User's Manual – Operating Guide

Thank you for purchasing this projector.

⚠**WARNING** ►Before using this product, please read this manual and related manuals to ensure the proper use of this product. After reading, store them in a safe place for future reference.

About this manual

Various symbols are used in this manual. The meanings of these symbols are described below.

⚠**WARNING**   This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.

⚠**CAUTION**   This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.

📖 Please refer to the pages written following this symbol.

NOTE • The information in this manual is subject to change without notice.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Content

Projector features

This projector is used to project various computer signals as well as NTSC/PAL/SECAM, Component (SD, HD) video signals onto a screen. It requires a small space for installation and produces a large image at a short throw distance.

○ High Brightness
Newly developed 200W UHB (Ultra High Brightness) lamp gives you a brighter image on the screen. The image is bright enough for use in fully lighted rooms.

○ Low Noise
WHISPER mode is available for reducing acoustic noise and quieter operation. It is perfect for use in dimly lighted rooms where low noise is more important than brightness.

○ Rich Connectivity
This projector has a variety of I/O ports. It can be easily connected to many signal sources like PC, DVD and so on. The rich connectivity provides you more options for an impressive presentation.

○ Compact Body
Even with its many features, this projector has a small form factor.

Preparations

About contents of package

Your projector should come with items indicated on literature sheet.
Contact your dealer immediately if anything is missing.

> **NOTE** • Keep the original packing materials for future reshipment. When moving the projector, be sure to use the original packing materials. Use special caution for the lens part.

Fastening the lens cover

To avoid losing the lens cover, please fasten the lens cap to the projector using the strap.

Strap ring
Strap
Bottom side
Strap hole
1. Fix the strap to the strap ring of the lens cover.

2. Put the strap into the groove on the rivet.

3. Push the rivet into the strap hole.

NOTE (*) About Restart switch: This projector is controlled by an internal
microprocessor. Under certain exceptional circumstances, the projector may not
operate correctly and the microprocessor will need to be reset. In such a case,
please push the Restart switch by using a cocktail stick or similar, and before
turning on again, make the projector cool down at least 10 minutes without
operating. Only push the Restart switch in these exceptional instances.

Setting up

⚠**WARNING** ►Place the projector in a stable position horizontally. A fall or a turnover could cause an injury and/or damage to the projector. Then using damaged projector could result in a fire and/or an electric shock.
• Do not place the projector on an unstable, slant or vibrant surface such as a wobbly or inclined stand.
• Do not place the projector in the side/front/rear-up position, except cleaning the air filter.
►Place the projector in a cool place, and pay attention enough to ventilation. The high temperature of the projector could cause a fire, a burn and/or malfunction to the projector.
• Do not stop up, block and cover the projector's vents.
• Keep a space of 30 cm or more between the sides and other objects such as walls.
• Do not place the projector on a metallic thing or anything weak in heat.
• Do not place the projector on a carpet, cushion or bedding.
• Do not place the projector in direct sunlight or near a hot object such as a heater.
• Put nothing about lens and vents of the projector. Put nothing on the projector.
• Put nothing that is sucked or sticks to the bottom of projector. This projector has some intake vents also on the bottom.
►Do not place the projector on the place that gets wet. Damping the projector or inserting liquid in the projector could cause a fire, an electric shock and/or malfunction to the projector.
• Do not place the projector in a bathroom or the outdoors.
• Put nothing containing the liquid near the projector.
⚠**CAUTION** ►Avoid a smoky, humid or dusty place. Placing the projector in such place could cause a fire, an electric shock and/or malfunction to the projector.
• Do not place the projector near a humidifier, a smoking space or a kitchen.
►Adjust the position of the projector to prevent any strong light, like direct sunlight or inverter fluorescent lamp light, from hitting the projector's remote sensor.

7

Arrangement

Refer to the illustrations and tables below to determine the screen size and projection distance.

The values shown in the table are calculated for a full size screen: 1024×768
(a) The screen size (diagonal)
(b) Distance from the projector to the screen (±10%)
(c) The height of the screen (±10%)
| (a) Screen size [inch (m)]	4 : 3 screen								16 : 9 screen							
	(b) Projection distance [m (inch)]				(c) Screen height [cm (inch)]				(b) Projection distance [m (inch)]				(c) Screen height [cm (inch)]			
	min.		max.		down		up		min.		max.		down		up	
30 (0.8)	0.9	(34)	1.1	(41)	5	(2)	41	(16)	1.0	(38)	1.1	(45)	-1	(0)	39	(15)
40 (1.0)	1.2	(46)	1.4	(56)	6	(2)	55	(22)	1.3	(50)	1.5	(61)	-2	(-1)	51	(20)
50 (1.3)	1.5	(58)	1.8	(70)	8	(3)	69	(27)	1.6	(63)	1.9	(76)	-2	(-1)	64	(25)
60 (1.5)	1.8	(70)	2.1	(84)	9	(4)	82	(32)	1.9	(76)	2.3	(91)	-2	(-1)	77	(30)

Adjusting the projector's elevator

⚠**CAUTION** ►If you press the elevator button without holding the projector, the projector might crash down, overturn, smash your fingers and possibly result in malfunction. To prevent damaging the projector and injuring yourself, always hold the projector whenever using the elevator buttons to adjust the elevator feet.
►Do not incline the projector rightward or leftward. Also do not incline it backward or forward exceeding 30 degrees. Exceeding these range could cause malfunction, and could shorten the lifetime of the consumables.
►Except for inclining by the elevator feet adjustment, place the projector horizontally.

You can use the elevator feet to make adjustments if the surface on which you need to set the projector is uneven or if you otherwise need to adjust the angle of projection. The adjustment range of the elevator feet is 0 to 9 degrees.

Elevator feet   Elevator button
1. After making sure that the projector is cool adequately, press and hold in the elevator buttons while holding the projector.
   The elevator buttons and the elevator feet are on the both sides.

2. Raise or lower the projector to the desired height and release the elevator buttons.
   When you release the elevator buttons, the elevator feet will lock into position.

3. If necessary, you can also finely adjust the height of the projector by twisting the elevator feet by hand.

Using the Security Bar

⚠**WARNING** ►Do not use the security bar to prevent the projector from falling. Dropping or knocking over the projector may cause damage or injury.

⚠**CAUTION** ►The security bar is not a comprehensive theft prevention measure. It is intended to be used as an extra theft prevention measure.

A commercial anti-theft chain or wire can be attached to the security bar on the projector.

1. **How to attach**
An anti-theft chain or wire can be attached as shown in the illustration. (Anti-theft chains or wires of up to 10mm in diameter can be used)

Security Bar

Anti-theft chain or wire [sold separately]
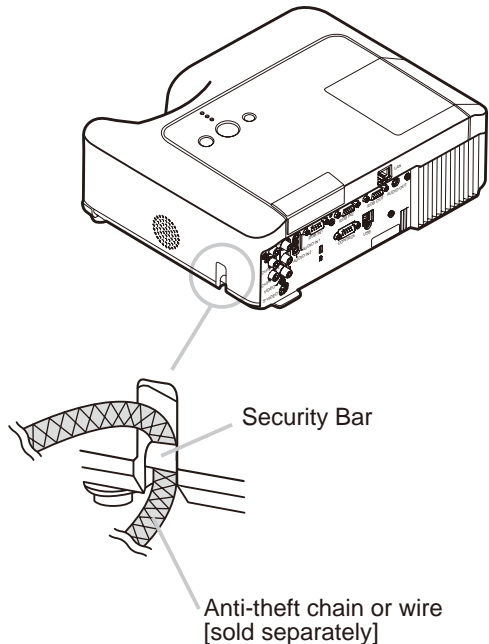

Connecting your devices

⚠**CAUTION** ►Turn off all devices prior to connecting them to the projector. Attempting to connect a live device to the projector may generate extremely loud noises or other abnormalities that may result in malfunction and/or damage to the device and/or projector.
►Use the accessory cable or a designated-type cable for the connection. Some cables have to be used with core set. A too long cable may cause a certain picture degradation. Please consult with your dealer for details. For cables that have a core only at one end, connect the core to the projector.
►Make sure that you connect devices to the correct port. Incorrect connection may result in malfunction and/or damage to the device and/or projector.

NOTE • Whenever attempting to connect a laptop computer to the projector, be sure to activate the laptop's RGB external image output (set the laptop to CRT display or to simultaneous LCD and CRT display). For details on how this is done, please refer to the instruction manual of the corresponding laptop computer.
• Secure the screws on the connectors and tighten.
• Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
• For some RGB signal modes, the optional Mac adapter is necessary.
• When the image resolution is changed on a computer, depending on an input, automatic adjustment function may take some time and may not be completed. In this case, you may not be able to see a check box to select "Yes/No" for the new resolution on Windows. Then the resolution will go back to the original. It might be recommended to use other CRT or LCD monitors to change the resolution.

About Plug-and-Play capability
Plug-and-Play is a system composed of the computer, its operating system and peripheral equipment (i.e. display devices). This projector is compatible with VESA DDC 2B. Plug-and-Play can be achieved by connecting this projector to a computer is VESA DDC (display data channel) compatible.
• Please take advantage of this function by connecting the accessory RGB cable to the RGB IN1 port (DDC 2B compatible). Plug-and-Play may not work properly if any other type of connection is attempted.
• Please use the standard drivers in your computer as this projector is a Plug-and-Play monitor.

Examples of connection with a computer

* In the default setting, the AUDIO IN1 port is the audio port for the RGB IN1, and the AUDIO IN2 port is the audio port for the RGB IN2 ports. To change the settings, refer to the AUDIO item in the SETUP menu. (📖*36*)
Connecting to a monitor (output) and a speaker with amplitier (output)
Connecting to a Network
⚠**CAUTION** ►For safety, do not connect LAN port to any network that might have the excessive voltage.

Examples of connection with a VCR/DVD player

* In the default setting, the AUDIO IN3 L/R port is the audio port for the VIDEO, S-VIDEO and COMPONENT VIDEO ports. To change the settings, refer to the AUDIO item in the SETUP menu. (□*36*)
Note: Only the 8776-RJ has the LAN connector port.

13

Connecting power supply

⚠**WARNING** ►Please use extra caution when connecting the power cord, as incorrect or faulty connections may result in fire and/or electrical shock.
• Only use the power cord that came with the projector. If it is damaged, contact your dealer to newly get correct one.
• Only plug the power cord into an outlet rated for use with the power cord's specified voltage range.
• Never modify the power cord. Never attempt to defeat the ground connection of the three-pronged plug.

AC inlet

Connector
of the power cord
1. Connect the connector of the power cord to the AC inlet of the projector.

2. Firmly plug the power cord's plug into the outlet.

Remote control

Putting batteries

⚠**WARNING** ►Always handle the batteries with care and use them only as directed. Battery may explode if mistreated. Do not recharge, disassemble or dispose of in fire.
And also improper use may result in cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
• Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
• Make sure the plus and minus terminals are correctly aligned when loading a battery.
• Keep a battery away from children and pets. If swallowed consult a physician immediately for emergency treatment.
• Do not short circuit or solder a battery.
• Do not allow a battery in a fire or water. Keep batteries in a dark, cool and dry place.
• If you observe a leakage of a battery, wipe out the flower and then replace a battery. If the liquid adheres to your body or clothes, rinse well with water immediately.
• Obey the local laws on disposing the battery.
1. Remove the battery cover.
   Slide back and remove the battery cover in the direction of the arrow.

2. Insert the batteries.
   Align and insert the two AA batteries according to their plus and minus terminals as indicated in the remote control.

3. Close the battery cover.
   Replace the battery cover in the direction of the arrow and snap it back into place.

Using the remote control

⚠️**CAUTION** ►Be careful in handling the remote control.
• Do not drop or expose the remote control to physical impact.
• Do not get the remote control wet or place it on wet objects. It may result in malfunction.
• Remove the batteries from the remote control and store them in a safe place if you won't be using the remote control for an extended period.
• Replace the batteries whenever the remote control starts malfunctioning.
• When strong lights (such as direct sunlight) or light from an extremely close range (such as from an inverter fluorescent lamp), hit the projector's remote sensor, the remote control may cause to function. Adjust the direction of the projector to keep the light from directly hitting the projector's remote sensor.

The signal settings for the remote control transmitter and the projector's remote sensor can be changed. If the remote control does not function properly try changing the signal setting.

Changing the signal setting for the remote control transmitter
(1)Setting 1 (FREQ. : NORMAL)
Simultaneously press and hold the MUTE and RESET buttons for about 3 seconds.
(2)Setting 2 (FREQ. : HIGH)
Simultaneously press and hold the MAGNIFY OFF and ESC buttons for about 3 seconds.
• Setting 1 is the factory default setting.
• When the batteries are removed from the remote control, user-specified settings are saved for about half a day. If the batteries are removed from the remote control for longer than half a day, the remote will reset to Setting 1.

Changing the signal setting for the projector's remote sensor
Switch between Setting 1 and 2 using the SERVICE/REMOTE FREQ. item found in OPTION MENU. (📖*43*)
If the remote control does not seem to function properly, try changing the settings for the remote control and the projector's remote sensor.
The remote control will not function properly if the remote control transmitter settings and the projector's remote sensor settings are not the same.

The remote control works with the projector's remote sensor.

approx. 3 meters

30º 30º
• The range of the remote sensor is 3 meters with a 60 degree range (30 degrees to the left and right of the remote sensor).
• Also a remote signal reflected in the screen etc. may be available. If it is difficult to send a remote signal to the sensor directly, please try to use the reflected signal.
• Since the remote control uses infrared light to send signals to the projector (Class1 LED), be sure to use the remote control in an area free from obstacles that could block the remote control's output signal to the projector.

⚠**WARNING** ►When the power is on, a strong light is emitted. Do not look into the lens of projector. Also do not peep at the inside of projector through a hole.

NOTE • Turn the power on/off in right order. Please power on the projector prior to the connected devices. Power off the projector later than the connected devices.

Turning on the power

1. Make sure that the power cord is firmly and correctly connected to the projector and the outlet.

2. Remove the lens cover, and set the power switch to the ON position.
The power indicator will light up in steady orange. Then wait several seconds because the buttons may not function for these several seconds.

(1) When AUTO ON in the OPTION menu is set to TURN ON:(📖40)
The lamp will only be automatically turned on when the Power switch is turned on after the power was turned off by Power switch last time. Afterwards the POWER indicator will begin blinking in green. When the power is completely on, the indicator will stop blinking and light in green.

(2) When AUTO ON in the OPTION menu is set to TURN OFF please see step 3.

3. Press the STANDBY/ON button on the projector or the remote control.

To display the picture, select an input signal according to the section "Selecting an input signal" (📖18).

POWER
(Steady green)

Turning off the power

Please pay special attention to below two points when you do:

(1) Please do not turn the projector on again for at least 10 minute in this case. Neglect could shorten the lifetime of the lamp.
(2) During use or immediately after use, do not touch around the lamp and vents of the projector (📖4 ★) It could cause a burn.

1. Press the STANDBY/ON button on the projector or the remote control.
The message "Power off?" will appear on the screen for about 5 seconds.

2. Press the STANDBY/ON button on the projector or the remote control again while the message appears.
The projector lamp will go off, and the POWER indicator will begin blinking in orange.

Then the POWER indicator will stop blinking and light in steady orange when the lamp cooling is complete.

3. Make sure that the power indicator lights in steady orange, and set the power switch to the OFF position. The POWER indicator will go off. Attach the lens cover.

17
Adjusting the volume

1. Press the VOLUME button on the remote control.
   A dialog will appear on the screen to aid you in adjusting the volume.

2. Use the cursor buttons ▲/▼ to adjust the volume.

   To close the dialog and complete the operation, press the VOLUME button again. Even if you don't do anything, the dialog will automatically disappear after a few seconds.
Temporarily muting the sound

1. Press the MUTE button on the remote control.
   A dialog will appear on the screen indicating that you have muted the sound.

   To restore the sound, press the MUTE or VOLUME button. Even if you don't do anything, the dialog will automatically disappear after a few seconds.
Selecting an input signal

1. Press the INPUT button on the projector.
   Each time you press the button, the projector switches its input port as below.

   RGB IN1 → RGB IN2
   VIDEO ← S-VIDEO ← COMPONENT VIDEO ←
1. Press the RGB button on the remote control to select an input port for the RGB signal.
   Each time you press the button, the projector switches its RGB input port as below.

   RGB IN1 ←→ RGB IN2
● If the RGB button is pushed (when switching from VIDEO to RGB signals) when TURN ON is selected for the AUTO SEARCH item in the OPTION menu the projector will check the RGB IN1 port first. If no input is detected at the port, the projector will check the RGB IN2 port.

Selecting an input signal (continued)

1. Press the VIDEO button on the remote control to select an input for video signal.
Each time you press the button, the projector switches its video input port as below.

   COMPONENT VIDEO → S-VIDEO → VIDEO
   ⤒ ⎣_____⎦

● If the VIDEO button is pushed (when switching from RGB to VIDEO signals) when TURN ON is selected for the AUTO SEARCH item in the OPTION menu the projector will check the COMPONENT VIDEO port first. If no input is detected at the port, projector will begin to check other ports in above order.
Searching an input signal

1. Press the SEARCH button on the remote control.
   The projector will start to check its input ports in order to find any input signals.
   When an input is found, the projector will stop searching and display the image. If no signal is found, the projector will return to the state selected before the operation.

   RGB IN 1 → RGB IN 2 → COMPONENT VIDEO → S-VIDEO → VIDEO
   ⤒ ⎣_____⎦
Selecting an aspect ratio

1. Press the ASPECT button on the remote control.
   Each time you press the button, the projector switches the mode for aspect ratio in turn.

   ○ **For an RGB signal**
   NORMAL → 4:3 → 16:9 → SMALL
   ⤒ ⎣_____⎦

   ○ **For a video signal, s-video signal or component video signal**
   4:3 → 16:9 → 14:9 → SMALL
   ⤒ ⎣_____⎦

   ○ **For a no signal**
   4:3 (fixed)

● The NORMAL mode keeps the original aspect ratio of the signal.

● Performing the automatic adjustment initializes the aspect ratio setting.
Adjusting the zoom and focus

1. Use the zoom ring to adjust the screen size.

2. Use the focus ring to focus the picture.

Focus ring   Zoom ring

19
Using the automatic adjustment feature

1. Press the AUTO button on the remote control.
❍ **For an RGB signal**
The vertical position, the horizontal position, the horizontal phase and the horizontal size will be automatically adjusted.
And the aspect ratio will be automatically set to default. Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting.

❍ **For a video signal or s-video signal**
The video format best suited for the respective input signal will be selected automatically.
This function is available only when the AUTO mode is selected to the VIDEO FORMAT item in the INPUT menu (📖*33*). For a component video signal, the signal type is identified automatically independently of this function.

❍ **For a video signal, s-video signal or component video signal**
The vertical position, horizontal position and aspect ratio will be automatically set to default.

❍ **For a component video signal**
The horizontal phase will be automatically set to default.

● The automatic adjustment operation requires about 10 seconds. Also please note that it may not function correctly with some input.

Adjusting the position

1. Press the POSITION button on the remote control.
The "POSITION" indication will appear on the screen.

2. Use the cursor buttons ▲/▼/◄/► to adjust the picture position.
When you want to reset the operation, press the RESET button on the remote control during the operation.

To complete this operation, press the POSITION button again. Even if you don't do anything, the dialog will automatically disappear after a few seconds.

● When this function is performed at a video signal, a certain extra such as a line may appear outside a picture.

Correcting the keystone distortions

1. Press the KEYSTONE button on the remote control. A dialog will appear on the screen to aid you in correcting the distortion.

2. Use the cursor buttons ▲/▼ to select AUTO or MANUAL operation, and press the button ► to perform the following.
   1) AUTO executes automatic vertical keystone correction.

   2) MANUAL displays a dialog for vertical keystone correction. Use the buttons ▲/▼ for adjustment.

   To close the dialog and complete this operation, press the KEYSTONE button again. Even if you don't do anything, the dialog will automatically disappear after a few seconds.
● The adjustable range for correction will vary among inputs. For some input, this function may not work well.
● When V:INVERT or H&V:INVERT is selected to the MIRROR item in the SETUP menu, if the projector screen is inclined or angled downward, the Auto Keystone function may not work correctly.
● When the zoom adjustment is set to the TELE (telephoto focus), this correction may be excessive. This function should be used when the zoom adjustment is set to the WIDE (wide-angle focus) whenever possible.
● When vertical degree is almost 0 degree, the automatic keystone distortion correction may not work.
● When vertical degree is almost ±30 degree, the automatic keystone distortion correction may not work well.
● This function will be unavailable when Transition Detector is on (*48*).

Using the magnify feature

1. Press the ON button of MAGNIFY on the remote control. The "MAGNIFY" indication will appear on the screen (although the indication will disappear in several seconds with no operation), and the projector will enter the MAGNIFY mode.
2. Use the cursor buttons ▲/▼ to adjust the zoom level.

   To move the zoom area, press the POSITION button in the MAGNIFY mode, then use the cursor buttons ▲/▼/◄/► to move the area. And to finalize the zoom area, press the POSITION button again.

   To exit the MAGNIFY mode and restore the screen to normal, press the OFF button of MAGNIFY on the remote control.

● The projector automatically exits the MAGNIFY mode when the input signal is changed, or when the display condition is changed.
● Although in the MAGNIFY mode, the keystone distortion condition may vary, it will be restored when the projector exits the MAGNIFY mode.

21

Freezing the screen

1. Press the FREEZE button on the remote control.
The "FREEZE" indication will appear on the screen, and the projector will enter the FREEZE mode.

   To exit the FREEZE mode and restore the screen to normal, press the FREEZE button again.
● The projector automatically exits the FREEZE mode when the input signal changes, or when one of the projector's buttons or the remote control buttons of STANDBY/ON, SEARCH, RGB, VIDEO, BLANK, AUTO, ASPECT, VOLUME, MUTE, KEYSTONE, POSITION, MENU, MAGNIFY and MY BUTTON is pressed.

● If the projector continues projecting a still image for a long time, the LCD panel might possibly be printed. Do not leave the projector in the FREEZE mode for too long.

Temporarily blanking the screen

1. Press the BLANK button on the remote control.
The blank screen will be displayed instead of the screen of input signal. Please refer to the BLANK item in the SCREEN menu (📖*37*).

   To exit the blank screen and return to the input signal screen, press the BLANK button again.
● The projector automatically returns to the input signal screen when one of the projector's buttons or the remote control buttons is pressed or one of the commands (except get commands) is transmitted from the control port.

22

Operating the computer screen

⚠**CAUTION** ►Mistaken use of the mouse/keyboard control could damage your equipment.
• While using this function, please connect only with a computer.
• Before connecting, read the manuals of the computer you will connect.

NOTE • It may not be possible to control notebook PC, and other computers with built-in pointing device (e.g. track ball), using this remote control. In this case, before connecting go into BIOS (system setup) and select external mouse, and disable the pointing device. In addition, the mouse may not function if the computer does not have the needed utility program. See your computer's hardware manual for details.
• The USB control can be used with Windows 95 OSR 2.1 or higher. It may not be possible to use the remote control, depending on the computer's configurations and mouse drivers.
• The USB control can be used only for the functions listed below. You cannot do things like press two buttons at once (for instance, pressing two buttons at the same time to move the mouse pointer diagonally).
• This function is not available while the lamp is warming up (the POWER indicator flashes green), and while adjusting the volume and display, correcting for trapezoidal distortion, zooming in on the screen, using the BLANK function, or displaying the menu screen.

USB mouse and keyboard control
1. Connect the projector's USB port to the computer via the mouse cable.
Available function	Remote control operation
Move pointer	Use ▲, ▼, ◄, ► buttons
Left click with mouse	Press ENTER button
Right click with mouse	Press RESET button
Press keyboard's HOME key	Press HOME button
Press keyboard's END key	Press END button
Press keyboard's PAGE UP key	Press PAGE UP button
Press keyboard's PAGE DOWN key	Press PAGE DOWN button
Press keyboard's ESC key	Press ESC button

23

Multifunctional settings

Using the menu function

This projector has the following menus: PICTURE, IMAGE, INPUT, SETUP, SCREEN, OPTION, NETWORK, and EASY MENU. EASY MENU consists of functions often used, and the other menus are classified into each purpose. Each of these menus is operated using the same methods. The basic operations of these menus are as follows.

MENU button
ENTER button
Cursor buttons
RESET button
1. Press the MENU button on the remote control or one of the cursor buttons on the projector.
   The Advanced MENU or EASY MENU will appear.

In the EASY MENU

2. If you want to change it to the Advanced MENU, select the "Go to Advanced Menu"

3. Use the cursor buttons ▲/▼ to select an item to operate.

4. Use the cursor buttons ◄/► to operate the item.
In the Advanced MENU

2. Use the cursor buttons ▲/▼ to select a menu.
   If you want to change it to the EASY MENU, select the EASY MENU.
   Then press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to select an item. The display of the selected menu will be active.

3. Use the cursor buttons ▲/▼ to select an item to operate.
   Then press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to progress. The operation menu of the selected item will appear.

4. Use the cursor buttons ▲/▼ to operate the item.

● When you want to reset the operation, press the RESET button on the remote control during the operation. Note that items whose functions are performed simultaneously with operation (ex. LANGUAGE, H PHASE, VOLUME etc.) cannot be reset.

● In the advanced menu, when you want to return to the previous display, press the cursor button ◄ on the projector or remote control, or the ESC button on the remote control.

5. Press the MENU button on the remote control again to close the menu and complete this operation. Even if you don't do anything, the dialog will automatically disappear after about 10 seconds.

● Some functions cannot be performed when a certain input port is selected, or when a certain input signal is displayed.

24
EASY Menu

With the EASY MENU, items shown in the table below can be performed.

Select an item using the cursor buttons ▲/▼ on the projector or remote control. Then perform it referring to the following table.

```
EASY MENU [RGB1]
ASPECT          ◀   4:3   ▶
AUTO KEYSTONE ⟋⟍  EXECUTE
KEYSTONE      ⟋⟍      +0
PICTURE MODE     NORMAL
BRIGHTNESS           +0
CONTRAST             +0
COLOR                +0
TINT                 +0
SHARPNESS             3
WHISPER          NORMAL
MIRROR           NORMAL
RESET
FILTER TIME         0h
LANGUAGE      ⓐ  ENGLISH
        Go to Advanced Menu...
```

Item	Description
ASPECT	Using the buttons ◀/▶ switches the mode for aspect ratio. See the ASPECT item in the IMAGE menu (📖*30*).
AUTO KEYSTONE EXECUTE	Using the button ▶ executes the auto keystone function. See the AUTO KEYSTONE EXECUTE item in the SETUP menu (📖*35*). This function will be unavailable when Transition Detector is on (📖*48*).
KEYSTONE	Using the buttons ◀/▶ corrects the keystone distortion. See the item KEYSTONE of section SETUP menu. (📖*35*) This function will be unavailable when Transition Detector is on (📖*48*).
PICTURE MODE	Using the buttons ◀/▶ switches the mode of picture type. The modes of picture type are combinations of a mode of GAMMA and a mode of COLOR TEMP. Choose a suitable mode according to the projected source. ⟶ NORMAL ⇔ CINEMA ⇔ DYNAMIC ⟵ �⟶WHITEBOARD ⇔ BOARD(GREEN) ⇔ BOARD(BLACK) ⟵ NORMAL: (COLOR TEMP = MID DEFAULT) + (GAMMA = #1 DEFAULT) CINEMA: (COLOR TEMP = LOW DEFAULT) + (GAMMA = #2 DEFAULT) DYNAMIC: (COLOR TEMP = HIGH DEFAULT) + (GAMMA = #3 DEFAULT) BOARD(BLACK): (COLOR TEMP = Hi-BRIGHT-1 DEFAULT) + 　　　　　　　　(GAMMA = #4 DEFAULT) BOARD(GREEN): (COLOR TEMP = Hi-BRIGHT-2 DEFAULT) + 　　　　　　　　(GAMMA = #4 DEFAULT) WHITEBOARD: (COLOR TEMP = MID DEFAULT) + (GAMMA = #5 　　　　　　　　DEFAULT) • When the combination of GAMMA and COLOR TEMP differs from pre-assigned modes above, the display on the menu for the PICTURE MODE is "CUSTOM". Please refer to the GAMMA (📖*27*) and COLOR TEMP (📖*28*) items in the PICTURE menu. • When this function is performed, a certain extra such as a line may appear.
BRIGHTNESS	Using the buttons ◀/▶ adjusts the brightness. See the item BRIGHTNESS in the PICTURE menu (📖*27*).

EASY Menu (continued)
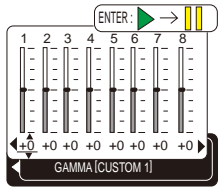

Item	Description
CONTRAST	Using the buttons ◄/► adjusts the contrast. See the CONTRAST item in the PICTURE menu (📖*27*).
COLOR	Using the buttons ◄/► adjusts the strength of whole color. See the COLOR item in the PICTURE menu (📖*28*).
TINT	Using the buttons ◄/► adjusts the tint. See the TINT item in the PICTURE menu (📖*28*).
SHARPNESS	Using the buttons ◄/► adjusts the sharpness. See the SHARPNESS item in the PICTURE menu (📖*28*). • There may be some noise when an adjustment is made. This is not a malfunction.
WHISPER	Using the buttons ◄/► turns off/on the whisper mode. See the WHISPER item in the SETUP menu (📖*35*).
MIRROR	Using the buttons ◄/► switches the mode for mirror status. See the MIRROR item in the SETUP menu (📖*36*). If Transition Detector is TURN ON and MIRROR status is changed, Transition Detector Alarm (📖*48*) will be displayed when projector is restarted after the power switch is turned off.
RESET	Performing this item resets all of the items of EASY MENU except FILTER TIME and LANGUAGE. A dialog is displayed for confirmation. Selecting RESET using the button ▲ performs resetting.
FILTER TIME	Performing this item resets the filter timer which counts usage time of the air filter. A dialog is displayed for confirmation. Selecting RESET using the button ▲ performs resetting. See the FILTER TIME item in the OPTION menu (📖*41*).
LANGUAGE	Using the buttons ◄/► selects the LANGUAGE item to toggle the menu language. Refer to description of LANGUAGE in the SCREEN menu (📖*37*).
Go to Advanced Menu	Select "Go to Advanced Menu" and press the button ► or the ENTER button to use the menu of PICTURE, IMAGE, INPUT, SETUP, SCREEN, OPTION or NETWORK.

PICTURE Menu

With the PICTURE menu, the items shown in the table below can be performed.

Select an item using the cursor buttons ▲/▼ on the projector or remote control, and press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to execute the item. Then perform it referring to the following table.

MENU [RGB1]		◯ :SELECT
PICTURE	BRIGHTNESS	+0
IMAGE	CONTRAST	+0
INPUT	GAMMA	DEFAULT 1
SETUP	COLOR TEMP	MIDDLE
SCREEN	COLOR	+0
OPTION	TINT	+0
NETWORK	SHARPNESS	3
EASY MENU	MY MEMORY	SAVE 1

Item	Description
BRIGHTNESS	Using the buttons ▲/▼ adjusts the brightness. :　　Light ⇔ Dark
CONTRAST	Using the buttons ▲/▼ adjusts the contrast. :　　Strong ⇔ Weak
GAMMA	Using the buttons ▲/▼ switches the GAMMA mode. #1 DEFAULT ⇔#1 CUSTOM ⇔ #2 DEFAULT ⇔ #2 CUSTOM ⇔ #3 DEFAULT #5 CUSTOM ⇔ #5 DEFAULT ⇔ #4 CUSTOM ⇔ #4 DEFAULT ⇔ #3 CUSTOM **To adjust CUSTOM** Selecting a mode of CUSTOM and then pressing the button ► or the ENTER button displays a dialog to aid you in adjusting the mode. This function is useful when you want to change the brightness of particular tones. Choose an item using the buttons ◄/►, and adjust the level using the buttons ▲/▼. You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button. Each time you press the ENTER button, the pattern changes as below. No pattern ⇨ Gray scale of 9 steps ⇧———Ramp ⇦ Gray scale of 15 steps The eight equalizing bars correspond to eight tone levels of the test pattern except the darkest in the left end. If you want to adjust the 2nd tone from left end on the test pattern (Gray scale of 9 steps), use the equalizing adjustment bar "1". The darkest tone at the left end of the test pattern cannot be controlled with any of equalizing adjustment bar. • When this function is performed, a certain extra such as a line may appear.

27

PICTURE Menu (continued)

Item	Description
COLOR TEMP	Using the buttons ▲/▼ switches the mode of color temperature. ⇒ HIGH DEFAULT ⇔ HIGH CUSTOM ⇔ MID DEFAULT ⇔ MID CUSTOM ⇐ ⇒ LOW DEFAULT ⇔ LOW CUSTOM ⇔ Hi-BRIGHT-1 DEFAULT ⇔ Hi-BRIGHT-1 CUSTOM ⇐ ⇒ Hi-BRIGHT-2 DEFAULT ⇔ Hi-BRIGHT-2 CUSTOM ⇐ **To adjust CUSTOM** Selecting the CUSTOM and then pressing the button ► or the ENTER button displays a dialog to aid you in adjusting the OFFSET and/or GAIN of the CUSTOM mode. OFFSET adjustments change the color intensity on the whole tones of the test pattern. GAIN adjustments mainly affect color intensity on the brighter tones of the test pattern. Choose an item using the buttons ◄/►, and adjust the level using the buttons ▲/▼. You can display a test pattern for checking the effect of your adjustment by pressing the ENTER button. Each time you press the ENTER button, the pattern changes as below. No pattern ⇨ Gray scale of 9 steps Ramp ⇦ Gray scale of 15 steps • When this function is performed, a certain extra such as a line may appear.
COLOR	Using the buttons ▲/▼ adjusts the strength of whole color. Strong ⇔ Weak • This item can be selected only for a video signal, s-video or component video signal.
TINT	Using the buttons ▲/▼ adjusts the tint. Greenish ⇔ Redish • This item can be selected only for a video signal, s-video or component video signal.
SHARPNESS	Using the buttons ▲/▼ adjusts the sharpness. Strong ⇔ Weak • There may be some noise and/or the screen may flicker for a moment when an adjustment is made. This is not a malfunction.

PICTURE Menu (continued)
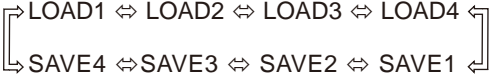

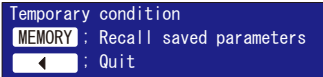

Item	Description
MY MEMORY	Selecting a mode of MY MEMORY using the buttons ▲/▼ and then pressing the button ► or the ENTER button performs each function. ┌─LOAD1 ⇔ LOAD2 ⇔ LOAD3 ⇔ LOAD4 ─┐ └→SAVE4 ⇔ SAVE3 ⇔ SAVE2 ⇔ SAVE1 ⇐┘ This projector has 4 numbered memories for adjustment data. Performing the LOAD1, LOAD2, LOAD3 or LOAD4 loads the data on the memory whose number corresponds to the command's number, and adjusts the picture automatically depending on the data. Performing the SAVE1, SAVE2, SAVE3 or SAVE4 saves the current adjustment data on the memory whose number corresponds to the command's number. • The current adjustment data of the items in the PICTURE menu is stored. • There may be some noise and/or the screen may flicker for a moment when data is loaded to memory. This is not a malfunction. When the current settings are not saved to memory the following dialog is displayed. Temporary condition MEMORY ; Recall saved parameters ◄ ; Quit To load saved adjustment settings press the MY BUTTON button. When there are no saved adjustment settings the following dialog is displayed. No saved data **~Note~** You have to assign the MY MEMORY function to the MY BUTTON (📖*41*).

IMAGE Menu

With the IMAGE menu, items shown in the table below can be performed.
Select an item using the cursor buttons ▲/▼ on the projector or remote control, and press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to execute the item. Then perform it referring to the following table.

MENU [RGB1]		:SELECT
PICTURE	ASPECT	4:3
IMAGE	OVER SCAN	5
INPUT	V POSITION	25
SETUP	H POSITION	142
SCREEN	H PHASE	16
OPTION	H SIZE	1344
NETWORK	AUTO ADJUST EXECUTE	
EASY MENU		

Item	Description
ASPECT	Using the buttons ▲/▼ switches the mode for aspect ratio. **For an RGB signal** NORMAL ⇔ 4:3 ⇔ 16:9 ⇔ SMALL **For a video signal, s-video signal or component video signal** 4:3 ⇔ 16:9 ⇔ 14:9 ⇔ SMALL **For a no signal** 4:3 (fixed) • The NORMAL mode keeps the original aspect ratio of the signal.
OVER SCAN	Using the buttons ▲/▼ adjusts the over-scan ratio. Large (It reduces picture) ⇔ Small (It magnifies picture) • This item can be selected only for a video, s-video and component signal. • When this adjustment is too large, certain degradation may appear at the frame area of the picture. In such a case, please adjust small.
V POSITION	Using the buttons ▲/▼ adjusts the vertical position. Up ⇔ Down • Over-adjusting the vertical position may cause noise to appear on the screen. If this occurs please reset the vertical position to the default setting. Pressing the RESET button when V POSITION is selected will reset the V POSITION to the default setting. **For a video signal, s-video signal or component video signal** The adjustable range of V.POSITION depends on the OVERSCAN setting. It is not possible to adjust when the OVERSCAN is set to 10.
H POSITION	Using the buttons ▲/▼ adjusts the horizontal position. Left ⇔ Right • Over-adjusting the horizontal position may cause noise to appear on the screen. If this occurs please reset the horizontal position to the default setting. Pressing the RESET button when H POSITION is selected will reset the H POSITION to the default setting. **For a video signal, s-video signal or component video signal** The adjustable range of H.POSITION depends on the OVERSCAN setting. It is not possible to adjust when the OVERSCAN is set to 10.
H PHASE	Using the buttons ▲/▼ adjusts the horizontal phase to eliminate flicker. Right ⇔ Left • This item can be selected only for an RGB signal or a component video signal.

IMAGE Menu (continued)

Item	Description
H SIZE	Using the buttons ▲/▼ adjusts the horizontal size. Large ⇔ Small • This item can be selected only for an RGB signal. • When this adjustment is excessive, the picture may not be displayed correctly. In such a case, please reset the adjustment by pressing the RESET button on the remote control during this operation.
AUTO ADJUST EXECUTE	Selecting this item performs the automatic adjustment feature. **For an RGB signal** The vertical position, the horizontal position, the horizontal phase and the horizontal size will be automatically set to default. And the aspect ratio will be automatically selected. Make sure that the application window is set to its maximum size prior to attempting to use this feature. A dark picture may still be incorrectly adjusted. Use a bright picture when adjusting. **For a video signal or s-video signal** The video format best suited for the respective input signal will be selected automatically. This function is available only when the AUTO mode is selected to the VIDEO FORMAT item in the INPUT menu. For a component video signal, the signal type is identified automatically independently of this function. **For a video signal, s-video signal or component video signal** The vertical position, horizontal position and aspect ratio will be automatically set to default. **For a component video signal** The horizontal phase will be automatically set to default. • The automatic adjustment operation requires about 10 seconds. Also please note that it may not function correctly with some input.

31

INPUT Menu

With the INPUT menu, the items shown in the table below can be performed.

Select an item using the cursor buttons ▲/▼ on the projector or remote control, and press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to execute the item. Then perform it referring to the following table.

MENU [RGB1]		⟳ :SELECT
PICTURE	PROGRESSIVE	TV
IMAGE	VIDEO NR	MID
INPUT	COLOR SPACE	AUTO
SETUP	COMPONENT	COMPONENT
SCREEN	VIDEO FORMAT	AUTO
OPTION	FRAME LOCK	TURN ON
NETWORK	RGB IN	
EASY MENU	RESOLUTION	
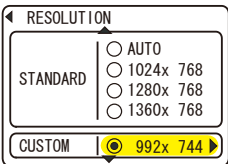

Item	Description
PROGRESSIVE	Using the buttons ▲/▼ switches the progress mode. 　TV ⇔ FILM ⇔ TURN OFF • This function is performed only for an interlaced signal of a VIDEO input, an S-VIDEO input or COMPONENT VIDEO input of 525i (480i) or 625i (576i) signal. • When TV or FILM is selected, the screen image will be sharp. FILM adapts to the 2-3 Pull-Down conversion system. But these may cause a certain defect (for example, jagged line) of the picture for a quick moving object. In such a case, please select TURN OFF, even though the screen image may lose the sharpness.
VIDEO NR	Using the buttons ▲/▼ switches the noise reduction mode. 　HIGH ⇔ MID ⇔ LOW • This function performs only at a VIDEO input, an S-VIDEO or COMPONENT VIDEO input of 525i(480i) or 625i(576i) signal. • When this function is excessive, it may cause a certain degradation of the picture.
COLOR SPACE	Using the buttons ▲/▼ switches the mode for color space. 　AUTO ⇔ RGB ⇔ SMPTE240 ⇔ REC709 ⇔ REC601 　⇑＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿⇑ • This item can be selected only for an RGB signal or a component video signal (except signals of SCART RGB from the component video port). • The AUTO mode automatically selects the optimum mode. • The AUTO operation may not work well at some signals. In such a case, it might be good to select a suitable mode except AUTO.

INPUT Menu (continued)

Item	Description
COMPONENT	Using the buttons ▲/▼ switches the function of COMPONENT VIDEO port. COMPONENT ⇔ SCART RGB When the SCART RGB is selected, the COMPONENT VIDEO port function as a port for a SCART RGB signal input and VIDEO port function as a port for SCART RGB sync input. A SCART adapter and SCART cable realize a SCART RGB input to the projector. For details, contact your dealer.
VIDEO FORMAT	Set the video format for the s-video port and video port. (1) Use the ◄/► buttons to select the input port. (2) Using the buttons ▲/▼ switches the mode for video format. AUTO ⇔ NTSC ⇔ PAL ⇔ SECAM ↰ N-PAL ⇔ M-PAL ⇔ NTSC4.43 ↲ • This item is performed only for a video signal from the VIDEO port or the S-VIDEO port. • The AUTO mode automatically selects the optimum mode. • The AUTO operation may not work well for some signals. If the picture becomes unstable (ex. an irregular picture, a color lack), please select the mode depending on the input signal.
FRAME LOCK	Using the buttons ▲/▼ turns the frame lock function on/off. TURN ON ⇔ TURN OFF • This item performs only at a RGB signal with vertical frequency of 50 to 60 Hz. • When the TURN ON is selected, a moving picture is displayed more smoothly. • This function may cause a certain degradation of the picture. In such a case, please select the TURN OFF.
RGB IN	Set the RGB input signal type for the RGB port. (1) Use the ◄/► buttons to select the RGB port to be set. RGB1 ⇔ RGB2 (2) Use the ▲/▼ buttons to select the RGB input signal type. SYNC ON G ON ⇔ SYNC ON G OFF • Selecting TURN ON turns on the SYNC ON G mode. The SYNC ON G mode allows reception of SYNC ON G. • In the SYNC ON G mode, the picture may be distorted with certain input signals. In such a case, remove the signal connector so that no signal is received and turn SYNC ON G off, and then reconnect the signal.

INPUT Menu (continued)

Item	Description
RESOLUTION ***2**	The resolution for the RGB1 and RGB2 input signals can be set on this projector. (1) In the INPUT menu select RESOLUTION using the ▲/▼ buttons and press the ► button. The RESOLUTION menu will be displayed. (2) In the RESOLUTION menu select the resolution you wish to display using the ▲/▼ buttons. Selecting AUTO will set a resolution appropriate to the input signal. (3) Pressing the ► or Enter button when selecting a STANDARD resolution will automatically adjust the horizontal and vertical positions, clock phase and horizontal size and automatically select an aspect ratio. The INFORMATION dialog (&43) will be displayed. (4) To set a custom resolution use the ▲/▼ buttons to select CUSTOM and the CUSTOM RESOLUTION BOX will be displayed. Set the horizontal (HORZ) and vertical (VERT) resolutions using the ▲/▼/◄/► buttons. *1 (5) To save the setting place the cursor on the right-most digit and press the ► button. The horizontal and vertical positions, clock phase and horizontal size will be automatically adjusted and an aspect ratio will be automatically selected. After the INFORMATION(&43) dialog has displayed for about 10 seconds the screen will return to the RESOLUTION menu displaying the changed resolution. (6) To revert back to the previous resolution without saving changes place the cursor on the left-most digit and press the ◄ button. The screen will then return to the RESOLUTION menu displaying the previous resolution.

SETUP Menu
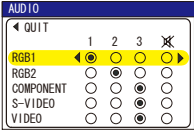

With the SETUP menu, the items shown in the table below can be performed.
Select an item using the cursor buttons ▲/▼ on the projector or remote control, and press the cursor button ►
on the projector or remote control, or the ENTER button on the remote control to execute the item. Then perform it referring to the following table.
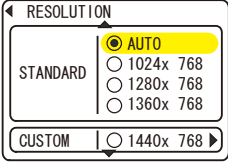

MENU [RGB1]	☺ : SELECT
PICTURE	AUTO KEYSTONE ⬓EXECUTE
IMAGE	KEYSTONE ⬓ +0
INPUT	WHISPER NORMAL
SETUP	MIRROR NORMAL
SCREEN	VOLUME 16
OPTION	AUDIO
NETWORK	
EASY MENU	

Item	Description
AUTO KEYSTONE EXECUTE	Selecting this item performs the Automatic keystone distortion correction. Projector automatically corrects vertical keystone distortion due to the (forward/backward) setup angle by itself.
	• This function will be executed only once when selected in the Menu. When the slant of the projector is changed, executes this function again.
	• When V:INVERT or H&V:INVERT is selected to the MIRROR item in the SETUP menu, if the projector screen is inclined or angled downward, this function may not work correctly.
	• When the zoom adjustment is set to the TELE (telephoto focus), this correction may be excessive. This function should be used when the zoom adjustment is set to the WIDE (wide-angle focus) whenever possible.
	• When vertical degree is almost 0 degree, the automatic keystone distortion correction may not work.
	• When vertical degree is over ±30 degree, the automatic keystone distortion correction may not work well.
	• This function will be unavailable when Transition Detector is on (📖*48*).
KEYSTONE	Using the buttons ▲/▼ corrects the keystone distortion.
	Upper in the data ⇔ Lower in the data
	• The adjustable range of this function will vary with the type of input signal. At some signals, this function may not work well.
	• This function will be unavailable when Transition Detector is on (📖*48*).
WHISPER	Using the buttons ▲/▼ turns off/on the whisper mode.
	NORMAL ⇔ WHISPER
	• When the WHISPER is selected, acoustic noise and screen brightness are reduced.

35

SETUP Menu (continued)

Item	Description
MIRROR	Using the buttons ▲/▼ switches the mode for mirror status. NORMAL ⇔ H:INVERT ⇔ V:INVERT ⇔ H&V:INVERT If Transition Detector is TURN ON and MIRROR status is changed, Transition Detector Alarm (📖*48*) will be displayed when projector is restarted after the power switch is turned off.
VOLUME	Using the buttons ▲/▼ adjusts the volume. High ⇔ Low
AUDIO	Allocates the audio ports. Choose a picture input port using the buttons ▲/▼ (1), then select the audio port to be interlocked with the input port using the buttons ◄/► (2). When off is selected, all audio ports do not work for the input port. (1) RGB1 ⇔ RGB2 ⇔ COMPONENT ⇔ S-VIDEO ⇔ VIDEO (2) 1 ⇔ 2 ⇔ 3 ⇔ 🔇

SCREEN Menu

With the SCREEN menu, the items shown in the table below can be performed.

Select an item using the cursor buttons ▲/▼ on the projector or remote control, and press the cursor button ► on the projector or remote control, or the ENTER button on the remote control to execute the item. Then perform it referring to the following table.

MENU [RGB1]	⊙ :SELECT
PICTURE	LANGUAGE ❷ ENGLISH
IMAGE	MENU POSITION
INPUT	BLANK BLACK
SETUP	START UP ORIGINAL
SCREEN	MyScreen
OPTION	MyScreen Lock TURN OFF
NETWORK	MESSAGE TURN ON
EASY MENU	SOURCE NAME

Item	Description
LANGUAGE	Using the buttons ▲/▼ switches the OSD (On Screen Display) language. ENGLISH ⇔ FRANÇAIS ⇔ DEUTSCH ⇔ ESPAÑOL ⇔ ITALIANO NORSK ⇔ NEDERLANDS ⇔ PORTUGUÊS ⇔ 日本語 简体中文⇔繁體中文⇔한글⇔ SVENSKA ⇔ РУССКИЙ SUOMI ⇔ POLSKI ⇔ TÜRKÇE
MENU POSITION	Using the buttons ◄/►/▲/▼ adjusts the menu position. To quit the operation, press the MENU button on the remote control or keep no operation for about 10 seconds.
BLANK	Using the buttons ▲/▼ switches the mode for the blank screen. The blank screen is a screen for the temporarily blanking feature (📖22). It is displayed by pressing the BLANK button on the remote control. MyScreen ⇔ ORIGINAL ⇔ BLUE ⇔ WHITE ⇔ BLACK MyScreen is a screen you can register as a desired screen. The ORIGINAL screen is the existing standard screen. BLUE, WHITE and BLACK are non-patterned (plain) screens in each color. • To avoid remaining as an afterimage, the MyScreen and the ORIGINAL screens will change to the BLACK screen after several minutes. • For the MyScreen, please refer to the MyScreen item (📖38).

SCREEN Menu (continued)

Item	Description
START UP	Using the buttons ▲/▼ switches the mode for the start-up screen. The start-up screen is a screen displayed when no signal or an unsuitable signal is detected. MyScreen ⇔ ORIGINAL ⇔ TURN OFF MyScreen is a screen you can register as a desired screen.The ORIGINAL screen is the existing standard screen. When TURN OFF is selected, the BLACK screen is used. • To avoid remaining as an afterimage, the MyScreen and the ORIGINAL screens will change to the BLANK screen after several minutes. If also the BLANK screen is the MyScreen or ORIGINAL, it will change to the BLACK screen. • For the MyScreen, please refer to the item MyScreen below. For the BLANK screen, please refer to the BLANK item (📖*37*). • This function will be unavailable and fixed to Myscreen when MyScreen Password in the Security Menu is on.
MyScreen	This item functions for capturing the MyScreen of the blank screen and the start-up screen. Please execute displaying the input including the picture you want to capture. 1. Selecting this item displays a dialog titled "MyScreen". It will ask you if you start capturing the picture from the current screen. Please wait for the target picture to be displayed, and press the ENTER button on the remote control when the picture is displayed. The picture will freeze and the frame for capturing appears. To stop performing, press the RESET or ESC button on the remote control. 2. Using the buttons ◄/►/▲/▼ adjusts the frame position. Please move the frame to the position of the picture which you want to use. The frame may not be able to be moved for some input signals. To start registration, press the ENTER button on the remote control. To restore the screen and return to the previous dialog, press the RESET or ESC button on the remote control. Registration takes several minutes. When the registration is completed, the registered screen and the message "MyScreen registration is finished." are displayed for several seconds. If the registration failed, the message "A capturing error has occurred. Please try again." is displayed. • This function will be unavailable when MyScreen Password in the Security Menu is on. NOTE : The KEYSTONE cannot be adjusted while using the MyScreen function.
MyScreen Lock	Using the buttons ▲/▼ turns on/off the MyScreen lock function. TURN ON ⇔ TURN OFF When the TURN ON is selected, the item MyScreen is locked. Use this function for protecting the current MyScreen. • This function will be unavailable when MyScreen Password in the Security Menu is on.

SCREEN Menu (continued)

Item	Description
MESSAGE	Using the buttons ▲/▼ turns on/off the message function. TURN ON ⇔ TURN OFF When the TURN ON is selected, the following message function works. "AUTO IN PROGRESS" while automatically adjusting "NO INPUT IS DETECTED" "SYNC IS OUT OF RANGE" "Searching…." while searching for the input "Detecting…." while an input signal is detected The indication of the input signal displayed by changing The indication of the aspect ratio displayed by changing The indication of the My Memory displayed by changing The indication of the Picture Mode displayed by changing The indication of "FREEZE" and "II" while freezing the screen by pressing the FREEZE button. • When the TURN OFF is selected, please remember if the picture is freezing. Do not mistake freezing for a malfunction (*22*).
SOURCE NAME	Each input port for this projector can have a name applied to it. (1) Use the ▲/▼ buttons on the SCREEN menu to select SOURCE NAME and press the ► button. The SOURCE NAME menu will be displayed. ◄ SOURCE NAME RGB1 ; ► RGB2 ; DESKTOP PC COMPONENT ; DVD S-VIDEO ; CAMERA VIDEO ; VTR SOURCE NAME MENU *Right side of the menu is blank until a name is specified (2) Use the ▲/▼ buttons on the SOURCE NAME menu to select the port to be named and press the ► button. The SOURCE NAME dialog will be displayed. (3) The current name will be displayed on the first line. Use the ◄/►/▲/▼ and ENTER or INPUT buttons to select and enter characters. The RESET button can be used to erase 1 character at a time. The name can be a maximum of 16 characters. NAME: RGB1 :SELECT R G B 1 A B C D E F G H I J K L M N O P Q R S T U V W X Y Z a b c d e f g h i j k l m n o p q r s t u v w x y z 0 1 2 3 4 5 6 7 8 9 – _ . # ! ? & ESC , ◄ + :QUIT ENTER , :NEXT (4) To change an already inserted character, press the ▲ button while the cursor is on the [A-N] row to move the cursor to the name displayed on the first line and use the ◄/► buttons to select character to be changed. Once a character in the name is selected use the ▼ button to move the cursor back down to the character entry area to select and enter characters as described above.               SECURITY
```

Item	Description
AUTO SEARCH	Using the buttons ▲/▼ turns on/off the automatic signal search function. TURN ON ⇔ TURN OFF When the TURN ON is selected, detecting no signal automatically cycles through input ports in the following order. The search is started from the current port. Then when an input is found, the projector will stop searching and display the image. RGB IN1 ⇨ RGB IN2 ⇨ COMPONENT VIDEO ⇨ S-VIDEO ⇨ VIDEO
AUTO KEYSTONE	Using the buttons ▲/▼ turns on/off the automatic keystone function. TURN ON ⇔ TURN OFF TURN ON : Automatic keystone distortion correction will be executed whenever changing the slant of the projector. TURN OFF : This function is disabled. Please execute the AUTO KEYSTONE EXECUTE in the SETUP Menu for automatic keystone distortion correction. When the projector is suspended from the ceiling this feature will not function properly so select TURN OFF. This function will be unavailable when Transition Detector is on (📖*48*).
AUTO ON	Using the buttons ▲/▼ turns on/off the AUTO ON function. TURN ON ⇔ TURN OFF When set to TURN ON, the lamp will only be automatically turned on when the Power switch is turned on after the power was turned off by Power switch last time. The lamp will not be automatically turned on when the Power switch is turned on if the lamp was turned off with the following procedures. • The lamp was turned off with a remote control, projector button, or power turn off command. • The lamp was turned off with an AUTO OFF function (📖*41*). • The lamp was turned on by an AUTO ON function and was turned off about 30 minutes after no signal had been detected. When no input is detected after the power on and AUTO OFF time is set to 0, the projector will be turned off after about 30 minutes passed. When no input is detected after the power on and AUTO OFF time is set to 1 to 99, the projector will be turned off after the passed time reaches at the set time. If one of the projector's buttons or the remote control buttons is pressed or one of the commands (except get commands) is transmitted from the control port during the corresponding time, projector will not be turned off.

OPTION Menu (continued)

Item	Description
AUTO OFF	Using the buttons ▲/▼ adjusts the time to count down to automatically turn the projector off. Long (max. 99 minutes) ⇔ Short (min. 0 minute = DISABLE) When the time is set to 0, the projector is not turned off automatically. When the time is set to 1 to 99, and when the passed time with no-signal or an unsuitable signal reaches at the set time, the projector lamp will be turned off. If one of the projector's buttons or the remote control buttons is pressed or one of the commands (except get commands) is transmitted from the control port during the corresponding time, projector will not be turned off. Please refer to the section "Turning off the power" (📖*17*).
LAMP TIME	The lamp time is the time counted after the last resetting. It is shown in the OPTION menu as the usage time of the lamp. Pressing the RESET button on the remote control or the button ► of the projector displays a dialog. To reset the lamp time, select the RESET using the button ▲. 　　RESET ⇔ CANCEL • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp. • For the lamp replacement, see the section "Lamp" (📖*53, 54*).
FILTER TIME	The filter time is the time counted after the last resetting. It is shown in the OPTION menu as the usage time of the air filter. Pressing the RESET button on the remote control or the button ► of the projector displays a dialog. To reset the filter time, select the RESET using the button ▲. 　　RESET ⇔ CANCEL • Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter. • For the air filter cleaning, see the section "Air filter" (📖*55, 56*).
MY BUTTON	Sets the assigned function for the MY BUTTON1 and 2 buttons on the included remote control. • RGB1: Sets port to RGB1. • RGB2: Sets port to RGB2. • COMPONENT: Sets port to COMPONENT. • S-VIDEO: Sets port to S-VIDEO. • VIDEO: Sets port to VIDEO. • e-SHOT: Displays the e-SHOT menu (📖*51*). • INFORMATION: Displays INPUT INFORMATION (📖*43*). • AUTO KEYSTONE EXECUTE: Performs automatic KEYSTONE correction (📖*35*). • MY MEMORY: Loads MY MEMORY settings (📖*29*). • PICTURE MODE: Changes the PICTURE mode (📖*25*). • FILTER RESET: Displays the filter time reset confirmation dialogue (📖*41*). • VOLUME+: Sets the volume up. • VOLUME−: Sets the volume down.

OPTION Menu (continued)

Item	Description
SERVICE	Selecting this item displays the SERVICE menu. Select an item using the buttons ▲/▼, and press the button ► or the ENTER button on the remote control to execute the item. FAN SPEED ⇔ AUTO ADJUST ⇔ GHOST ⇔ FILTER MESSAGE ⇔ KEY LOCK ↳ FACTORY RESET ⇔ INFORMATION ⇔ REMOTE FREQ. ⤶ **FAN SPEED** Using the buttons ▲/▼ switches the rotation speed of the cooling fans. The HIGH is the mode for use at highlands etc. Note that the projector is noisier when the HIGH is selected. HIGH ⇔ NORMAL **AUTO ADJUST** Using the buttons ▲/▼ enables/disables the automatic adjustment. When DISABLE is selected, the automatic adjustment feature is disabled, although rough adjustment is automatically performed depending on the basic setting. ENABLE ⇔ DISABLE • Depending on conditions, such as input image, signal cable to the projector, environment around the projector, etc., the automatic adjustment may not work correctly. In such a case, please choose DISABLE to disable the automatic adjustment, and make adjustment manually. **GHOST** 1. Select a color element of ghost using the buttons ◄/►. 2. Adjust the selected element using the buttons ▲/▼ to disappear ghost. **FILTER MESSAGE** Use the ▲/▼ button to set the timer for the interval to show the message for cleaning up the air filter. 50h ⇔ 100h ⇔ 200h ⇔ 300h ⇔ TURN OFF After selecting "50h", "100h", "200h", or "300h", the message "REMINDER ∗∗∗ HRS PASSED AFTER THE LAST FILTER CHECK" will appear after the timer reaches the interval time set by the menu. (*59*) When the "TURN OFF" is chosen, the air filter cleaning message will not appear. • Please check and clean the air filter periodically, even if there is no message. If the air filter becomes to be blocked by dust or others, the internal temperature will rise, which could cause malfunction, or reduce the lifetime of the projector. • It is recommended to choose "100h" in general. Please be careful with the operating environment of the projector and the condition of the air filter, especially when the "200h", "300h" or "TURN OFF" is chosen. **KEY LOCK** Using the buttons ▲/▼ turns on/off the key lock feature. When TURN ON is selected, the buttons on the projector except the STANDBY/ON button are locked. TURN ON ⇔ TURN OFF • Please use to avoid a mischief and touching accidentally. This function does not have any effect on the remote control.

OPTION Menu (continued)

Item	Description
SERVICE	**REMOTE FREQ.** Use the ▲/▼ button to change the Projector's remote sensor setting (📖*16*). 1:NORMAL ⇔ 2:HIGH Items with a checkmark are on. The factory default setting is for both 1:NORMAL and 2:HIGH to be on. If the remote control does not function correctly set the this to either only 1 or only 2 as described in Remote Control Settings (📖*16*). Neither can be turned off at the same time. **INFORMATION** Selecting this item displays a dialog titled "INPUT INFORMATION". It shows the information about the current input. ◄ INPUT-INFORMATION RGB 1024x768 @60Hz FRAME LOCK ◄ INPUT-INFORMATION S-VIDEO SECAM AUTO ◄ INPUT-INFORMATION COMPONENT 576i @50 SCART RGB • The "FRAME LOCK" message on the dialog means the frame lock function is working. • The "SCART RGB" message means the COMPONENT VIDEO port is working as a SCART RGB input port. Please refer to the COMPONENT item in INPUT menu. (📖*33*) • This item can't be selected for no signal and sync out. **FACTORY RESET** Selecting RESET using the button ▲ performs this function. By this function, all the items in all of menus will collectively return to the initial setting. Note that the items LAMP TIME, FILTER TIME, LANGUAGE and OPTION_SECURITY are not reset. RESET ⇔ CANCEL

 EASY MENU    INFORMATION
              SERVICE
```
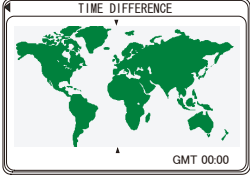

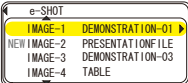

NOTE • The factory default setting for DHCP is "TURN ON". You do not have to set up [DHCP], [IP ADDRESS], [SUBNET MASK] or [DEFAULT GATEWAY] if your network has DHCP enabled. (📖 **User's Manual - Network Functions**)
• If you are not utilizing SNTP (📖 **User's Manual - Network Functions**), then you must set the DATE AND TIME during the initial installation. Please refer to the item DATE AND TIME on the following list.

NOTE Ask with your network administrator before connecting to an existing access point on your network. Incorrect network settings on this projector may cause unnecessary troubles on the network.

Item	Operation
DHCP (Dynamic Host Configuration Protocol)	DHCP TURN ON/TURN OFF: Use the ▲/▼ buttons to turn DHCP on/off TURN ON ⇔ TURN OFF Select TURN OFF when the network does not have DHCP enabled. DHCP TURN ON TURN OFF
IP ADDRESS	Input the IP ADDRESS : Use the ▲/▼/◄/► buttons to enter the IP ADDRESS. This function is available as long as DHCP is set to "TURN OFF". ◄ 192. 168. 1. 254 ► IP ADDRESS **~Note~** IP ADDRESS is a number which identifies this projector on the network. You cannot have two devices with the same IP ADDRESS on the same network.
SUBNET MASK	Input the SUBNET MASK : Use the buttons ▲/▼/◄/► to enter the same SUBNET MASK of your PC. This function is available as long as DHCP is set to "TURN OFF". ◄ 255. 255. 255. 0 ► SUBNET MASK

NETWORK Menu (continued) 8776-RJ Only.

Item	Operation
DEFAULT GATEWAY	Input the DEFAULT GATEWAY : Use the ▲/▼/◄/► buttons to enter the DEFAULT GATEWAY (a node on a computer network that serves as an access point to another network) address. This function is available as long as DHCP is set to "TURN OFF".
TIME DIFFERENCE	Input the TIME DIFFERENCE : Use the ▲/▼ buttons to enter the TIME DIFFERENCE. Set the same TIME DIFFERENCE as that on your PC. If unsure, ask your network administrator. Use the ◄ button to return to the menu after setting the TIME DIFFERENCE.
DATE AND TIME	Input DATE AND TIME : Use the ▲/▼/◄/► buttons to enter the Year (last two digits), Month, Date, Hour and Minute. **~Note~** The projector will override this setting and retrieve DATE AND TIME information from the Timeserver when SNTP is enabled. See **[Date/Time Settings]** in **[User's Manual - Network Functions: Configuring and Controlling the Projector via a Web Browser]** for SNTP settings.
e-SHOT	e-SHOT display : Use the ▲/▼ buttons to select an item and the ► or ENTER buttons to display the image. Image1 Image2 Image3 Image4 File names of registered images are displayed by 16 characters or less. Example: DEMONSTRATION-01 "NEW" stamp is added to the head of line when the image is registered newly. After the image is displayed, "NEW" stamp will be erased. Once an image is displayed, you can use the ▲/▼ buttons to page through the images. Use the ◄ or ESC buttons to return to the menu. Pressing the RESET button on the remote control while an image is being displayed will display the RESET menu. The displayed image can be deleted from the RESET menu using the ENTER button on the remote control or the INPUT button on the projector. If you do not wish to delete the image use the ESC button on the remote control or push the ◄ and INPUT buttons on the projector at the same time. **~Note~** • Items with no image stored cannot be selected. • Images can be changed using the ▲/▼ buttons while the image data downloads.

NETWORK Menu (continued) 8776-RJ Only.

Item	Operation
INFORMATION	INFORMATION display : Use the ► or ENTER buttons to view network information and confirm settings. ◄ NETWORK-INFORMATION NAME IP ADDRESS 192.168.1.254 SUBNETMASK 255.255.255.0 DEFAULT GATEWAY 0.0.0.0 MAC ADDRESS 00:00:87:56:AC:7C TIME DIFFERENCE GMT 00:00 DATE AND TIME 2000/1/1 8:15 **~Note~** • Only the first 16 characters of the projector name are displayed. • When the voltage level of battery for built in clock decreases, set time may become incorrect even though accurate date and time are input. Replace a battery through the following the instructions. (📖*57*)
SERVICE	Excuting this item restarts and initializes the Network Function. Choose the RESTART using the button ►. ◄ SERVICE **RESTART** ▶ Then use the button ▲ to execute. ◄ RESTART ▲ EXECUTE **CANCEL** ▼ Network will be once cut off when choose restart. If DHCP is selected on, IP address may be changed. After selecting RESTART, Network menu may not be controlled approx. 30 seconds.

Network Functions

Refer to the separate volume on Network Functions.

Lamp

⚠ **WARNING** ⚡ HIGH VOLTAGE 🔥 HIGH TEMPERATURE 💥 HIGH PRESSURE
►The projector uses a high-pressure mercury glass lamp. The lamp can <u>break with a loud bang, or burn out</u>, if jolted or scratched, handled while hot, or worn over time. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. In addition, when the bulb bursts, it is possible for <u>shards of glass</u> to fly into the lamp housing, and for <u>gas containing mercury</u> to escape from the projector's vent holes.
►**About disposal of a lamp** • This product contains a mercury lamp; do not put it in a trash. Dispose of it in accordance with environmental laws. For lamp recycling, go to www.lamprecycle.org. (in the US) For product disposal, contact your local government agency or www.eiae.org (in the US) or www.epsc.ca (in Canada). For more information, call your dealer.
Disconnect the plug from the power outlet • If the lamp should break (it will make a loud bang when it does), unplug the power cord from the outlet, and make sure to request a replacement lamp from your local dealer. Note that shards of glass could damage the inside of the projector, or cause injury during handling, so please do not try to clean the projector or replace the lamp yourself. • If the lamp should break (it will make a loud bang when it does), ventilate the room well, and make sure not to breathe the gas that comes out of the projector vents, or get it in your eyes or mouth. • Before replacing the lamp, turn the projector off and unplug the power cord, then wait at least 45 minutes for the lamp to cool sufficiently. Handling the lamp while hot can cause burns, as well as damaging the lamp.
🚫 • Never unscrew except the appointed (marked by an arrow) screws. • Do not open the lamp cover while the projector is suspended from the ceiling. This is dangerous, since if the lamp's bulb has broken, the shards will fall out when the cover is opened. In addition, working in high places is dangerous, so ask your local dealer to have the lamp replaced even if the bulb is not broken. • Do not use the projector with the lamp cover removed. To replace the lamp, make sure that the screws are tightened firmly. Loose screws could result in damage or injury.
❗ • Use only the lamp of the specified type. • If the lamp breaks soon after the first time it is used, it is possible that there are electrical problems elsewhere besides the lamp. If this happens, contact your local dealer or a service representative. • Handle with care: jolting or scratching could cause the lamp bulb to burst during use. • Using the lamp for long periods of time, could cause it dark, not to light up or to burst. When the pictures appear dark, or when the color tone is poor, please replace the lamp as soon as possible. Do not use old (used) lamps; this is a cause of breakage.

Lamp (continued)

A lamp has a finite product life. Using the lamp for long periods of time could cause the pictures darker or the color tone poor. Note that each lamp has a different lifetime, and some may burst or burn out soon after you start using them. Preparation of a new lamp and early replacement are recommended.
To prepare a new lamp, contact your dealer and tell the lamp type number.

Type number = 456-8776.

1. Turn the projector off, and unplug the power cord. Allow the lamp to cool for at least 45 minutes.

2. Prepare a new lamp.
   If the projector is mounted on the ceiling, or if the lamp has broken, also ask the dealer to replace the lamp.

In the case of replacement by yourself,

3. Loosen the lamp cover screw (marked by arrow) and then slide the lamp cover to the side to remove it.

4. Loosen the 2 screws (marked by arrow) of the lamp, and slowly pick up the lamp by the handles.

5. Insert the new lamp, and retighten firmly the two screws that are loosened in the previous process to lock it in place.

6. Slide the lamp cover back in place and firmly fasten the lamp cover a screw.

7. Turn the projector on and reset the lamp time using the LAMP TIME function in the OPTION menu (📖*41*).

(1) Press the MENU button to display a menu. Only when the EASY MENU has appeared, please perform the next step (2).
(2) Point at the "Go to Advanced Menu …" in the menu using ▼/▲ button, then press the ► button.
(3) Point at the "OPTION" in the left column of the menu using ▼/▲ button, then press the ► button.
(4) Point at the "LAMP TIME" using ▼/▲ button, then press the ► button. A dialog will appear.
(5) Press the ▲ button to select "RESET" on the dialog. It performs resetting the lamp time.

> **NOTE** • Please reset the lamp time only when you have replaced the lamp, for a suitable indication about the lamp.

Air filter

⚠**WARNING** ►Before caring, make sure the power switch is off and the power cable is not plugged in, then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause an electric shock, a burn and/or malfunction to the projector.
►Use only the air filter of the specified type. Do not use the projector with the air filter and the filter cover removed. It could result in a fire and/or malfunction to the projector.
►The air filter should be cleaned periodically. If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn and/or malfunction to the projector.

NOTE • Please replace the air filter when it is damaged or too soiled, and also when you replace the lamp.
• Please reset the filter time only when you have cleaned or replaced the air filter, for a suitable indication about the air filter. (📖*41*)
• The projector may display the message such as "CHECK THE AIR FLOW" or turn off the projector, to prevent the internal heat level rising.

If the air filter becomes clogged by dust or the like, internal temperatures rise and could cause a fire, a burn and/or malfunction to the projector. When the indicators or a message prompts you to clean the air filter, clean the air filter as soon as possible.
Please check and clean the air filter periodically, even if there is no message. Please replace the air filter when it is damaged or too soiled. Preparation of a new air filter is recommended.
To prepare a new air filter, contact your dealer and tell the air filter type number.

   Type number = NJ22222

And also when you replace the lamp, please replace the air filter. An air filter of specified type will come together with a replacement lamp for this projector.

1. Turn the projector off, and unplug the power cord. Allow the lamp to cool for at least 45 minutes.

2. When the projector is suspended from the ceiling, apply the vacuum cleaner to and around the filter cover first, to prevent penetration of dust or the like.

3. While supporting the projector with one hand, use your other hand to pull the filter cover forward in the direction of the arrow. Remove the air filter.

Handle
Filter cover

Air filter (continued)

4. Apply a vacuum cleaner to the air filter and the filter cover. Please replace the air filter when it is damaged or too soiled.

5. Replace the air filter in its original position. Secure the air filter in place by pressing each of the six ▷ locations. Make sure there is no dust or dirt remaining after the cover is in place. If any dust or dirt remains use a vacuum cleaner to remove it as when placing the filter cover on the air filter.

   Reattach the filter cover to the projector by aligning the filter cover with the grooves on the projector. While holding the handle, push down on the filter cover until it locks firmly in place.

6. Turn the projector on and reset the filter time using the FILTER TIME function in the OPTION menu (📖*41*).

(1) Press the MENU button to display a menu. When the EASY MENU has appeared, please skip the next step (2).

(2) Point at the "OPTION" in the left column of the menu using ▼/▲ button, then press the ► button.

(3) Point at the "FILTER TIME" using ▼/▲ button, then press the ► button. A dialog will appear.

(4) Press the ▲ button to select "RESET" on the dialog. It performs resetting the filter time.
Replacing Internal Clock battery 8776-RJ Only.

Consumption of the battery makes the clock not to work correctly. When the clock is wrong or it has stopped, please replace the battery according to the following procedures.

⚠**WARNING** ►Always handle the batteries with care and use them only as directed. Battery may explode if mistreated. Do not recharge, disassemble or dispose of in fire.
And also improper use may result in cracking or leakage, which could result in fire, injury and/or pollution of the surrounding environment.
• Be sure to use only the batteries specified. Do not use batteries of different types at the same time. Do not mix a new battery with used one.
• Make sure the plus and minus terminals are correctly aligned when loading a battery.
If the battery is placed in the battery holder upside-down, it may be hard to remove.
• Keep a battery away from children and pets. If swallowed consult a physician immediately for emergency treatment.
• Do not short circuit or solder a battery.
• Do not allow a battery in a fire or water. Keep batteries in a dark, cool and dry place.
• If you observe a leakage of a battery, wipe out the flower and then replace a battery. If the liquid adheres to your body or clothes, rinse well with water immediately.
• Obey the local laws on disposing the battery.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector has cooled adequately, slowly turn over the projector, so that the bottom is facing.

3. Remove the battery cover.
Turn the battery cover in the direction indicated "OPEN" using such as coins. Then the battery cover will come up. While removing the battery cover, pick its knob.

4. Take the old battery out.
Press the metal claw of the battery holder. Then the battery will come up. Remove the battery.

5. Put a new battery in.
Replace battery with HITACHI MAXELL, Part No.CR2032 only. Use of another battery may present a risk of fire or explosion.
Insert a new battery in the battery holder according to its minus terminal ⊖ as indicated in the battery holder, so that the side marked by + is facing. And push the battery into the battery holder fully to fix.

6. Close the battery cover.
Replace the battery cover in place, then turn it in the direction indicated "CLOSE" using such as coins, to fix.

Battery Cover

OPEN

Knob

Metal claw

"+" marking

CLOSE
If the battery is placed in the battery holder upside-down, follow the procedure below to remove and reload it properly.
1. Remove the battery cover as described in steps 1 through 3 above.
2. Turn the projector over again, so that the top of the projector is facing up.
3. While lifting the side of the projector closest to the lens, press the metal claw of the battery holder. The battery will fall out of the holder, so be careful not to lose it.
4. Turn the projector over once more, so that the bottom faces up, and reload the battery correctly.

NOTE • The internal clock's time will be reset when the battery is removed.
Please reconfigure the time via the menu or a web browser after replacing the battery.
(Please refer to 📖*51* and User's Manual-Network Functions: Date/Time Settings for more information.)

Other care

> ⚠**WARNING** ►Before caring, make sure the power switch is off and the power cable is not plugged in, and then allow the projector to cool sufficiently. The care in a high temperature state of the projector could cause a burn and/or malfunction to the projector.
> ►Never try to care for the inside of the projector personally. Doing is so dangerous.
> ►Avoid wetting the projector or inserting liquids in the projector. It could result in a fire, an electric shock, and/or malfunction to the projector.
> • Do not put a container containing water, cleaner or chemicals near the projector.
> • Do not use aerosols or sprays.
> ⚠**CAUTION** ►Please take right care of the projector according to the following. Incorrect care could cause not only an injury but adverse influence such as discoloration, peeling paint, etc.
> ►Do not use cleaner or chemicals other than those listed below.
> ►Do not polish or wipe with hard objects.

Inside of the projector

In order to ensure the safe use of your projector, please have it cleaned and inspected by your dealer about once every year.

Caring for the lens

If the lens is flawed, soiled or fogged, it could cause deterioration of display quality. Please take care of the lens, being cautious of handling.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe the lens with a commercially available lens-cleaning wipe. Do not touch the lens directly with your hand.

Caring for the cabinet and remote control

Incorrect care could have adverse influence such as discoloration, peeling paint, etc.

1. Turn the projector off, and unplug the power cord. Allow the projector to cool sufficiently.

2. After making sure that the projector is cool adequately, lightly wipe with gauze or a soft cloth.
   If soiling is severe, dip soft cloth in water or a neutral cleaner diluted in water, and wipe lightly after wringing well. Then, wipe lightly with a soft, dry cloth.

Related messages

When the unit's power is on, messages such as those shown below may be displayed. When any such message is displayed on the screen, please follow the instructions described below. If the same message is displayed after the remedy, or if a message other than the following appears, please contact your dealer or service company.

Although these messages will be automatically disappeared around several minutes, it will be reappeared every time the power is turned on.

Message	Description
NO INPUT IS DETECTED ∗∗∗	**There is no input signal.** Please confirm the signal input connection, and the status of the signal source.
SYNC IS OUT OF RANGE ∗∗∗ fH ∗∗kHz fV ∗∗Hz	**The horizontal or vertical frequency of the input signal is not within the specified range.** Please confirm the specs for your projector or the signal source specs.
CHECK THE AIR FLOW	**The internal temperature is rising.** Please turn the power off, and allow the projector to cool down at least 20 minutes. After having confirmed the following items, please turn the power ON again. • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? If the same indication is displayed after the remedy, please set FAN SPEED of the SERVICE item in the OPTION menu to HIGH.
REMINDER ∗∗∗ HRS PASSED AFTER THE LAST FILTER CHECK. FILTER MAINTENANCE IS ESSENTIAL TO REMOVE WARNING MESSAGE, RESET FILTER TIMER. SEE MANUAL FURTHER INFO.	**A note of precaution when cleaning the air filter.** Please immediately turn the power off, and clean or change the air filter referring to the "Air Filter" section of this manual (📖 55). After you have cleaned or changed the air filter, please be sure to reset the filter timer (📖 41).

Regarding the indicator lamps

Lighting and flashing of the POWER indicator, the LAMP indicator, and the TEMP indicator have the meanings as described in the table below. Please follow the instructions within the table. If the same indication is displayed after the remedy, or if an indication other than the following is displayed, please contact your dealer or service company.

POWER indicator	LAMP indicator	TEMP indicator	Description
Lighting In **Orange**	Turned **off**	Turned **off**	**The projector is in a standby state.** Please refer to the section "Power On/Off".
Blinking In **Green**	Turned **off**	Turned **off**	**The projector is warming up.** Please wait.
Lighting In **Green**	Turned **off**	Turned **off**	**The projector is in an on state.** Ordinary operations may be performed.
Blinking In **Orange**	Turned **off**	Turned **off**	**The projector is cooling down.** Please wait.
Blinking In **Red**	(discretionary)	(discretionary)	**The projector is cooling down. A certain error has been detected.** Please wait until the POWER indicator finishes blinking, and then perform the proper measure using the item descriptions below.
Blinking In **Red** *or* Lighting In **Red**	Lighting In **Red**	Turned **off**	**The lamp does not light, and there is a possibility that interior portion has become heated.** Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? If the same indication is displayed after the remedy, please change the lamp referring to the section "Lamp".
Blinking In **Red** *or* Lighting In **Red**	*Blinking In* **Red**	Turned **off**	**The lamp cover has not been properly fixed.** Please turn the power off, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp cover. After performing any needed maintenance, turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.

Regarding the indicator lamps (continued)

POWER indicator	LAMP indicator	TEMP indicator	Description
Blinking In Red or Lighting In Red	Turned off	*Blinking In Red*	**The cooling fan is not operating.** Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation that no foreign matter has become caught in the fan, etc., and then turn the power on again. If the same indication is displayed after the remedy, please contact your dealer or service company.
Blinking In Red or Lighting In Red	Turned off	Lighting In Red	**There is a possibility that the interior portion has become heated.** Please turn the power off, and allow the projector to cool down at least 20 minutes. After the projector has sufficiently cooled down, please make confirmation of the following items, and then turn the power on again. • Is there blockage of the air passage aperture? • Is the air filter dirty? • Does the peripheral temperature exceed 35°C? If the same indication is displayed after the remedy, please set FAN SPEED of the SERVICE item in the OPTION menu to HIGH.
Lighting In Green	Simultaneous *blinking in Red*		**It is time to clean the air filter.** Please immediately turn the power off, and clean or change the air filter referring to the section "Air Filter". After cleaning or changing the air filter, please be sure to reset the filter timer. After the remedy, reset the power to ON.
Lighting In Green	Alternative *blinking in Red*		**There is a possibility that the interior portion has become overcooled.** Please use the unit within the usage temperature parameters (5°C to 35°C). After the treatment, reset the power to ON.
Blinking in Green for approx. 3 seconds	Turned off	Turned off	**At least 1 "Power ON" schedule is saved to the projector.** (Please refer to the User's Manual-Network Functions: Schedule Settings for more information.)

NOTE • When the interior portion has become overheated, for safety purposes, the power source is automatically turned off, and the indicator lamps may also be turned off. In such a case, press the "○" (OFF) side of the power switch, and wait at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.

Phenomena that may be easy to be mistaken for machine defects

⚠**WARNING** ►Never use the projector if abnormal operations such as smoke, strange odor, excessive sound, damaged casing or elements or cables, penetration of liquids or foreign matter, etc. should occur. In such cases, immediately turn off the power switch and then disconnect the power plug from the power outlet. After making sure that the smoke or odor has stopped, contact your dealer or service company.

1. Before requesting repair, please check in accordance with the following chart. This operation sometimes resolves your problem.

If the situation cannot be corrected,
2. The projector's microprocessor may need to be reset. Please push the Restart switch by using a cocktail stick or similar and the projector will restart.

3. Some setting may be wrong. Please use the FACTORY RESET function of the SERVICE item in the OPTION menu (📖*43*) to reset all settings to factory default.

Then, if the problem is not removed after the remedy, please contact your dealer or service company.

Phenomenon	Cases not involving a machine defect	Reference page
Power does not come on.	**The electrical power cord is not plugged in.** Correctly connect the power cord.	14
	The power switch is not set to the on position. Set the power switch to [	] (On).	17
	The main power source has been interrupted during operation such as by a power outage (blackout), etc. Please turn the power off, and allow the projector to cool down at least 2 minutes, then turn the power on again.	17
	Either there is no lamp and/or lamp cover, or either of these has not been properly fixed. Please turn the power off, and allow the projector to cool down at least 45 minutes. After the projector has sufficiently cooled down, please make confirmation of the attachment state of the lamp and lamp cover, and then turn the power on again.	53, 54
Neither sounds nor pictures are outputted.	**The signal cables are not correctly connected.** Correctly connect the connection cables.	12, 13
	Signal source does not correctly work. Correctly set up the signal source device by referring to the manual of the source device.	–
	The input changeover settings are mismatched. Select the input signal, and correct the settings.	18, 19

Phenomena that may be easy to be mistaken for machine defects (continued)

1400 x 1050	65.2	60.0	VESA	SXGA+ (60Hz)

NOTE • Be sure to check jack type, signal level, timing and resolution before connecting this projector to a computer.
• Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
• Depending on the input signal, full-size display may not be possible in some cases. Refer to the number of display pixels above.
• Although the projector can display signals with resolution up to UXGA (1600x1200), the signal will be converted to the projector's panel resolution before being displayed. The best display performance will be achieved if the resolutions of the input signal and projector panel are identical.
• Automatically adjustment may not function correctly with some input signals.
• The image may not be displayed correctly when the input sync signal is a composite sync or a sync on G.

RS-232C Communication

CONTROL port
of the projector

RS-232C cable (Cross)

RS-232C port
of the computer

```
      - (1)              (1) CD
  RD (2)─────────────(2) RD
  TD (3)──────\ /────(3) TD
      - (4)    X       (4) DTR
 GND (5)──────────────(5) GND
      - (6)           (6) DSR
 RTS (7)──────\ /────(7) RTS
 CTS (8)──────X──────(8) DTS
      - (9)           (9) RI
```
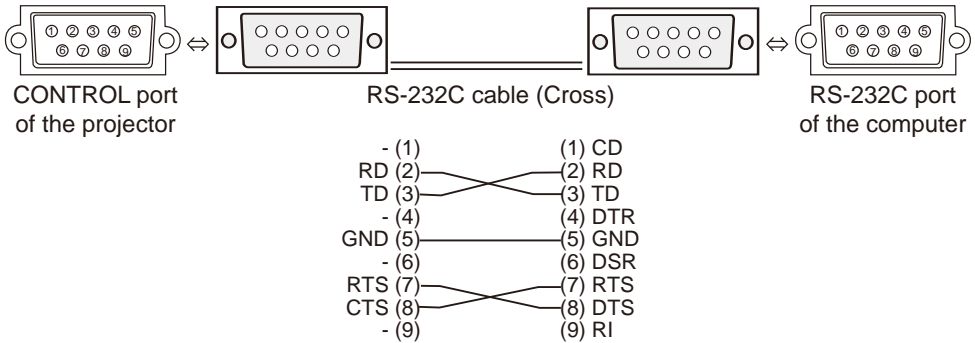

Connecting the cable

1. Turn off the projector and the computer.

2. Connect the CONTROL port of the projector with a RS-232C port of the computer by a RS-232C cable (cross). Use the cable that fulfills the specification shown in the previous page.

3. Turn the computer on, and after the computer has started up turn the projector on.

Communications setting

19200bps, 8N1

1. Protocol

Consist of header (7 bytes) + command data (6 bytes).

2. Header

BE + EF + 03 + 06 + 00 + CRC_low + CRC_high
CRC_low : Lower byte of CRC flag for command data
CRC_high : Upper byte of CRC flag for command data

3. Command data

Command data chart

byte_0	byte_1	byte_2	byte_3	byte_4	byte_5
Action		Type		Setting code	
low	high	low	high	low	high

Action (byte_0 - 1)

Action	Classification	Content
1	SET	Change setting to desired value.
2	GET	Read projector internal setup value.
4	INCREMENT	Increment setup value by 1.
5	DECREMENT	Decrement setup value by 1.
6	EXECUTE	Run a command.

7

Requesting projector status (Get command)
(1) Send the request code Header + Command data ('02H'+'00H'+ type (2 bytes)+ '00H' +'00H') from the computer to the projector.
(2) The projector returns the response code '1DH'+ data (2 bytes) to the computer.

Changing the projector settings (Set command)
(1) Send the setting code Header + Command data ('01H'+'00H'+ type (2 bytes) + setting code (2 bytes)) from the computer to the projector.
(2) The projector changes the setting based on the above setting code.
(3) The projector returns the response code '06H' to the computer.

Using the projector default settings (Reset Command)
(1) The computer sends the default setting code Header + Command data ('06H'+ '00H' + type (2 bytes) +'00H'+'00H') to the projector.
(2) The projector changes the specified setting to the default value.
(3) The projector returns the response code '06H' to the computer.

Increasing the projector setting value (Increment command)
(1) The computer sends the increment code Header + Command data ('04H'+ '00H'+ type (2 bytes) +'00H'+'00H') to the projector.
(2) The projector in creases the setting value on the above setting code.
(3) The projector returns the response code '06H' to the computer.

Decreasing the projector setting value (Decrement command)
(1) The computer sends the decrement code Header + Command data ('05H'+ '00H'+ type (2 bytes) +'00H' + '00H') to the projector.
(2) The projector decreases the setting value on the above setting code.
(3) The projector returns the response code '06H' to the computer.

When the projector cannot understand the received command
When the projector cannot understand the received command, the error code '15H' is sent back to the computer.
Sometimes the projector cannot properly receive the command. In such a case, the command is not executed and the error code '15H' is sent back to the computer. If this error code is returned, send the same command again.

When the projector cannot execute the received command.
When the projector cannot execute the received command, the error code '1CH' + 'xxxxH' is sent back to the computer. When the data length is greater than indicated by the data length code, the projector ignore the excess data code.
Conversely when the data length is shorter than indicated by the data length code, an error code will be returned to the computer.

NOTE • Operation cannot be guaranteed when the projector receives an undefined command or data.
• Provide an interval of at least 40ms between the response code and any other code.
• The projector outputs test data when the power supply is switched ON, and when the lamp is lit. Ignore this data.
• Commands are not accepted during warm-up.

8

Projector

8776-RJ Only

User's Manual – Network Functions
This manual is only intended to explain Network Functions.

⚠**WARNING** • Before using the network functions, read the User's Manual carefully to ensure your projector is set up correctly.
• After reading, keep the manuals in a safe place for future reference.

NOTE • The information in this manual is subject to change without notice.
• The manufacturer assumes no responsibility for any errors that may appear in this manual.
• The reproduction, transfer or copy of all or any part of this document is not permitted without express written consent.

Contents

Network Functions   8776-RJ Only.

This projector is equipped with the following network functions.

Configuring and Controlling the Projector via a Web Browser

You can change the settings of or control the projector via a network by using a web browser from a PC that is connected to the same network.
(📖*4*)

Failure & Warning Alerts via E-mail

The projector can automatically send an alert to specified e-mail addresses when the projector requires maintenance or has encountered an error.
(📖*26*)

Projector Management via SNMP

This projector is SNMP (Simple Network Management Protocol) compliant, allowing you to monitor it from a remote location using SNMP software. In addition, the projector is able to send failure & warning alerts to a specified PC.
(📖*28*)

Controlling the Projector via Scheduling

You can schedule the projector to perform various functions according to the DATE and TIME.
(📖*29*)

Still Image Transfer

The projector can display still images that are transferred via the network.
(📖*32*)

Projector Control via RS-232C via the Network

The projector can be controlled using RS-232C commands over a network.
(📖*34*)

Before using the network functions...

To use the network functions of this projector, the projector must be configured to suit your network. Consult with your network administrator before connecting the projector to your network. Incorrect network configuration of this projector may cause problems on your network.

Connect to the Gateway (The router/PC that forwards traffic to a destination outside of the subnet of the transmitting device) from the network terminal on the projector using a CAT-5 cable and configure the following settings.

If using a network with DHCP enabled:

The projector's network settings can be configured automatically. when **[DHCP]** on the network menu is set to **[TURN ON]**. Please refer to DHCP in network menu. If a fixed / static IP address is required, please configure your projector according to the steps in the following section.

If using a network system that does not have DHCP enabled or if using a fixed IP address on a network system equipped with DHCP enabled:

Configure the following settings on the network menu.

1. **[DHCP]**: Disable DHCP (Set **[DHCP]** to **[TURN OFF]**).

2. **[IP ADDRESS]**: Enter an appropriate IP address for the projector to connect to your network.

3. **[SUBNET MASK]**: Enter an appropriate SUBNETMASK for the projector to connect to your network.

4. **[DEFAULT GATEWAY]**: Enter an appropriate Gateway (the router/PC that forwards traffic to a destination outside of the subnet of the transmitting device) address for the projector to connect to your network.

3

Configuring and controlling the projector via a web browser

You can adjust or control the projector via a network from a web browser on a PC that is connected to the same network.

NOTE • Internet Explorer 5.5 or higher or Netscape 6.2 or higher are required.
• If JavaScript is disabled in your web browser configuration, you must enable JavaScript in order to use the projector web pages properly. See the Help files for your web browser for details on how to enable JavaScript.
• This projector is SSL (Secure Socket Layer) compliant. Please specify "https://" when the entering the projector address.
• If no operations are performed via a web browser for approx. 50 seconds the system will automatically log off. Please Re-log on to continue operations via a web browser.
• After you logon, a small, blank window will appear behind the main operation window. Please do not close this small, blank window. If this window is closed, the system will automatically log off after certain period of time even if an operation is being performed.
The small, blank window will close when the main operation window is closed.
• The small, blank window may be considered a pop-up and be blocked if you are using Windows XP Service Pack 2, or using other security software.
If Service Pack 2 blocks the window the following message will appear:
"Pop-up blocked. To see this pop-up or additional options click here..."
Please select "Temporarily Allow Pop-ups" or "Always Allow Pop-ups From This Site..." to allow the window to open.
• It is recommended that all web browser updates be installed. It is especially recommended that all users running Internet Explorer on a Microsoft Windows version prior to Windows XP Service Pack 2 install security update Q832894 (MS04-004) or the web browser interface may not be displayed correctly.
And when using an older version of Internet Explorer, during operations the browser will log out after 50 seconds.

4

Configuring and controlling the projector via a web browser (Continued)

When configuring or controlling the projector via a web browser, an ID and password are required. There are two types of IDs, Administrator IDs and User IDs. The following chart describes the differences between user and administrator IDs.

Item	Description	Administrator ID	User ID
Network Information	Displays the projector's current network configuration settings.	√	√
Network Settings	Displays and configures network settings.	√	N/A
Port Settings	Displays and configures communication port settings.	√	N/A
Mail Settings	Displays and configures e-mail addressing settings.	√	N/A
Alert Settings	Displays and configures failure & warning alerts.	√	N/A
Schedule Settings	Displays and configures schedule settings.	√	N/A
Date/Time Settings	Displays and configures the date and time settings.	√	N/A
Security Settings	Displays and configures passwords and other security settings.	√	N/A
Projector Control	Controls the projector.	√	√
Projector Status	Displays and configures the current projector status.	√	√
Network Restart	Restarts the projector's network connection.	√	N/A

Below are the factory default settings for administrator IDs, user IDs and passwords.

Item	ID	Password
Administrator ID	Administrator	<blank>
User ID	User	<blank>

5

Settings

Refer to the following for configuring or controlling the projector via a web browser.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter
   [https://192.168.1.10] into the
   address bar of the web browser and
   the screen in Fig. 1 will be displayed.
2) Enter your ID and password and click
   [Logon].

Fig. 1
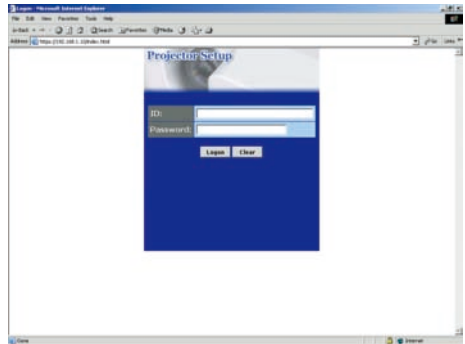

If the logon is successful either the Fig.2 or Fig.3 screen will be displayed.

Fig. 2 (Logon with administrator ID)
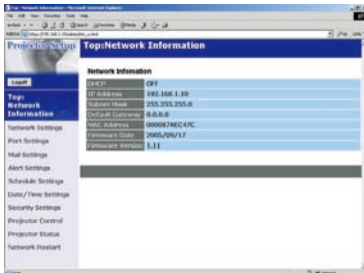

Fig. 3 (Logon with user ID)
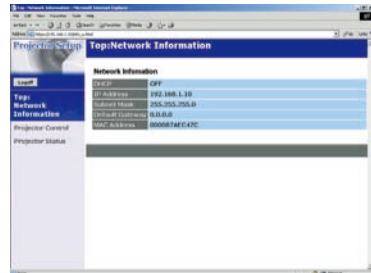

3) Click the desired operation or configuration item on the main menu located on
   the left-hand side of the screen (Fig. 2 or Fig. 3).

Network Information
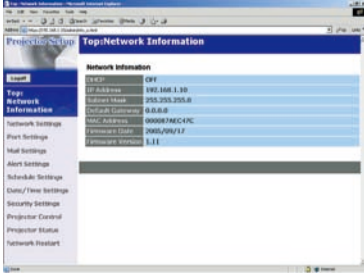

All screen images displayed in this manual are screens of a logon using an administrator ID. Any administrator only functions will not be displayed when using a user ID. Refer to the descriptions in each table.

Displays the projector's current network configuration settings.

Item	Description
DHCP	Displays the DHCP configuration settings.
IP Address	Displays the current IP address.
Subnet Mask	Displays the Subnet Mask.
Default Gateway	Displays the Default Gateway.
MAC Address	Displays the MAC address.
Firmware Date	Displays the network firmware time stamp. This information is only displayed when logged on using an administrator ID.
Firmware Version	Displays the network firmware version number. This information is only displayed when logged on using an administrator ID.

7

Network Settings

Displays and configures network settings.

Item			Description
IP Configuration			Configures network settings.
	DHCP ON		Enables DHCP.
	DHCP OFF		Disables DHCP.
		IP Address	Configures the IP address when DHCP is disabled.
		Subnet Mask	Configures the Subnet Mask when DHCP is disabled.
		Default Gateway	Configures the Default Gateway when DHCP is disabled.
Projector Name			Configures the Projector name.
SysLocation			Configures the location to be referred to when using SNMP.
SysContact			Configures the contact information to be referred to when using SNMP.

Click the **[Apply]** button to save the settings.

> **NOTE** • The new configuration settings are activated after restarting the network connection. When the configuration settings are changed, you must restart the network connection. You can restart the network connection by clicking **[Network Restart]** on the main menu.
> • If you connect the projector to an existing network, consult a network administrator before setting server addresses.

Port Settings
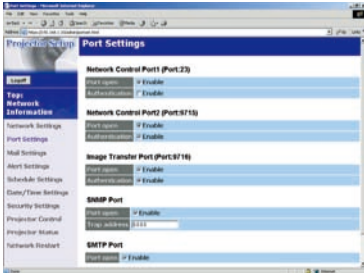

Displays and configures communication port settings.

Item	Description
Network Control Port1 (Port:23)	Configures command control port 1 (Port:23).
Port open	Click the **[Enable]** check box to use port 23.
Authentication	Click the **[Enable]** check box when authentication is required for this port.
Network Control Port2 (Port:9715)	Configures command control port 2 (Port:9715).
Port open	Click the **[Enable]** check box to use port 9715.
Authentication	Click the **[Enable]** check box when authentication is required for this port.
Image Transfer Port (Port:9716)	Configures the image transfer port (Port:9716).
Port open	Click the **[Enable]** check box to use port 9716.
Authentication	Click the **[Enable]** check box when authentication is required for this port.
SNMP Port	Configures the SNMP port.
Port open	Click the **[Enable]** check box to use SNMP.
Trap address	Configures the destination of the SNMP Trap in IP format.
SMTP Port	Configures the SMTP port.
Port open	Click the **[Enable]** check box to use the e-mail function.

Click the **[Apply]** button to save the settings.

NOTE • The new configuration settings are activated after restarting the network connection. The network connection must be restarted when the configuration settings are changed. The network connection can be restarted using **[Network Restart]** on the main menu.dresses.

9
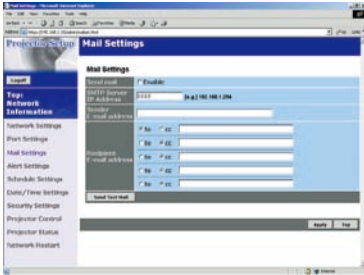

Mail Settings

Displays and configures e-mail addressing settings.

Item	Description
Send Mail	Click the **[Enable]** check box to use the e-mail function. Configure the conditions for sending email under **[Alert Settings]**.
SMTP Server IP Address	Configures the address of the mail server in IP format.
Sender E-mail address	Configures the sender e-mail address. The length of the sender e-mail address can be up to 255 alphanumeric characters.
Recipient E-mail address	Configures the e-mail address of up to five recipients. You can also specify **[TO]** or **[CC]** for each address. The length of the recipient e-mail address can be up to 255 alphanumeric characters.

Click the **[Apply]** button to save the settings.

NOTE • You can confirm whether the mail settings work correctly using the [Send Test Mail] button.
• If you connect the projector to an existing network, consult a network administrator before setting server addresses.

Alert Settings
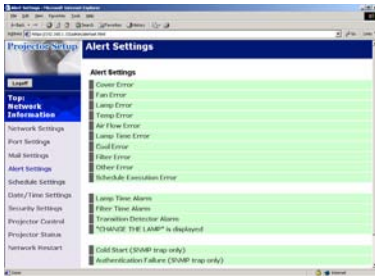

Displays and configures failure & warning alerts.

Item		Description
Cover Error		Configures Cover Error alert settings.
	SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
	Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
	Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
	Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Fan Error		Configures Fan Error alert settings.
	SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
	Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
	Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
	Mail Text	Configures the text of the e- mail to be sent. The length of the text can be up to 1024 alphanumeric characters.

Alert Settings (Continued)

Item	Description
Lamp Error	Configures Lamp Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Temp Error	Configures Temp Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Air Flow Error	Configures Air Flow Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.

Alert Settings (Continued)

Item	Description
Lamp Time Error	Configures Lamp Time Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Cool Error	Configures Cool Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Filter Error	Configures Filter Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.

Alert Settings (Continued)

| Item	Description
Other Error	Configures Other Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Schedule Execution Error	Configures Schedule Execution Error alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable**] check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Lamp Time Alarm	Configures Lamp Time Alarm alert settings.
Alarm Time	Configures the lamp time to alert.
SNMP Trap	Click the **[Enable**] check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.

Alert Settings (Continued)

Item	Description
Filter Time Alarm	Configures Filter Time Alarm alert settings.
Alarm Time	Configures the filter time to alert.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Transition Detector Alarm	Configures Transition Detector Alarm alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
"CHANGE THE LAMP" is displayed	Configures alert settings for when "CHANGE THE LAMP" is displayed.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Send Mail	Click the **[Enable]** check box to enable e-mail alerts for this item.
Mail Subject	Configures the subject line of the e-mail to be sent. The length of the subject line can be up to 255 alphanumeric characters.
Mail Text	Configures the text of the e-mail to be sent. The length of the text can be up to 1024 alphanumeric characters.
Cold Start	Configures Cold Start alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.
Authentication Failure	Configures Authentication Failure alert settings.
SNMP Trap	Click the **[Enable]** check box to enable SNMP Trap alerts for this item.

Click the **[Apply]** button to save the settings.

Schedule Settings

Displays and configures schedule settings.

Item		Description
Daily		Configures the daily schedule.
	Schedule	Click the **[Enable]** check box to enable daily scheduling.
	Schedule List	Displays the current daily schedule.
Sunday		Configures the Sunday schedule.
	Schedule	Click the **[Enable]** check box to enable Sunday scheduling.
	Schedule List	Displays the current Sunday schedule.
Monday		Configures the Monday schedule.
	Schedule	Click the **[Enable]** check box to enable Monday scheduling.
	Schedule List	Displays the current Monday schedule.
Tuesday		Configures the Tuesday schedule.
	Schedule	Click the **[Enable]** check box to enable Tuesday scheduling.
	Schedule List	Displays the current Tuesday schedule.
Wednesday		Configures the Wednesday schedule.
	Schedule	Click the **[Enable]** check box to enable Wednesday scheduling.
	Schedule List	Displays the current Wednesday schedule.
Thursday		Configures the Thursday schedule.
	Schedule	Click the **[Enable]** check box to enable Thursday scheduling.
	Schedule List	Displays the current Thursday schedule.
Friday		Configures the Friday schedule.
	Schedule	Click the **[Enable]** check box to enable Friday scheduling.
	Schedule List	Displays the current Friday schedule.
Saturday		Configures the Saturday schedule.
	Schedule	Click the **[Enable]** check box to enable Saturday scheduling.
	Schedule List	Displays the current Saturday schedule.

Schedule Setting (Continued)

Item		Description
Specific date No1		Configures the specific date (No.1) schedule.
	Schedule	Click the **[Enable]** check box to enable specific date (No.1) scheduling.
	Month/Day	Configures the Month and date.
	Schedule List	Displays the current specific date (No.1) schedule.
Specific date No.2		Configures the specific date (No.2) schedule.
	Schedule	Click the **[Enable]** check box to enable specific date (No.2) scheduling.
	Month/Day	Configures the Month and date.
	Schedule List	Displays the current specific date (No.2) schedule.
Specific date No.3		Configures the specific date (No.3) schedule.
	Schedule	Click the **[Enable]** check box to enable specific date (No.3) scheduling.
	Month/Day	Configures the Month and date.
	Schedule List	Displays the current specific date (No.3) schedule.
Specific date No.4		Configures the specific date (No.4) schedule.
	Schedule	Click the **[Enable]** check box to enable specific date (No.4) scheduling.
	Month/Day	Configures the Month and date.
	Schedule List	Displays the current specific date (No.4) schedule.
Specific date No.5		Configures the specific date (No.5) schedule.
	Schedule	Click the **[Enable]** check box to enable specific date (No.5) scheduling.
	Month/Day	Set the Month and date.
	Schedule List	Displays the current specific date (No.5) schedule.

Click the **[Apply]** button to save the settings.

Schedule Setting (Continued)

To add additional functions and events click the **[Add]** button and set the following items.

Item	Description
Time	Configures the time to execute commands.
Command	Configures the commands to be executed.
Power Parameter	Configures the parameters for power control.
Input Source Parameter	Configures the parameters for input switching.
Display Image Parameter	Configures the parameters for display of transfer image data.

Click the **[Register]** button to add new commands to the Schedule List.

Click the **[Delete]** button to delete commands from the Schedule list.

Date/Time Settings
Displays and configures the date and time settings.

Item	Description
Current Date	Configures the current date in Year/Month/Day format.
Current Time	Configures the current time in Hour:Minute:Second format.

18

Date/Time Settings (Continued)

| Item			Description
Daylight Savings Time			Click the **[ON]** check box to enable daylight savings time and set the following items.
	Start		Configures the date and time daylight savings time begins.
		Month	Configures the month daylight savings time begins (1~12).
		Week	Configures the week of the month daylight savings time begins (First, 2, 3, 4, Last).
		Day	Configures the day of the week daylight savings time begins (Sun, Mon, Tue, Wed, Thu, Fri, Sat).
		Hour	Configures the hour daylight savings time begins (0 ~ 23).
		Minute	Configures the minute daylight savings time begins (0 ~ 59).
	End		Configures the date and time daylight savings time ends.
		Month	Configures the month daylight savings time ends (1 ~ 12).
		Week	Configures the week of the month daylight savings time ends (First, 2, 3, 4, Last).
		Day	Configures the day of the week daylight savings time ends (Sun, Mon, Tue, Wed, Thu, Fri, Sat).
		Hour	Configures the hour daylight savings time ends (0 ~ 23).
		Minute	Configures the minute daylight savings time ends (0 ~ 59).
Time difference			Configures the time difference (hours:minutes). Set the same time difference as the one set on your PC. If unsure, consult your network administrator.
SNTP			Click the **[ON]** check box to retrieve Date and Time information from the SNTP server and set the following items.
	SNTP Server IP Address		Configures the SNTP server address in IP format.
	Cycle		Configures the interval at which to retrieve Date and Time information from the SNTP server. (hours:minutes).

Click the **[Apply]** button to save the settings.

> **NOTE** • The new configuration settings are activated after restarting the network connection. The network connection must be restarted when the configuration settings are changed, The network connection can be restarted using **[Network Restart]** on the main menu.
> • If you connect the projector to an existing network, consult a network administrator before setting server addresses.
> • To enable the SNTP function, the time difference must be set.
> • The projector will retrieve DATE and TIME information from the Timeserver and override time settings when SNTP is enabled.
> • The Internal Clock's time may not remain accurate. Using SNTP is recommended to maintain accurate time.

Security Settings

Displays and configures passwords and other security settings.

Item		Description
Administrator authority		Configures the Administrator ID and Password.
	Administrator ID	Configures the Administrator ID. The length of the text can be up to 32 alphanumeric characters.
	Administrator Password	Configures the Administrator Password. The length of the text can be up to 255 alphanumeric characters.
	Re-enter Administrator Password	Re-enter the above password for verification.
User authority		Configures the User ID and Password.
	User ID	Configures the User ID. The length of the text can be up to 32 alphanumeric characters.
	User Password	Configures the User Password. The length of the text can be up to 255 alphanumeric characters.
	Re-enter User Password	Used to re-enter the above password for verification.

Security Settings (Continued)

Item		Description
Network Control		Configures the Authentication Password for the command control.
	Authentication Password	Configures the Authentication Password. The length of the text can be up to 16 alphanumeric characters.
	Re-enter Authentication Password	Used to re-enter the above password for verification.
SNMP		Configures the community name if SNMP is used.
	Community Name	Configures the community name. The length of the text can be up to 64 alphanumeric characters.

Click the **[Apply]** button to save the settings.

NOTE • The new configuration settings are activated after restarting the network connection. The network connection must be restarted when the configuration settings are changed. The network connection can be restarted using **[Network Restart]** on the main menu.

Projector Control

Projector Control
The items shown in the table below can be performed using the **[Projector Control]** menu.
Select an item using the up and down arrow keys on the PC.
Most of the items have a submenu.
Refer to the table below for details.

Controls the projector.

Item		Description
Main		
	Power	Turns the power On/Off.
	Input Source	Selects the input source.
	Picture Mode	Selects the Picture Mode setting.
	Blank On/Off	Turns Blank On/Off.
	Mute	Turns Mute On/Off.
	Freeze	Selects the Freeze setting.
	Magnify	Controls the Magnify setting.
Picture		
	Brightness	Adjusts the Brightness setting.
	Contrast	Adjusts the Contrast setting.
	Gamma	Selects the Gamma setting.
	Color Temp	Selects the Color Temp setting.
	Color	Adjusts the Color setting.
	Tint	Adjusts the Tint setting.
	Sharpness	Adjusts the Sharpness setting.
	MyMemory Recall	Recalls the MyMemory data.
	MyMemory Save	Saves the MyMemory data.

Projector Control (Continued)

Item	Description
Image	
Aspect	Selects the Aspect setting.
Over Scan	Selects the Over Scan setting.
V Position	Adjusts the V Position.
H Position	Adjusts the H Position.
H Phase	Adjusts the H Phase.
H Size	Adjusts the H Size.
Auto Adjust	Performs Auto Adjustment.
Input	
Progressive	Selects the progressive setting.
Video NR	Selects the Video NR setting.
Color Space	Selects the Color Space.
Component	Selects the Component terminal setting.
C-Video Format	Selects the Video Format setting.
S-Video Format	Selects the S-Video Format setting.
Frame Lock	Enables/Disables Frame Lock.
RGB in-1	Selects the RGB1 input signal type.
RGB in-2	Selects the RGB2 input signal type.
Setup	
Aoto Keystone Execute	Performs the Automatic keystone distortion correction.
Keystone	Adjusts the Keystone setting.
Whisper	Selects the Fan speed. (Normal or Whisper)
Mirror	Selects the Mirror status.
Volume	Adjusts the Volume setting.
Audio-RGB1	Assigns the Audio-RGB1 input terminal.
Audio-RGB2	Assigns the Audio-RGB2 input terminal.
Audio-Video	Assigns the Audio-Video input terminal.
Audio-S-Video	Assigns the Audio-S-Video input terminal.
Audio-Component	Assigns the Audio-Component input terminal.

Projector Control (Continued)

Item	Description
Screen	
Language	Selects the Language for the OSD.
Menu Position V	Adjusts the vertical Menu Position.
Menu Position H	Adjusts the horizontal Menu Position.
Blank	Selects the Blank mode.
Startup	Selects the Startup screen mode.
MyScreen Lock	Turns MyScreen Lock On/Off.
Message	Turns the Message function On/Off.
Option	
Auto Search	Turns the Automatic signal search function On/Off.
Auto Keystone	Turns the Automatic keystone distortion correction function On/Off.
Auto on	Turns the Auto on function On/Off.
Auto off	Configures the timer to shut off the projector when no signal is detected.
My Button-1	Assigns the functions for the MY BUTTON1 buttons on the included remote control.
My Button-2	Assigns the functions for the MY BUTTON2 buttons on the included remote control.
Auto Adjust	Enables/Disables Auto Adjustment.
Remote Freq. Normal	Enable/Disable
Remote Freq. High	Enable/Disable

Projector Status
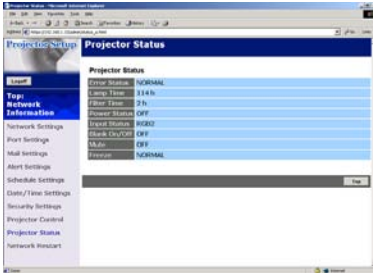

Displays and configures the current projector status.

Item	Description
Error Status	Displays the current error status
Lamp Time	Displays the usage time for the current lamp.
Filter Time	Displays the usage time for the current filter.
Power Status	Displays the current power status.
Input Status	Displays the current input signal source.
Blank On/Off	Displays the Blank On/Off status.
Mute	Displays the current Mute On/Off status.
Freeze	Displays the current Freeze On/Off status.

Network Restart
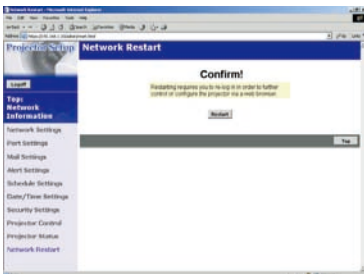

Restarts the projector's network connection.

Item	Description
Restart	Restarts the projector's network connection in order to activate new configuration settings.

NOTE • Restarting requires you to re-log on in order to further control or configure the projector via a web browser.

Logoff

When logoff is clicked, the logon screen is displayed (📖*6* : Fig. 1).

Failure & Warning Alerts via E-mail

The projector can automatically send an alert to specified e-mail addresses when the projector requires maintenance or has encountered an error.

NOTE • Up to five e-mail addresses can be specified.
• The projector may be not able to send e-mail if the projector suddenly loses power.

Mail Settings (📖*10*)

To use the projector's e-mail function please configure the following items via a web browser.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10]** into the address bar of the web browser.
2) Enter the Administrator ID and Password and click **[Logon]**.
3) Click **[Port Settings]** on the main menu.
4) Click the **[Enable]** check box to open the SMTP Port.
5) Click the **[Apply]** button to save the settings.

NOTE • A Network Restart is required after the SMTP Port configuration settings have changed. Click **[Network Restart]** and configure the following items.

6) Click **[Mail Settings]** and configure each item. Refer to the **[Mail Settings]** item in **[Configuring and Controlling the Projector via a Web Browser]** for further information.
7) Click the **[Apply]** button to save the settings.

NOTE • Click the **[Send Test Mail]** button in **[Mail Settings]** to confirm that the e-mail settings are correct. The following mail will be delivered to the specified addresses.

Subject line : Test Mail   <Projector name>
Text   : Send Test Mail
           Date   <Testing date>
           Time   <Testing time>
           IP Address   <Projector IP address>
           MAC Address   <Projector MAC address>

Mail Settings (Continued)

8) Configure the Failure/Warning Alerts via E-mail settings. Click **[Alert Settings]** on the main menu.

9) Select and configure each alert item. Refer to **[Alert Settings]** in **[Configuring and Controlling the Projector via a Web Browser]** for further information.

10) Click the **[Apply]** button to save the settings.

Failure/Warning e-mails are formatted as follows:

```
Subject line : <Mail title>    <Projector name>
Text         : <Mail text>
               Date           <Failure/Warning date>
               Time           <Failure/Warning time>
               IP Address     <Projector IP address>
               MAC Address    <Projector MAC address>
```

Projector management via SNMP

When SNMP is enabled, the projector is able to send Failure/Warning Alerts to a specified PC.

NOTE • It is recommended that SNMP functions be carried out by a network administrator.
• SNMP management software must be installed on the computer to monitor the projector via SNMP.

SNMP settings (📖*9*)

Configure the following items via a web browser to use SNMP.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10]** into the address bar of the web browser.
2) Enter the Administrator ID and Password and click **[Logon**].
3) Click **[Port Settings]** on the main menu.
4) Click the **[Enable]** check box to open the SNMP Port.
   Set the IP address to send the SNMP Trap to when a Failure/Warning occurs.

NOTE • A Network Restart is required after the SNMP Trap configuration settings have been changed. Click **[Network Restart]** and configure the following items.

5) Click **[Security Settings]** on the main menu.
6) Click **[SNMP]** and set the Community Name on the screen that is displayed.

NOTE • A Network Restart is required after the Community Name has been changed.
• Click **[Network Restart]** and configure the following items.

7) Configure the settings for Trap transmission of Failures/Warnings. Click **[Alert Settings]** on the main menu and select the Failure/Warning item to be configured.
8) Click the **[Enable]** check box to send out the SNMP trap for Failures/Warnings. Clear the **[Enable]** check box when SNMP trap transmission is not required.
9) Click the **[Apply]** button to save the settings.

Controlling the Projector via Scheduling
The projector can be automatically controlled via scheduling.

> **NOTE** • You can schedule the following control events: Power ON/OFF, Input Source and Transferred Image Display.
> • There are 3 types of Scheduling, 1) daily 2) day of the week 3) specific date.
> • The priority for scheduled events is as follows 1) specific date 2) day of the week 3) daily.
> • Up to five specific dates are available for scheduled events. Priority is given to those with the lower numbers when more than one event has been scheduled for the same date and time (e.g., 'Specific day No. 1' has priority over 'Specific day No. 2' and so on.
> • Be sure to set the date and time before enabling scheduled events.

Date/Time Settings (□*18*)

The Date/Time setting can be adjusted via a web browser.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10]** into the address bar of the web browser.
   Enter the Administrator ID and Password and click **[Logon]**.
2) Click **[Date/Time Settings]** on the main menu and configure each item.
   Refer to the **[Date/Time Settings]** item in **[Configuring and Controlling the
   Projector via a Web Browser]** for further information.
3) Click the **[Apply]** button to save the settings.
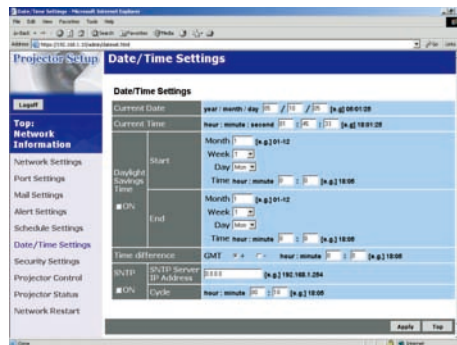

NOTE • A Network Restart is required after the Daylight Savings Time or
SNTP configuration settings have been changed.
• The battery for the built in clock may be dead if the clock loses time even
when the DATE and TIME have been set correctly. Replace the battery by
following the instructions on replacing the battery.
(□*User's Manual - Operating Guide : Replacing Internal Clock battery*)
• The Internal Clock's time may not remain accurate. Using SNTP is
recommended to maintain accurate time.

Schedule Settings   (📖*16*)

Schedule settings can be configured from a web browser.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10**] into the address bar of the web browser.
2) Enter the Administrator ID and Password and click **[Logon]**.
3) Click **[Schedule Settings]** on the main menu and select the required schedule item.
4) Click the **[Enable]** check box to enable scheduling.
5) Enter the Date (Month/Day) for specific date scheduling.
6) Click **[Add]** and set the hour, command and parameters and click **[Add This Schedule]** when you want to add a command.
7) Click the **[Delete]** button when you want to delete a schedule.
8) Click the **[Apply]** button to save the settings.

There are three types of scheduling.
1) Daily: Perform the specified operation at a specified time every day.
2) Sunday ~ Saturday: Perform the specified operation at the specified time on a specified day of the week.
3) Specific Date: Perform the specified operation on the specified date and time.

NOTE • In Standby mode the power indicator will flash green for approx. 3 seconds when at least 1 "Power ON" schedule is saved.
• When the schedule function is used, the power cord must be connected to the projector and the outlet and the power switch must be turned on, [|]. The schedule function does not work when the power switch is turned off, [○] or the breaker in a room is tripped. The power indicator will lights orange or green when the projector gets is receiving the power.

e-Shot (Still Image Transfer) Display
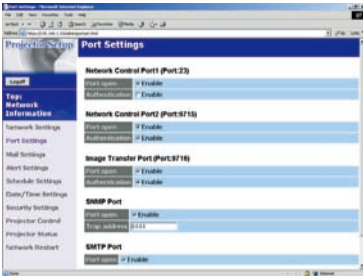

The projector can display a still image that is transferred via the network.

Communication Port

The following port is used for e-Shot.
    TCP #9716
(🕮9)

> **NOTE** • e-Shot is not available via communication ports which are used for the command control (TCP #23 and TCP #9715).

e-Shot (Still Image Transfer) Settings

Configure the following items from a web browser when e-Shot is used.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10]** into the address bar of the web browser.
2) Enter the Administrator ID and Password and click **[Logon]**.
3) Click **[Port settings]** on the main menu.
4) Click the **[Enable]** check box to open the **[Image Transfer Port (Port: 9716)]**. Click the **[Enable]** check box for the **[Authentication]** setting when authentication is required, otherwise clear the check box.
5) Click the **[Apply]** button to save the settings.
e-Shot (Still Image Transfer) Settings (Continued)

When the authentication setting is enabled, the following settings are required.

6) Click **[Security Settings]** on the main menu.
7) Select **[Network Control]** and enter the desired authentication password. *
   see Note1
8) Click the **[Apply]** button to save the settings. * see Note2

NOTE1 • The Authentication Password will be the same for **[Network Control Port1 (Port: 23)]**, **[Network Control Port2 (Port: 9715)]**, and **[Image Transfer Port (Port: 9716)]**.

NOTE2 • The new configuration settings are activated after restarting the network. Restart the network connection when any configuration settings are changed. The network connection can be restarted using **[Network Restart]** on the main menu.

---

e-Shot (Still Image Transfer) Transmission

e-Shot transmission requires an exclusive application for your PC. You can download it from the Hitachi web site. Refer to the manual for the application for instructions.

Command Control via the Network
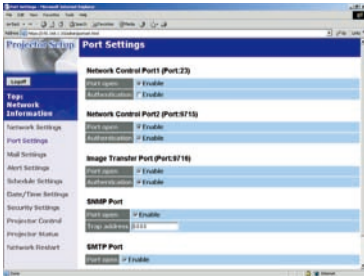

You can configure and control the projector via the network using RS-232C commands.

Communication Port

The following two ports are assigned for the command control.

TCP #23
TCP #9715

NOTE • Command control is not available via communication port (TCP #9716) that is used for the e-Shot transmission function.

Command Control Settings (📖*9*)

Configure the following items from a web browser when command control is used.
Example: If the IP address of the projector is set to 192.168.1.10:

1) Enter **[https://192.168.1.10]** into the address bar of the web browser.
2) Enter the Administrator ID and Password and click **[Logon]**.
3) Click **[Port settings]** on the main menu.
4) Click the **[Enable]** check box to open **[Network Control Port (Port: 23)]** to use TCP #23. Click the **[Enable]** check box for the **[Authentication]** setting when authentication is required, otherwise clear the check box.
5) Click the **[Enable]** check box to open **[Network Control Port (Port: 9715)]** to use TCP #9715. Click the **[Enable]** check box for the **[Authentication]** setting when authentication is required, otherwise clear the check box.
6) Click the **[Apply]** button to save the settings.

Command Control Settings (Continued)

When the authentication setting is enabled, the following settings are required.
(📖*20*)

7) Click **[Security Settings]** on the main menu.
8) Click **[Network Control]** and enter the desired authentication password. * See Note1.
9) Click the **[Apply]** button to save the settings. * See Note2.

NOTE1 • The Authentication Password will be the same for **[Network Control Port1 (Port: 23)]**, **[Network Control Port2 (Port: 9715)]**, and **[Image Transfer Port (Port: 9716)]**.

NOTE2 • The new configuration settings are activated after restarting the network. Restart the network when any configuration settings are changed.
The network connection can be restarted using **[Network Restart]** on the main menu.

35

Command format

Command formats differ among the different communication ports.

TCP #23

You can use the RS-232C commands without any changes. The reply data format is the same as the RS-232C commands. However, the following reply will be sent back in the event of authentication failure when authentication is enabled.

<Reply in the event of an authentication error>

Reply	Error code	
0x1F	0x04	0x00

TCP #9715

Send Data format

The following formatting is added to the header (0x02), Data length (0x0D), Checksum (1byte) and Connection ID (1 byte) of the RS-232C commands.

Header	Data length	RS-232Ccommand	Checksum	Connection ID
0x02	0x0D	13 bytes	1 byte	1 byte

Header   → 0x02, Fixed
Data length   → RS-232C commands byte length (0x0D, Fixed)
RS-232C commands → RS-232C commands that start with 0xBE 0xEF (13 bytes)
Check Sum   → This is the value to make zero on the addition of the lower 8 bits from the header to the checksum.
Connection ID   → Random value from 0 to 255 (This value is attached to the reply data)

Reply Data format

The connection ID (the data is same as the connection ID data on the sending data format) is attached to the RS-232C commands reply data.

\<ACK reply>

Reply	Connection ID
0x06	1 byte

\<NAK reply>

Reply	Connection ID
0x15	1 byte

\<Error reply>

Reply	Error code	Connection ID
0x1C	2 bytes	1 byte

\<Data reply>

Reply	Data	Connection ID
0x1D	2 bytes	1 byte

\<Projector busy reply>

Reply	Status code	Connection ID
0x1F	2 bytes	1 byte

\<Authentication error reply>

Reply	Authentication Error code		Connection ID
0x1F	0x04	0x00	1 byte

Automatic Connection Break

The TCP connection will be automatically disconnected after there is no communication for 30 seconds after being established.

Authentication

The projector does not accept commands without authentication success when authentication is enabled. The projector uses a challenge response type authentication with an MD5 (Message Digest 5) algorithm.
When the projector is using a LAN, a random eight bytes will be returned if authentication is enabled. Bind this received 8 bytes and the authentication password and digest this data with the MD5 algorithm and add this in front of the commands to send.

Following is a sample if the authentication password is set to "password" and the random eight bytes are "a572f60c".

1) Select the projector.
2) Receive the random eight bytes "a572f60c" from the projector.
3) Bind the random eight bytes "a572f60c" and the authentication password "password" and it becomes "a572f60cpassword".
4) Digest this bind "a572f60cpassword" with MD5 algorithm.
   It will be "e3d97429adffa11bce1f7275813d4bde".
5) Add this "e3d97429adffa11bce1f7275813d4bde" in front of the commands and send the data.
   Send "e3d97429adffa11bce1f7275813d4bde"+command.
6) When the sending data is correct, the command will be performed and the reply data will be returned. Otherwise, an authentication error will be returned.
