the POINT DOWN or LENS SHIFT ▼ button to move image down.

KEYSTONE ADJUSTMENT

If a projected picture has keystone distortion, correct the image with KEYSTONE adjustment.

- Press KEYSTONE button on Remote Control Unit or select Keystone on SETTING menu. (Refer to page 35.) Keystone dialog box appears.
- 2 Correct keystone distortion by pressing the POINT UP/DOWN/LEFT/RIGHT button(s). Press the POINT UP button to reduce the upper part of the image, and press the POINT DOWN button to reduce the lower part. Press the POINT LEFT button to reduce the left part, and press the POINT RIGHT button to reduce the right part.

Reduce the upper width with the POINT UP button.

Reduce the lower width with the POINT DOWN button.

Arrows are white in no correction.
Arrow(s) of direction being corrected turn(s) red.

Keystone

• Arrow(s) disappear(s) at the maximum correction.

Reduce the left part with the POINT LEFT button.

Ļ	

Reduce the right part with the POINT RIGHT button.

Focus

Message disappears after 4 seconds.

PICTURE FREEZE FUNCTION

Press FREEZE button on Remote Control Unit to freeze the picture on-screen. To cancel FREEZE function, press FREEZE button again or press any other button except the POINT, SELECT, RIGHT CLICK and LASER buttons.

NO SHOW FUNCTION

Press NO SHOW button on Remote Control Unit to black out the image. To restore to normal, press NO SHOW button again or press any other button except the POINT, SELECT, RIGHT CLICK and LASER buttons.

No show	

The message disappears after 4 seconds.

P-TIMER FUNCTION

Press P-TIMER button on Remote Control unit. The timer display "00 : 00" appears on the screen and the timer starts to count time (00 : 00 ~ 59 : 59).

To stop P-TIMER display, press P-TIMER button. And then, press P-TIMER button again to cancel P-TIMER function.

SOUND ADJUSTMENT

DIRECT OPERATION

Volume

Press VOLUME (+/-) button(s) on Top control panel or on Remote Control Unit to adjust volume. Volume dialog box appears on screen for a few seconds.

(+) button to increase volume, and (-) button to decrease.

Mute

Press the MUTE button on Remote Control Unit to disable sound. To restore sound to its previous level, press MUTE button again or press Volume (+/-) button(s).

MENU OPERATION

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to move the red frame pointer to the SOUND Menu icon.
- 2 Press the POINT DOWN button to move the red frame pointer to the item that you want to select, and then press SELECT button.

【川 Volume

To increase volume, press the POINT RIGHT button, and press the POINT LEFT button for decreasing.

K Mute

Press the POINT LEFT/RIGHT button(s) to disable sound. The dialog box display will change to "On" and the sound will be disabled. To restore sound to its previous level, press the POINT LEFT/RIGHT button(s) again.

Press the MUTE button to set Mute function On or Off.

Display disappears after 4 seconds.

SOUND MENU

Close SOUND Menu.

COMPUTER INPUT

SELECTING INPUT SOURCE

DIRECT OPERATION

Select the appropriate input signal by pressing the INPUT button on the Top control panel or on the Remote Control Unit. If projector cannot reproduce proper image, select correct input source through MENU OPERATION (see below).

MENU OPERATION

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to select Input and press SELECT button. Another dialog box INPUT SELECT Menu will appear.
- 2 Press the POINT DOWN button and a red-arrow icon will appear. Move arrow to INPUT source that you want to select, and then press SELECT button.

SELECTING COMPUTER SYSTEM

WHEN SELECTING INPUT 1 (COMPUTER INPUT TERMINALS)

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button to move the red frame pointer to INPUT Menu icon.
- 2 Press the POINT DOWN button to move the red arrow pointer to Input 1 and then press SELECT button. Source Select Menu will appear.
- **3** Move the pointer to either Digital or Analog and then press SELECT button.

Digital

When your computer is connected to COMPUTER INPUT (DIGITAL) terminal, select RGB (Digital).

When your computer is connected to COMPUTER INPUT (ANALOG) terminal, select RGB (Analog).

INPUT MENU

WHEN SELECTING INPUT 2 (5 BNC INPUT JACKS)

When connecting a computer output [5 BNC Type (Green, Blue, Red, Horiz. Sync and Vert. Sync.)] from a computer to G, B, R, H/HV and V jacks.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button to move the red frame pointer to INPUT Menu icon.
- 2 Press the POINT DOWN button to move the red arrow pointer to Input 2 and then press SELECT button. Source Select Menu will appear.
- **3** Press the POINT DOWN button and a red-arrow icon will appear. Move arrow to "RGB", and then press SELECT button.

INPUT MENU

AUTOMATIC MULTI-SCAN SYSTEM

This projector automatically detects different types of computer resolutions such as VGA, SVGA, XGA or SXGA (refer to "COMPATIBLE COMPUTER SPECIFICATIONS" on page 26). When selecting Computer, this projector automatically detects incoming signal and projects proper image without any special setting. (Some computers need setting manually.)

Note : Projector may display one of following messages.

When projector can not recognize connected signal as PC system provided in this projector, Auto PC Adjustment function operates to adjust projector and the message "Auto" is displayed on SYSTEM Menu icon. When image is not provided properly, manual adjustment is required. (Refer to P24 and 25.)

There is no signal input from computer. Make sure connection of computer and the projector is set correctly. (Refer to TROUBLESHOOTING on page 40.)

D-VGA, D-SVGA or D-XGA

When digital computer signal is received on DVI terminal, above message is displayed on PC SYSTEM Menu icon.

SELECT COMPUTER SYSTEM MANUALLY

This projector automatically selects PC system among those provided in this projector and PC system can be also selected manually.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT buttons to move the red frame pointer to PC SYSTEM Menu icon.
- Press the POINT DOWN button to move the red arrow pointer to the system that you want to set, and then press SELECT button.

PC SYSTEM MENU

PC SYSTEM MENU

AUTO PC ADJUSTMENT

PC ADJUSTMENT

Auto PC Adjustment function is provided to automatically adjust Fine sync, Total dots and Picture Position to conform to your computer. Auto PC Adjustment function can be operated as follows.

Auto PC Adj.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button to move the red frame pointer to PC ADJUST Menu icon.
- Press the POINT DOWN button to move the red frame pointer to AUTO PC Adj. icon and then press SELECT button twice. This Auto PC Adjustment can be also executed by pressing AUTO PC ADJ. button on the Top control panel or on the Remote Control Unit.

Store adjustment parameters.

Adjustment parameters from Auto PC Adjustment can be memorized in this projector. Once parameters are memorized, setting can be done just by selecting Mode in PC SYSTEM Menu (P23). Refer to step 3 of MANUAL PC ADJUSTMENT section (P25).

NOTE

- Fine sync, Total dots and Picture Position of some computers can not be fully adjusted with this Auto PC Adjustment function. When the image is not provided properly through this function, manual adjustments are required. (Refer to page 24, 25.)
- Auto PC Adjustment function can not be operated in Digital Signal input on DVI terminal and when "RGB", "720p (HDTV)", "1035i (HDTV)" or "1080i (HDTV)" is selected on PC SYSTEM Menu.

PC ADJUST MENU

MANUAL PC ADJUSTMENT

This projector can automatically detect display signals from most personal computers currently distributed. However, some computers employ special signal formats which are different from the standard ones and may not be detected by the Multi-Scan system of this projector. If this happens, the projector can not reproduce a proper image and the image may be recognized as a flickering picture, a non-synchronized picture, a non-centered picture or a skewed picture.

This projector has a Manual PC Adjustment to enable you to precisely adjust several parameters to match with those special signal formats. This projector has 5 independent memory areas to memorize those parameters manually adjusted. This enables you to recall the setting for a specific computer whenever you use it.

- Note : This PC ADJUST Menu can not be operated when a digital signal is input to the DVI terminal or "RGB" is selected on PC SYSTEM MENU (P23).
- I Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button to move the red frame pointer to PC ADJUST Menu icon.
- Press the POINT DOWN button to move the red frame pointer to the item that you want to adjust and then press SELECT button. Adjustment dialog box will appear. Press the POINT LEFT/RIGHT button to adjust value.

Fine sync

Adjusts an image as necessary to eliminate flicker from display. Press the POINT LEFT/RIGHT button to adjust value.(From 0 to 31.)

Total dots

The number of total dots in one horizontal period. Press the POINT LEFT/RIGHT button(s) and adjust number to match your PC image.

Horizontal

Adjusts horizontal picture position. Press the POINT LEFT/RIGHT button(s) to adjust position.

Vertical

Adjusts vertical picture position. Press the POINT LEFT/RIGHT button(s) to adjust position.

Press SELECT button to show information of computer selected.

Adjusts clamp position. When image has a dark bar(s), try this adjustment.

PC ADJUST MENU

Display area

Selects area displayed with this projector. Select the resolution in the Display area dialog box.

Adjustment of horizontal area displayed with this projector. Press the POINT LEFT/RIGHT button(s) to decrease/increase value and then press SELECT button.

Display area V

Adjustment of vertical area displayed with this projector. Press the POINT LEFT/RIGHT button(s) to decrease/increase value and then press SELECT button.

Press the POINT LEFT/RIGHT button(s) to switch Full screen function to "On" or "Off." Set "On" to resize image with 4×3 aspect ratio to fit screen.

NOTE : Fine sync., Total dots, Display area (H/V) and Full screen can not be adjusted when "1035i (HDTV)" or "1080i (HDTV)" is selected on PC SYSTEM Menu (P23).

3 🖹 Store

To store adjustment parameters, move the red frame pointer to Store icon and then press SELECT button. Move the red arrow pointer to any of Mode 1 to 5 that you want to store and then press SELECT button.

Mode free

To clear adjustment parameters previously set, move the red frame pointer to Mode free icon and then SELECT button. Move the red arrow pointer to Mode that you want to clear and then press SELECT button.

Reset all adjusted parameters on the adjustment dialog box to previous settings.

IMAGE ADJUST MENU

PICTURE SCREEN ADJUSTMENT

This projector has a picture screen adjustment function, which enables you to display the desirable image size.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button(s) to move the red frame pointer to SCREEN Menu icon.
- Press the POINT DOWN button and move the red frame pointer to the function that you want to select and then press SELECT button.

Provides image to fit screen size.

Provides image in its original size. When original image size is larger than screen size (1024 x 768), this projector enters "Digital zoom +" mode automatically.

Provides image to fit wide video aspect ratio (16 : 9) by expanding image width uniformly. This function can be used for providing a squeezed video signal at 16 : 9.

Digital zoom +

When Digital zoom + is selected, ON-SCREEN MENU disappears and the message "D. Zoom +" is displayed. Press SELECT button to expand image size. And press the POINT UP/DOWN/LEFT/RIGHT button(s) to pan the image. The panning function can work only when the image is larger than the screen size.

A projected image can be also expanded by pressing D.ZOOM ▲ button on Remote Control Unit.

Q Digital Zoom –

When Digital zoom – is selected, ON-SCREEN MENU disappears and the message "D. Zoom –" is displayed. Press SELECT button to compress image size.

A projected image can be also compressed by pressing D.ZOOM ▼ button on Remote Control Unit.

To cancel Digital Zoom +/– mode, press any button except D.ZOOM \blacktriangle/∇ , SELECT, POINT and AUTO PC ADJ. buttons.

SCREEN MENU

NOTE

- True and Digital zoom +/- can not be operated when "RGB", "1035i (HDTV)" or "1080i (HDTV)" is selected on PC SYSTEM Menu (P23).
- Wide can not be selected when "720p (HDTV)", "1035i (HDTV)" or "1080i (HDTV)" is selected on PC SYSTEM Menu (P23).
- This projector can not display any resolution higher than 1280 X 1024. If your computer's screen resolution is higher than 1280 X 1024, reset resolution to lower before connecting projector.
- Image data in other than XGA (1024 x 768) is modified to fit screen size in initial mode.
- Panning function may not operate properly if computer system prepared on PC ADJUST Menu is used.

SELECTING INPUT SOURCE

WHEN SELECTING INPUT 2 (5 BNC INPUT JACKS)

When connecting to those equipment, select a type of Video source in SOURCE SELECT Menu.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button to move the red frame pointer to INPUT Menu icon.
- Press the POINT DOWN button to move the red arrow pointer to Input 2 and then press SELECT button. Source Select Menu will appear.
- **3** Move the pointer to source that you want to select and then press SELECT button.

When video input signal is connected to VIDEO jack, select Video.

3 Store

To store adjustment data, move the red frame pointer to Store icon and press SELECT button. Image Level Menu will appear. Move the red frame pointer to Image Level 1 to 4 and then press SELECT button.

Other icons operate as follows.

Reset all adjustment to previous settings.

Closes IMAGE MENU.

PICTURE SCREEN ADJUSTMENT

This projector has a picture screen adjustment function, which enables you to display the desirable image size.

- Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button(s) to move the red frame pointer to SCREEN Menu icon.
- Press the POINT DOWN button and move the red frame pointer to function that you want to select and then press SELECT button.

Normal

Provides image at a normal video aspect ratio of 4 : 3.

Provides image at a wide screen ratio of 16 : 9.

SCREEN MENU

NOTE : SCREEN Menu can not be operated when "720p," "1035i," or "1080i" is selected on AV SYSTEM Menu (P31).

SETTING MENU

- I Press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button(s) to move a red-frame pointer to SETTING icon.
- 2 Press the POINT DOWN button to move a red-frame pointer to item that you want to set and then press SELECT button. Setting dialog box appears.

Language used in ON-SCREEN MENU is selectable from among English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Chinese, Korean and Japanese.

When image is distorted, select Keystone. The ON-SCREEN MENU will disappear and the Keystone dialog box will appear. Correct keystone distortion by pressing the POINT UP/DOWN/LEFT/RIGHT button(s). Refer to KEYSTONE ADJUSTMENT on page 20.

Blue back

When this function is "On," this projector will produce a blue image instead of video noise on screen when any input source is unplugged or turned off.

Display

This function decides whether to display On-Screen Displays.

- On ... shows all On-Screen Displays.
- Off sets On-Screen Displays disappeared except;
 - ON-SCREEN MĖNÚ
 - "Power off?" message

When this function is "On," the projector displays the "CHRISTIE" logo when starting up.

When this function is "On," picture is top / bottom and left / right reversed. This function is used to project image from a ceiling mounted projector.

When this function is "On," picture is left / right reversed. This function is used to project image to a rear projection screen.

Power management

This function turns Projection Lamp off when this projector detects signal interruption and is not used for a certain period in order to reduce power consumption and maintain Lamp-life. (This projector is shipped with this function ON.)

Power Management function operates to turn Projection Lamp off when input signal is interrupted and any button is not pressed over 5 minutes. This function operates as follows;

- 1. When any input signal is interrupted, "No signal" and counting down display appears (for 5 minutes).
- 2. After counting down for 5 minutes, projector lamp and READY indicator are turned off.
- 3. When READY indicator flashing, Projection Lamp can be turned on again (Power Management mode).

In this Power Management mode, Projection Lamp is automatically turned on when input signal connected or projector is operated with any button on Top control panel or on Remote Control Unit again.

Move a pointer to item and then press the POINT LEFT/RIGHT button(s).

Ceiling function

Rear function

On start

When this function is "On," projector is automatically turned on just by connecting AC Power cord to a wall outlet.

Note; Be sure to turn projector off properly (refer to section "TURNING OFF PROJECTOR" on P19). If projector is turned off in wrong steps, On Start function does not operate properly.

Lamp mode

When selecting the " 🗣 " (Eco) mode, the projector reduces the brightness and set itself into low power consumption mode.

Remote control

This projector has two different remote control codes; factory-set normal code (Code 1) and secondary code (Code 2). This switching function prevents remote control operation mixture (jam) when operating several projectors or video equipment together.

When operating projector in "Code 2," both projector and Remote Control Unit must be switched to "Code 2."

To change code of Projector;

Set Remote control in SETTING MENU to "Code 2."

To change code of Remote Control Unit;

Press both MENU and IMAGE buttons on Remote Control Unit together for over 10 seconds.

After changing code, make sure Remote Control operates properly. To return to normal code (Code 1), operate both projector and Remote Control in ways above again.

NOTE : When batteries of Remote Control Unit are replaced or ALL-OFF switch is turned to "ALL-OFF," remote transmit code automatically returns to normal code (Code 1).

This Projector is equipped with USB port for interactive operation between a projector and a computer. Follow the steps below for USB setup

Wireless Mouse mode

Select " subset of this projector. " when controlling a computer with Remote Control of this projector.

Projector mode

Select " **I** when controlling a projector with computer.

NOTE: Before you control a projector by computer, install USB driver (optionally sold parts) and set up computer following instruction in USB driver package. Contact your authorized dealer.

This function can not be adjusted when the ChristieNet (optional part) is not attached to the projector.

Refer to the owner's manual of the optional ChristieNet for operating instructions

Lamp counter reset

This function is used to reset Lamp Replace Counter. When replacing Projection Lamp, reset Lamp Replace Counter by using this function. Refer to page 39 for operation.

ŀ	Quit
P	

Closes SETTING MENU.

Move pointer to Lamp counter reset and then press SELECT button. Message "Lamp replace counter reset?" is displayed.

OPERATING WIRELESS MOUSE

The Wireless Remote Control Unit is not only able to operate this projector but also be used as a wireless mouse for most Personal Computers. POINT buttons and two CLICK buttons are used for wireless mouse operation. This Wireless Mouse function is available only when PC mouse pointer is displayed on a projected screen. When ON-SCREEN MENU or any message / dialog box is displayed on screen instead of PC mouse pointer, this Wireless Mouse function can not be used.

INSTALLATION

To use Wireless Remote Control Unit as Wireless Mouse for a Personal Computer, installation of mouse driver (not supplied) is required. Make sure that mouse driver is properly installed in your computer. And make sure that mouse port (or USB port) of a Personal Computer is activated.

- Connect mouse port (or USB port) of your computer to Control Port (or USB connector) of this projector with Control Cable (or USB cable). (Refer to page 11, 12 for connection.)
- 2 Turn a projector on first, and then turn on your computer. When computer is switched on first, Wireless Mouse may not work properly.

Note : When your computer has no mouse port, connect Serial Port of your computer to Control Port of a projector with Control Cable for Serial Port.

OPERATING WIRELESS MOUSE

When controlling a PC mouse pointer, operate Wireless Mouse with POINT button, SELECT button, and RIGHT CLICK button on Wireless Remote Control Unit.

POINT button

Used to move PC mouse pointer. Pointer is moved corresponding with direction you are pressing.

SELECT (LEFT CLICK) button

This button has same function as left button in a PC mouse.

RIGHT CLICK button

This button has same function as right button in a PC mouse. This button is not available for controlling this projector.

POINT button (Move pointer)

SELECT button (left button of mouse)

RIGHT CLICK button (right button of mouse)

MAINTENANCE

WARNING TEMP. INDICATOR

WARNING TEMP. Indicator flashes red when the internal temperature of the projector exceeds the normal temperature. This Indicator stops flashing when the temperature of the projector returns to normal. When WARNING TEMP. Indicator continues to flash, check items listed below.

- *I* Ventilation Slots of the projector may be blocked. In such an event, reposition the projector so that Ventilation Slots are not obstructed.
- 2 Air Filter may be clogged with dust particles. Clean Air Filter by following the section AIR FILTER CARE AND CLEANING below.
- 3 If WARNING TEMP. Indicator remains on after performing the above checks, the Cooling Fans or the Internal Circuits may be malfunctioning. Contact service personnel from an authorized dealer or a service station.

AIR FILTER CARE AND CLEANING

The Air Filter prevents dust from accumulating on the surface of the Projection Lens and the Projection Mirror. Should Air Filter become clogged with dust particles, it will reduce Cooling Fans' effectiveness and may result in internal heat build up and adversely affect the life of the projector. Clean the Air Filter following the steps below:

- ${f 1}$ Turn off the projector and disconnect the AC Power Cord from the AC outlet.
- 2 Turn the projector upside down and remove the Air Filters (2 used) by pulling the latches upward.
- **3** Clean the Air Filter with a brush or wash out the dust and particles.
- **4** Replace the Air Filter properly. Make sure the Air Filter is fully inserted.

Do not operate the projector with the Air Filter removed. Dust may accumulate on LCD Panel and Projection Mirror degrading picture quality.

Do not put small parts into Air Intake Vents. It may result in malfunction of the projector.

RECOMMENDATION

We recommend avoiding dusty/smoky environments when operating the projector. Usage in these environments may cause poor image quality.

When using under dusty or smoky conditions, dust may accumulate on the lens, liquid crystal panels, or optical elements inside the projector. This condition may degrade the quality of the projected image.

When the above symptoms are noticed, contact your authorized dealer or service station for proper cleaning.

CLEANING PROJECTION LENS

Follow these steps to clean Projection Lens:

- 1 Apply a non-abrasive camera lens cleaner to a soft, dry cleaning cloth. Avoid using an excessive amount of cleaner. Abrasive cleaners, solvents or other harsh chemicals might scratch a surface.
- Lightly wipe a cleaning cloth over Projection Lens.
- **3** When the projector is not in use, replace the Lens Cover.

LAMP REPLACEMENT

When the life of the Projection Lamp of this projector draws to an end, LAMP REPLACEMENT indicator lights yellow. When a projected image becomes dark or the color of an image becomes unnatural, replacement of Projection Lamp is required.

CAUTION

For continued safety, replace with a lamp assembly of same type.

Allow the projector to cool for at least 45 minutes before you open Lamp Cover. The inside of the projector can become very hot.

Follow these steps to replace lamp assembly.

- *I* Turn off a projector and disconnect AC plug. Allow a projector to cool for at least 45 minutes.
- 2 Loosen 2 screws with a screwdriver and open Lamp Cover.
- 3 Loosen 2 screws with a screwdriver and pull out Lamp Assembly by grasping Handle.
- **4** Replace Lamp Assembly with a new one and tighten 2 screws back. Make sure that Lamp Assembly is set properly. Replace Lamp Cover and tighten 2 screws.
- 5 Connect AC Power Cord to a projector and turn it on.
- 6 Reset Lamp Replace Counter (refer to section "Lamp Replace Counter" below).
- **NOTE :** Do not reset Lamp Replace Counter when Projection Lamp is not replaced.

ORDER REPLACEMENT LAMP

Replacement Lamp can be ordered through your dealer. When ordering Projection Lamp, give the following information to the dealer.

- Model No. of your projector : 38-VIV205-01
- Replacement Lamp Type No.: 03-000667-01P (Service Parts No. 610 297 3891)

LAMP REPLACE COUNTER

Be sure to reset Lamp Replace Counter when Lamp Assembly is replaced. When Lamp Replace Counter is reset, LAMP REPLACE Indicator stops lighting.

- 1 Turn projector on, press MENU button and ON-SCREEN MENU will appear. Press the POINT LEFT/RIGHT button(s) to move the red frame pointer to SETTING Menu icon (refer to page 37).
- 2 Press the POINT DOWN button to move the red frame pointer to "Lamp counter reset" and then press SELECT button. The message "Lamp replace counter reset?" will display. Move pointer to [Yes] and then press SELECT button.
- Another confirmation dialog box will appear and select [Yes] to reset Lamp Replace Counter.

Do not reset Lamp Replace Counter unless Projection Lamp is replaced.

CAUTION

Do not drop a lamp assembly or touch a glass bulb! The glass can shatter and may cause injury.

TROUBLESHOOTING

Before calling your dealer or service center for assistance, check matters below once again.

- 1. Make sure you have connected the projector to your computer or video equipment as described in section "CONNECTING PROJECTOR" on pages 11 ~ 13.
- 2. Check cable connection. Verify that all computer, video and power cord are properly connected.
- 3. Verify that all power is switched on.
- 4. If the projector still does not produce an image, re-start your computer.
- 5. If an image still does not appear, unplug the projector from your computer and check your computer monitor's display. The problem may be with your graphics controller rather than with the projector. (When you reconnect the projector, be sure to turn the computer and monitor off before you power up the projector. Power equipment back on in order of : Projector and computer.)
- 6. If problem still exists, check following chart.

Problem:	Try these Solutions
No power.	 Plug the projector into your AC outlet. Make sure READY Indicator lights. Wait 90 seconds after the projector is turned OFF before turning the projector back on. NOTE : After pressing Power ON-OFF button to OFF, make sure the projector works as follows: LAMP indicator lights bright and READY indicator turns off. After 90 seconds, READY indicator lights green again and the projector may be turned on by pressing Power ON-OFF button. Check WARNING TEMP. indicator. If indicator flashes red, the projector can not be turned on.
	(See "TURNING ON/OFF PROJECTOR" section on page 19.) ● Check Projection Lamp. (Refer to page 39.)
Image is out of focus.	 Adjust focus of the projector. Make sure the projection screen is at least 4.6' (1.4m) from the projector. Check Projection Lens to see if it needs cleaning.
	NOTE : Moving the projector from a cool temperature location to a warm temperature location may result in moisture condensation on Projection Lens. In such an event, leave the projector OFF and wait until condensation disappears.
Picture is Left/Right reversed.	 Check Ceiling / Rear feature. (See "SETTING" section on page 35.)
Picture is Top/Bottom reversed.	Check Ceiling feature. (See "SETTING" section on page 35.)
Some displays are not seen during Operation.	Check Display feature.(See "SETTING" section on page 35.)
No image.	 Check connection between your computer or video equipment and the projector. When turning the projector on, it takes about 30 seconds to display an image. Check system that you select is corresponding with your computer or video equipment. Make sure temperature is not out of Operating Temperature (5°C ~ 35°C).
No sound.	 Check audio cable connection from audio input source. Adjust audio source. Press VOLUME (+) button. Press MUTE button.

Problem:	Try these Solutions
Remote Control Unit does not work.	 Check batteries. Check ALL-OFF switch on Remote Control Unit is set to "ON.". Make sure nothing is between Infrared Remote Receiver and Remote Control Unit. Make sure you are not too far from the projector when using Remote Control Unit. Maximum operating range is 16.4' (5m). Make sure the code of the Remote Control is set to conform to the projector. (See the "SETTINGS" section on page 36.)
Wireless Mouse function does not work.	 Check the cable connection between the projector and your computer. Check mouse setting on your computer. Turn the projector on before turning on the computer.

SERVICE

WARNING: High voltages are used to operate this projector. Do not attempt to open cabinet.

You can often correct operating problems yourself. If the projector fails to work properly, see the "TROU-BLESHOOTING" section on pages 40 and 41.

If after following all operating instructions, you find that service is necessary, contact the Christie Service Station or store where you purchased the unit.

Give the model number and explain the difficulty. We will advise you how to obtain service.

This symbol on the nameplate means the product is Listed by Underwriters Laboratories Inc. It is designed and manufactured to meet rigid U.L. safety standards against risk of fire, casualty and electrical hazards.

The CE Mark is a Directive conformity mark of the European Community (EC).

TECHNICAL SPECIFICATIONS

Projector Type	Multi-media Projector			
Dimensions (W x H x D)	12.6" x 6.6" x 16.8" (319 mm x 168 mm x 429.5 mm)			
Net Weight	15.7 lbs (7.1 kg)			
LCD Panel System	1.3" TFT Active Matrix type, 3 panels			
Panel Resolution	1024 x 768 dots			
Number of Pixels	2,359,296 (1024 x 768 x 3 panels)			
Color System	PAL, SECAM, NTSC, NTSC4.43, PAL-M and PAL-N			
High Definition TV Signal	480i, 480p, 575i, 575p, 720p, 1035i and 1080i			
Scanning Frequency	H-sync. 15 ~ 100 KHz, V-sync. 50 ~ 100 Hz			
Motorized Lens Shift	Up and Down			
Horizontal Resolution	800 TV lines (HDTV)			
Projection Lamp	275 watt type			
Input 1 Jacks	DVI Terminal (Digital), HDB 15-pin Terminal (Analog) and Stereo Mini Type Jack (Audio)			
Input 2 Jacks	BNC Type x 5 (G or VIDEO/Y, B or Cb/Pb, R or Cr/Pr, H and V), Stereo Mini Type Jack (Audio)			
Input 3 Jacks	RCA Type x 3 (VIDEO/Y, Cb/Pb and Cr/Pr), RCA Type x 2 (Audio R and L) and DIN 4-pin (S-Video)			
Other Jacks	DIN 8-pin (Control port), USB port (Series B receptacle), Wired Remote Jack and ChristieNet Connector			
Built-in Speakers	INT. SP. Stereo (R and L), 2 watt RMS (T.H.D. 10%)			
Feet Adjustment	0° to 10.5°			
Voltage and Power Consumption	AC 100 ~ 120 V (4.8 A Max. Ampere), 50 / 60 Hz (The U.S.A and Canada) AC 200 ~ 240 V (2.4 A Max. Ampere), 50 / 60 Hz (Continental Europe)			
Operating Temperature	41 F ~ 95 F (5 °C ~ 35 °C)			
Storage Temperature	14 F ~ 140 F (-10 °C ~ 60 °C)

CONFIGURATIONS OF TERMINALS

COMPUTER INPUT-1 TERMINAL (ANALOG)

Terminal : HDB15-PIN

Connect the display output terminal of the computer to this terminal with the VGA Cable (supplied). When connecting the Macintosh computer, the MAC Adapter (supplied) is required.

Pin Configuration

1	Red Input	9	+5V Power
2	Green Input	10	Ground (Vert.sync.)
3	Blue Input	11	Sense 0
4	Sense 2	12	DDC Data
5	Ground (Horiz.sync.)	13	Horiz. sync.
6	Ground (Red)	14	Vert. sync.
7	Ground (Green)	15	DDC Clock
8	Ground (Blue)		

COMPUTER INPUT-1 TERMINAL (DIGITAL)

Terminal : DVI 24-pin

Connect the display output terminal of the computer to this terminal with a DVI cable (for Single Link T.M.D.S. / not supplied).

Pin Configuration

1	T.M.D.S. Data2-	9	T.M.D.S. Data1-	17	T.M.D.S. Data0-
2	T.M.D.S. Data2+	10	T.M.D.S. Data1+	18	T.M.D.S. Data0+
3	T.M.D.S. Data2 Shield	11	T.M.D.S. Data1 Shield	19	T.M.D.S. Data0 Shield
4	No Connect	12	No Connect	20	No Connect
5	No Connect	13	No Connect	21	No Connect
6	DDC Clock	14	+5V Power	22	T.M.D.S. Clock Shield
7	DDC Data	15	Ground (for +5V)	23	T.M.D.S. Clock+
8	No Connect	16	Hot Plug Detect	24	T.M.D.S. Clock-

CONTROL PORT CONNECTOR

Terminal : Mini DIN 8-PIN

Connect control port (PS/2, Serial or ADB port) on your computer to this connector with the Control Cable (supplied).

Pin Configuration

PS/2	Serial	ADB	
	RXD		
CLK		ADB	
DATA			
GND	GND	GND	
	RTS / CTS		
	TXD		
GND	GND		
	GND	GND	
	CLK DATA GND 	R X D CLK DATA GND GND RTS / CTS T X D GND GND	

USB CONNECTOR (Series B)

Connect USB port terminal on your computer or peripheral equipment to this connector with USB Cable (not supplied).

Pin Configuration

Vcc
