Important Safety Information

/! Important:

It is strongly recommended that you read this section carefully before using the projector. These safety and usage instructions will ensure that you enjoy many years of safe use of the projector. *Keep this manual for future reference.*

Symbols Used

Warning symbols are used on the unit and in this manual to alert you of hazardous situations.

The following styles are used in this manual to alert you to important information.

Note:

Provides additional information on the topic at hand.

/!\ Important:

Provides additional information that should not be overlooked.

Caution:

Alerts you to situations that may damage the unit.

Alerts you to situations that may damage the unit, create a hazardous environment, or cause personal injury.

Throughout this manual, component parts and items in the OSD menus are denoted in bold font as in this example:

"Push the Menu button on the remote control to open the Main menu."

General Safety Information

- Do not open the unit case. Aside from the projection lamp, there are no user-serviceable parts in the unit. For servicing, contact qualified service personnel.
- > Follow all warnings and cautions in this manual and on the unit case.
- The projection lamp is extremely bright by design. To avoid damage to eyes, do not look into the lens when the lamp is on.
- > Do not place the unit on an unstable surface, cart, or stand.
- > Avoid using the system near water, in direct sunlight, or near a heating device.
- > Do not place heavy objects such as books or bags on the unit.

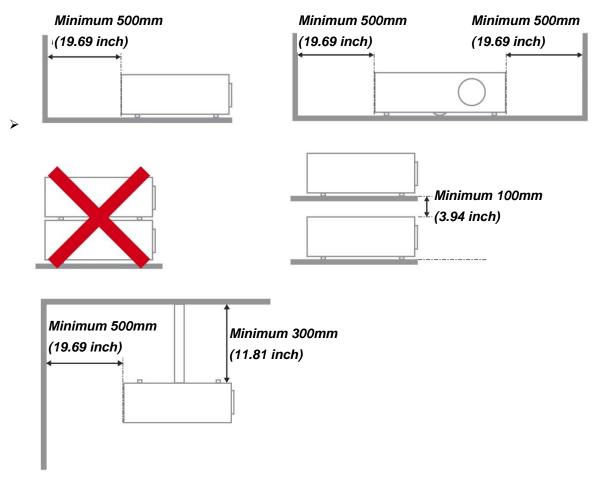

Projector Installation Notice

> Place the projector in a horizontal position

The tilt angle of the projector should not exceed 15 degrees. In addition, the projector should not be installed in any other way except desktop and ceiling mount positions. Otherwise lamp life could decrease dramatically, and may lead to other **unpredictable damage**.

> Allow at least 50 cm (16.69 inch) clearance around the exhaust vent.

- > Ensure that the intake vents do not recycle hot air from the exhaust vent.
- When operating the projector in an enclosed space, ensure that the surrounding air temperature within the enclosure does not exceed operation temperature while the projector is running, and the air intake and exhaust vents are unobstructed.
- All enclosures should pass a certified thermal evaluation to ensure that the projector does not recycle exhaust air, as this may cause the device to shutdown even if the enclosure temperature is with the acceptable operation temperature range.

Power Safety

- > Only use the supplied power cord.
- Do not place anything on the power cord. Place the power cord where it will not be in the way of foot traffic.
- > Remove the batteries from the remote control when storing or not in use for a prolonged period.

Replacing the Lamp

Replacing the lamp can be hazardous if done incorrectly. See *Replacing the Projection Lamp* on page 43 for clear and safe instructions for this procedure. Before replacing the lamp:

- > Unplug the power cord.
- > Allow the lamp to cool for about one hour.

Cleaning the Projector

- > Unplug the power cord before cleaning. See *Cleaning the Projector* page 46.
- > Allow the lamp to cool for about one hour.

Regulatory Warnings

Before installing and using the projector, read the regulatory notices in the *Regulatory Compliance* on page 60.

Important Recycle Instructions:

Lamp(s) inside this product contain mercury. This product may contain other electronic waste that can be hazardous if not disposed of properly. Recycle or dispose in accordance with local, state, or federal Laws. For more information, contact the Electronic Industries Alliance at <u>WWW.EIAE.ORG</u>. For lamp specific disposal information check <u>WWW.LAMPRECYCLE.ORG</u>.

Symbol Explanations

DISPOSAL: Do not use household or municipal waste collection services for disposal of electrical and electronic equipment. EU countries require the use of separate recycling collection services.

About this Manual

This manual is intended for end users and describes how to install and operate the DLP projector. Wherever possible, relevant information—such as an illustration and its description—has been kept on one page. This printer-friendly format is both for your convenience and to help save paper, thereby protecting the environment. It is suggested that you only print sections that are relevant to your needs.

GETTING STARTED

Packing Checklist

Carefully unpack the projector and check that the following items are included:

CD-ROM (This User's manual)

QUICK START GUIDE

SAFETY & WARRANTY BOOKLET

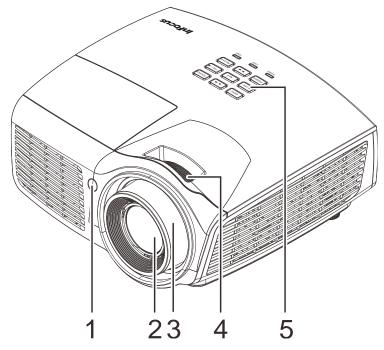

Contact your dealer immediately if any items are missing, appear damaged, or if the unit does not work. It is recommended that you keep the original packing material in case you ever need to return the equipment for warranty service.

Do not place the project in direct sunlight, humid, greasy or dusty places or in places where the projector may come into contact with smoke or steam.

14.	AUDIO IN	Connect an AUDIO cable from an audio device.	
15.	AUDIO OUT	Connect an AUDIO cable to an audio amplifier.	

16.	DC 12V TRIGGER	When connected to the screen through a commercially available cable, the screen deploys automatically on start up of the projector. The screen retracts when the projector is powered off (see notes below).
		retracts when the projector is powered off (see notes below).

DC12V Trigger Note:

- To use this feature, you must plug in the connector before turning on/off the projector.
- Screen controllers are supplied and supported by screen manufacturers.
- Do not use this jack for anything other than intended use.

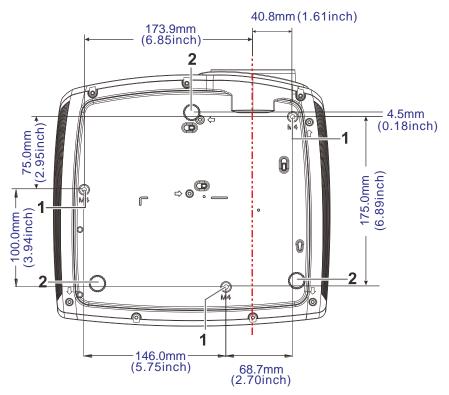

Connectivity Note:

If your video equipment has multiple connection options, please note that HDMI provides the highest quality image, followed by Component and then S-video. Composite provides the least quality image.

As a safety precaution, disconnect all power to the projector and connecting devices before making connections.

Bottom view

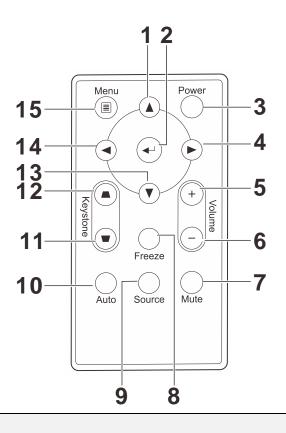

Ітем	LABEL	DESCRIPTION	SEE PAGE
1.	Ceiling support holes	Contact your dealer for information on mounting the projector on a ceiling.	
2.	Tilt adjustor	Rotate adjuster lever to adjust angle position.	14

Note:

If you are installing the projector on the ceiling, we strongly recommend using InFocus approved ceiling mounts for proper fitting, ventilation and installation. Refer to the installation guide that comes with the InFocus Ceiling Mount kit for more information. The warranty does not cover any damage caused by use of non-approved ceiling mount kits or by installing in an improper location.

Remote Control Parts

// Important:

1. Avoid using the projector with bright fluorescent lighting turned on. Certain high-frequency fluorescent lights can disrupt remote control operation.

2. Be sure nothing obstructs the path between the remote control and the projector. If the path between the remote control and the projector is obstructed, you can bounce the signal off certain reflective surfaces such as projector screens.

3. The buttons and keys on the projector have the same functions as the corresponding buttons on the remote control. This user's manual describes the functions based on the remote control.

15.	Menu	Opens and exits the OSD.		

Remote Control Operating Range

The remote control uses infrared transmission to control the projector. It is not necessary to point the remote directly at the projector. Provided you are not holding the remote perpendicular to the sides or the rear of the projector, the remote will function well within a radius of about 7 meters (23 feet) and 15 degrees above or below the projector level. If the projector does not respond to the remote control, move a little closer.

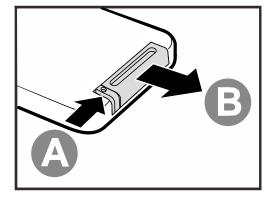

Projector and Remote Control Buttons

The projector can be operated using the remote control. All operations can be carried out with the remote control.

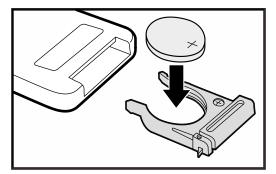

SETUP AND OPERATION

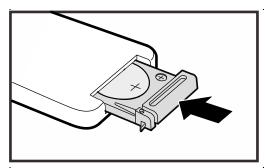

Inserting the Remote Control Batteries

 Remove the battery compartment cover by sliding the cover in the direction of the arrow (A). Pull out the cover (B).

2. Insert a 3V lithium battery with the positive side facing up.

3 Replace the cover.

Caution:

- 1. Only use a 3V lithium battery (CR2025).
- **2.** Dispose of used batteries according to local ordinance regulations.
- 3. Remove the battery when not using the projector for prolonged periods.

Note:

Batteries are not normally included with InFocus projectors.

Turning the projector on and off

- Connect the power cord to the projector. Connect the other end to a wall outlet. The **O POWER** LED on the projector light.
- **2.** Turn on the connected devices.
- Ensure the POWER LED is not flashing. Then press the O POWER button to turn on the projector.

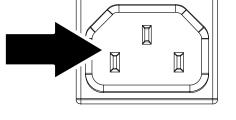

The projector splash screen displays and connected devices are detected.

See Setting an Access Password (Security Lock) on page 12 if the security lock is enabled.

If more than one input device is connected, press the SOURCE button and use ▲ ▼ to scroll among the devices.
 (Component is supported using a RGB to COMPONENT ADAPTER.)

Source HDMI1/MHL HDMI 2 VGA1 \\\\ 1 VGA 2 ‱2 ٢ S-Video Composite Video െ Item Adjust ୶ ⁄ 🕨 Scroll A Menu = Exit

- HDMI1 /MHL: High-Definition Multimedia Interface/ Mobile High-Definition Link
- HDMI2: High-Definition Multimedia Interface
- VGA1 / VGA2: Analog RGB1 / RGB2
- S-Video: Super video (Y/C separated)
- Composite Video: Traditional composite video

5. To turn the projector off, press the POWER button. When the "Power Off? Press **Power** again" message appears, press the **POWER** button. The projector turns off.

Power Off?

Press Power again

Caution:

- 1. Be sure to remove the lens cap before starting projector.
- 2. Do not unplug the power cord until the POWER LED stops flashing–indicating the projector has cooled down.

Setting an Access Password (Security Lock)

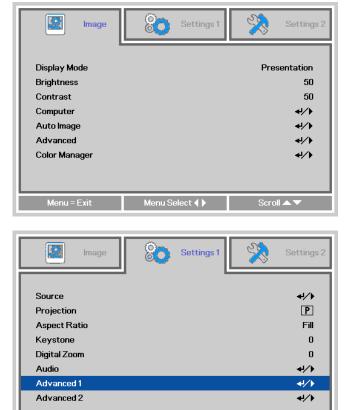

You can use the four arrow buttons on the remote to set a password and prevent unauthorized use of the projector. When enabled, the password must be entered after you power on the projector. (See *Navigating the OSD* on page 16 and *Setting the OSD Language* on page 17 for help on using OSD menus.)

Important:

Keep the password in a safe place. Without the password, you will not be able to use the projector. If you lose the password, contact InFocus Support for information on clearing the password.

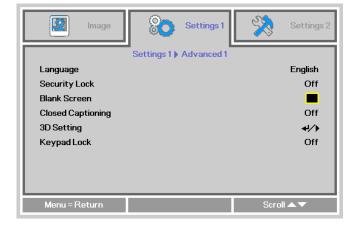

1. Press the **MENU** button to open the OSD menu.

 Press the < ► buttons to move to the Settings 1 menu. Press the

- Press ← (Enter) or ► to enter the
 Advanced 1 sub menu. Press the
 ▲ ▼ buttons to select Security Lock.
- **4.** Press the **◄** buttons to enter and enable or disable security lock function.

A password dialog box automatically appears.

Menu Select 4 🕨

IN3134a_IN3136a_IN3138HDa User's Manual

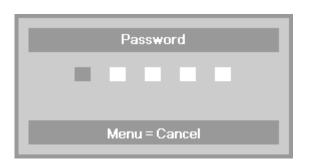

5. You can use the arrow buttons

either on keypad or IR remote control for password entry. You can use any combination including the same arrow five times, but five characters must be used.

Press the arrow buttons in any order to set the password. Push the **MENU** button to exit the dialog box.

Passi	word			
Register Password Confirm Password	ľ			
Menu	= Exit			
Pass	word			
Register Password Confirm Password		* *		*

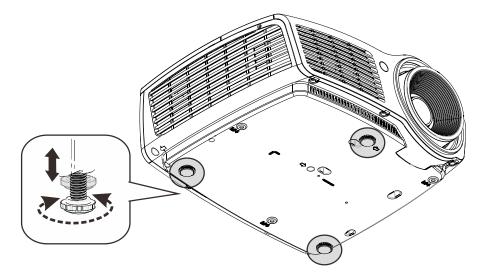

6. If the Security Lock is enabled, the user will be prompted to enter a password when the projector's power button is pressed. Enter the password in the order you set it on step 5. If you forget the password, please contact InFocus. Visit our website at www.infocus.com/support or call us.

Adjusting the Projector Level

Take note of the following when setting up the projector:

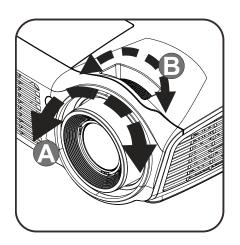

- The projector table or stand should be level and sturdy.
- Position the projector so that it is perpendicular to the screen.
- Ensure the cables are in a safe location. You could trip over them.

To adjust the angle of the picture, turn the tilt-adjuster right or left until the desired angle has been achieved.

Adjusting the Zoom, Focus and Keystone

- Use the Image-zoom control (on the projector only) to resize the projected image and screen size (3).
- 2. Use the Image-focus control (on the projector only) to sharpen the projected image (A).

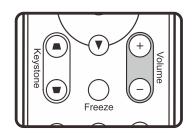

- **3.** Use the **KEYSTONE** buttons on the remote control to correct trapezoid image issues (wider top or bottom).
- **4.** The keystone control appears on the display.

Keystone

Adjusting the Volume

 Press the Volume +/buttons on the remote control.

2. Press the **MUTE** button on the remote control to turn off the volume.

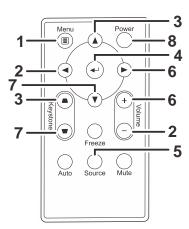

ON-SCREEN DISPLAY (OSD) MENU SETTINGS

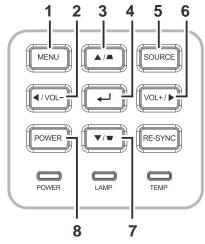

OSD Menu Controls

The projector has an OSD that lets you make image adjustments and change various settings.

Navigating the OSD

You can use the remote control arrow buttons to navigate and make changes to the OSD.

- 1. To enter the OSD, press the **MENU** button.
- There are three menus. Press the ◀► buttons to move through the menus.
- Press the ▲ ▼ buttons to move up and down in a menu.
- 4. Press the **◄** buttons to change setting values.
- 5. Press the **MENU** button to close the OSD or leave a submenu.

LAN_RJ45

Wired LAN Terminal functionalites

Remote control and monitoring of a projector from a PC (or laptop) via wired LAN is also possible. Compatibility with Crestron / AMX (Device Discovery) / Extron control boxes enables not only collective projector management on a network but also management from a control panel on a PC (or laptop) browser screen.

- ★ Crestron is a registered trademark of Crestron Electronics, Inc. of the United States.
- ★ Extron is a registered trademark of Extron Electronics, Inc. of the United States.
- ★ AMX is a registered trademark of AMX LLC of the United States.
- ★ PJLink applied for trademark and logo registration in Japan, the United States of America, and other countries by JBMIA.

Supported External Devices

This projector supports specified Crestron Electronics controller commands and related software (ex, RoomView ®).

http://www.crestron.com/

This projector supports AMX (Device Discovery). <u>http://www.amx.com/</u>

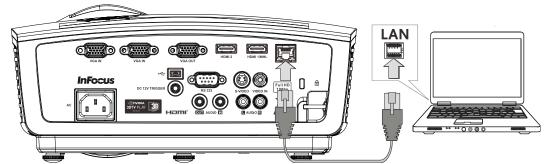

This projector supports Extron device(s). http://www.extron.com/

This projector supports all commands of PJLink Class1 (Version 1.00). <u>http://pjlink.jbmia.or.jp/english/</u>

For detailed information about the diverse types of external devices which can be connected to the LAN/RJ45 port to control the projector, as well as related control commands, go to <u>www.infocus.com/support</u>.

<u>LAN RJ45</u>

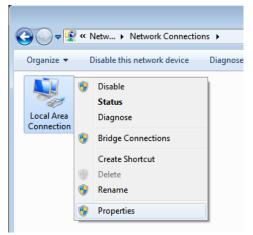

1. Connect an RJ45 cable to RJ45 ports on the projector and the PC (laptop).

2. On the PC (laptop), select Start \rightarrow Control Panel \rightarrow Network and Internet.

RS232 by Telnet Function

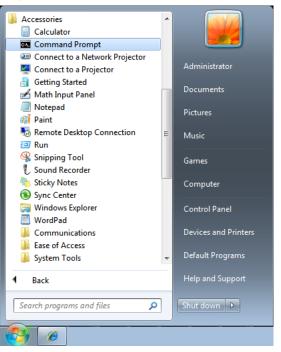

Besides using Hyper-Terminal for projector control, you can also use RS232 by Telnet with the LAN/RJ45 interface.

Quick Start-Guide for "RS232 by TELNET"

- 1. Locate the IP address from the projector's OSD.
- 2. Make sure that the laptop/PC can access the projector's web page.
- 3. Make sure that the Windows firewall settings are disabled to prevent the laptop/PC from ignoring the Telnet commands.

4. Go to Start => All Programs => Accessories => Command Prompt

- Type the Telnet command in the following format: *telnet ttt.xxx.yyy.zzz* 23 ("Enter" key pressed) (ttt.xxx.yyy.zzz: IP-Address of the projector)
- 6. When the Telnet connection is ready and you have input an RS232 command, press Enter.

Enabling Telnet in Windows Vista/7/8

- 1. Telnet is not included by default in Windows Vista, 7 or 8.
- 2. Open the Control Panel.

3. Open Programs.

Telnet specifications

Telnet: TCP

Telnet port: 23

Telnet utility: Windows Telnet.exe (console mode)

Disconnecting Telnet when Telnet is active: Close Windows Telnet utility.

Telnet Limitations:

- 1. Less than 50 bytes are used for the successive network payload for the Telnet Control application.
- 2. Less than 26 bytes are used for one complete RS232 command for Telnet control.
- 3. There must be at least 200ms between RS232 commands.

Other: When using the Windows built-in Telnet utility, the Enter key causes a carriage return and starts a new line of code.

Advanced 2 Features

Press the **Menu** button to open the **OSD** menu. Press the $\triangleleft \triangleright$ buttons to move to the **Settings 2** menu. Press the $\triangleleft \lor$ buttons to move to the **Advanced 2** menu and then press $\triangleleft \lor$ (Enter) or \triangleright . Press the $\triangleleft \lor$ buttons to move up and down in the **Advanced 2** menu. Press the $\triangleleft \triangleright$ buttons to enter and change setting values.

MAINTENANCE AND SECURITY

Replacing the Projection Lamp

The projection lamp should be replaced when it burns out. It should only be replaced with a certified replacement part, which you can order from your local dealer.

Important:

a. The projection lamp used in this product contains a small amount of mercury.

b. Do not dispose this product with general household waste.

c. Disposal of this product must be carried out in accordance with the regulations of your local authority.

Warning:

Be sure to turn off and unplug the projector at least 60 minutes before replacing the lamp. Failure to do so could result in a severe burn.

Caution:

In rare cases the lamp bulb may burn out during normal operation and cause glass dust or shards to be discharged outward from the rear exhaust vent.

Do not inhale or touch glass dust or shards. Doing so could result in injury.

Always keep your face away from the exhaust vent so that you do not suffer from the gas and broken shards of the lamp.

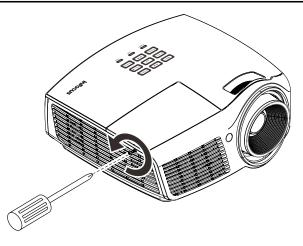

When removing the lamp from a ceiling-mounted projector, make sure that no one is under the projector. Glass fragments could fall if the lamp has burned out.

If a lamp ruptures, the gas and broken shards may scatter inside the projector and may come out of the exhaust vent. The gas contains toxic mercury.

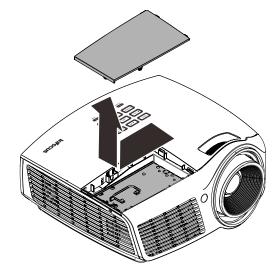

Open windows and doors for ventilation.

If you inhale the gas or the shards of the broken lamp enter your eyes or mouth, consult a doctor immediately.

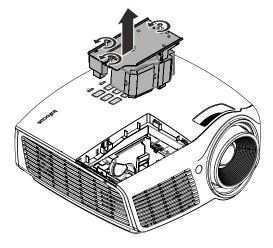

1 Loosen the single screw on the lamp compartment cover.

2. Remove the lamp compartment cover.

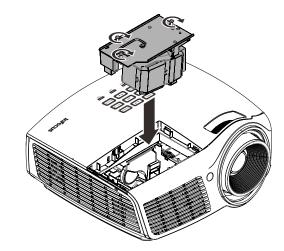

- **3.** Remove the three screws from the lamp module.
- **4.** Lift the module handle up.

- **5.** Pull firmly on the module handle to remove the lamp module.
- 6. Reverse steps 1 to 5 to install the new lamp module. While installing, align the lamp module with the connector and ensure it is level to avoid damage.

Note:

The lamp module must sit securely in place and the lamp connector must be connected properly before tightening the screws.

Resetting the Lamp Timer

After replacing the lamp, you should reset the lamp hour timer to zero. Refer to the following:

- 1. Press the **MENU** button to open the OSD menu.
- Press the < ▶ buttons to move to the Settings 2 menu. Press the ▼ button to move down to Advanced 1 and press enter.
- 3. Press the ▼▲ buttons to move down to Lamp Hour Reset.

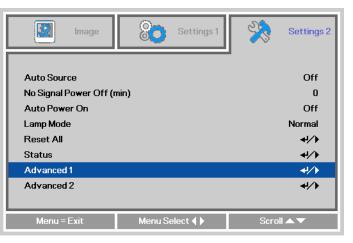

Image	Settings 1	*	Settings 2

Network			↓ /▶
Menu = Return		Scro	

- **4.** Press the ← (Enter) or ► button.A message screen appears.
- **5.** Press the **▼** ▲ **<** ▶ buttons in sequence to reset the lamp timer.
- 6. Press the MENU button to return to Settings 2.

Cleaning the Projector

Cleaning the projector to remove dust and grime will help ensure trouble-free operation.

Warning:

1. Be sure to turn off and unplug the projector at least 30 minutes before cleaning. Failure to do so could result in a severe burn.

2. Only use a dampened cloth when cleaning. Do not allow water to enter the ventilation openings on the projector.

3. If a little water gets into the projector interior while cleaning, leave the projector unplugged in a well-ventilated room for several hours before using.

4. If a lot of water gets into the projector interior when cleaning, have the projector serviced.

Cleaning the Lens

You can purchase optic lens cleaner from most camera stores. Refer to the following to clean the projector lens.

- 1. Apply a little optic lens cleaner to a clean soft cloth. (Do not apply the cleaner directly to the lens.)
- 2. Lightly wipe the lens in a circular motion.

Caution:

1. Do not use abrasive cleaners or solvents.

2. To prevent discoloration or fading, avoid getting cleaner on the projector case.

Cleaning the Case

Refer to the following to clean the projector case.

- 1. Wipe off dust with a clean dampened cloth.
- 2. Moisten the cloth with warm water and mild detergent (such as used to wash dishes), and then wipe the case.
- 3. Rinse all detergent from the cloth and wipe the projector again.

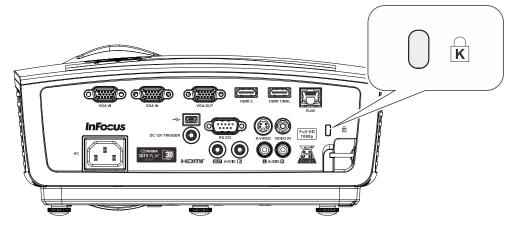

Caution:

To prevent discoloration or fading of the case, do not use abrasive alcohol-based cleaners.

Using the Cable Lock System and Security Bar

Using the Cable Lock

If you are concerned about security, attach the projector to a permanent object with the Kensington slot and a security cable.

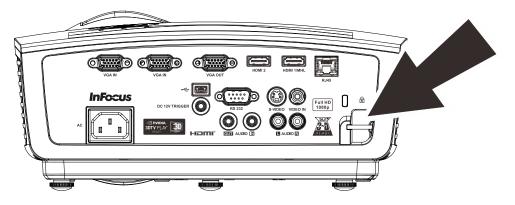

Note:

A Cable Lock System can be purchased from InFocus or your dealer. Refer to the information that comes with the lock for instructions on how to use it.

The security lock slot corresponds to Kensington's MicroSaver Security System. If you have any questions or concerns, contact: Kensington, 2853 Campus Drive, San Mateo, CA 94403, U.S.A. Tel: 800-535-4242, <u>http://www.Kensington.com</u>.

Using the Security Bar

In addition to the password protection function and the Kensington lock, the Security Bar helps protect the projector from unauthorized removal. See the following picture.

TROUBLESHOOTING

Common problems and solutions

These guidelines provide tips to deal with problems you may encounter while using the projector. If the problem remains unsolved, contact your dealer for assistance.

After spending time troubleshooting, the problem can often be traced to something as simple as a loose connection. Check the following before proceeding to the problem-specific solutions.

- Use some other electrical device to confirm that the electrical outlet is working.
- Ensure the projector is turned on.
- Ensure all connections are securely attached.
- Ensure the attached device is turned on.
- Ensure a connected PC is not in a suspended mode.
- Ensure a connected notebook computer is configured for an external display. (This is usually done by pressing an Fn-key combination on the notebook.)

Tips for Troubleshooting

In each problem-specific section, try the steps in the order suggested. This may help you to solve the problem more quickly.

Try to pin point the problem and thus avoid replacing non-defective parts. For example, if you replace batteries and the problem remains, put the original batteries back and go to the next step.

Keep a record of the steps you take when troubleshooting. The information may be useful when calling for technical support or for passing on to service personnel.

Image Problems

Problem: No image appears on the screen

- 1. Verify the settings on your notebook or desktop PC.
- 2. Turn off all the equipment and power everything up again. The projector should be turned on last.

Problem: The image is blurred

- 1. Adjust the **Focus** on the projector.
- 2. Press the Auto button on the remote control.
- **3.** Ensure the projector-to-screen distance is within the specified range.
- 4. Check that the projector lens is clean.

Problem: The image is wider at the top or bottom (trapezoid effect)

- 1. Position the projector so it is as perpendicular to the screen as possible.
- 2. Use the Keystone button on the remote control to correct the problem.

Problem: The image is reversed

Check the **Projection** setting on the **Settings 1** menu of the OSD.

Problem: The image is streaked

- 1. Set the **Frequency** and **Tracking** settings on the **Image->Computer** menu of the OSD to the default settings.
- 2. To ensure the problem is not caused by a connected PC's video card, connect to another computer.

Problem: The image is flat with no contrast

Adjust the Contrast setting on the Image menu of the OSD.

Problem: The color of the projected image does not match the source image.

Adjust the **Color Temperature** and **Gamma** settings on the **Image->Advanced** menu of the OSD.

Lamp Problems

Problem: There is no light from the projector

- 1. Check that the power cable is securely connected.
- 2. Ensure the power source is good by testing with another electrical device.
- 3. Restart the projector in the correct order and check that the Power LED is on.
- 4. If you have replaced the lamp recently, try resetting the lamp connections.
- 5. Replace the lamp module.
- 6. Put the old lamp back in the projector and have the projector serviced.

Problem: The lamp goes off

- 1. Power surges can cause the lamp to turn off. Re-plug power cord. When the Power LED is on, press the power button.
- 2. Replace the lamp module.
- 3. Put the old lamp back in the projector and have the projector serviced.

Remote Control Problems

Problem: The projector does not respond to the remote control

- 1. Direct the remote control towards remote sensor on the front of the projector.
- 2. Ensure the path between remote and sensor is not obstructed.
- 3. Turn off any fluorescent lights in the room.
- 4. Check the battery polarity.
- 5. Replace the battery.
- 6. Turn off other infrared-enabled devices in the vicinity.
- 7. Replace the remote control.

Audio Problems

Problem: There is no sound

- 1. Adjust the volume on the remote control.
- **2.** Adjust the volume of the audio source.
- **3.** Check the audio cable connection.
- 4. Test the source audio output with other speakers.
- **5.** Have the projector serviced.

Problem: The sound is distorted

- 1. Check the audio cable connection.
- 2. Test the source audio output with other speakers.
- **3.** Have the projector serviced.

Having the Projector Serviced

If you are unable to solve the problem, you should have the projector serviced. Pack the projector in the original carton and contact InFocus Support at www.infocus.com/support or call us.

HDMI Q & A

Q. What is the difference between a "Standard" HDMI cable and a "High-Speed" HDMI cable?

Recently, HDMI Licensing, LLC announced that cables would be tested as Standard or High-Speed cables.

Standard (or "category 1") HDMI cables have been tested to perform at speeds of 75Mhz or up to 2.25Gbps, which is the equivalent of a 720p/1080i signal.

[•]High Speed (or "category 2") HDMI cables have been tested to perform at speeds of 340Mhz or up to 10.2Gbps, which is the highest bandwidth currently available over an HDMI cable and can successfully handle 1080p signals including those at increased color depths and/or increased refresh rates from the Source. High-Speed cables are also able to accommodate higher resolution displays, such as WQXGA cinema monitors (resolution of 2560 x 1600).

Q. How do I run HDMI cables longer than 10 meters(32.81ft)?

There are many HDMI Adopters working on HDMI solutions that extend a cable's effective distance from the typical 10 meter(32.81ft) range to much longer lengths. These companies manufacture a variety of solutions that include active cables (active electronics built into cables that boost and extend the cable's signal), repeaters, amplifiers as well as CAT5/6 and fiber solutions.

Q. How can I tell if a cable is an HDMI certified cable?

All HDMI products are required to be certified by the manufacturer as part of the HDMI Compliance Test Specification. However, there may be instances where cables bearing the HDMI logo are available but have not been properly tested. HDMI Licensing, LLC actively investigates these instances to ensure that the HDMI trademark is properly used in the market. We recommend that consumers buy their cables from a reputable source and a company that is trusted.

For more details, go to the HDMI website at: http://www.hdmi.org/learningcenter/faq.aspx#49

O: Frequency supported

— : Frequency not supported

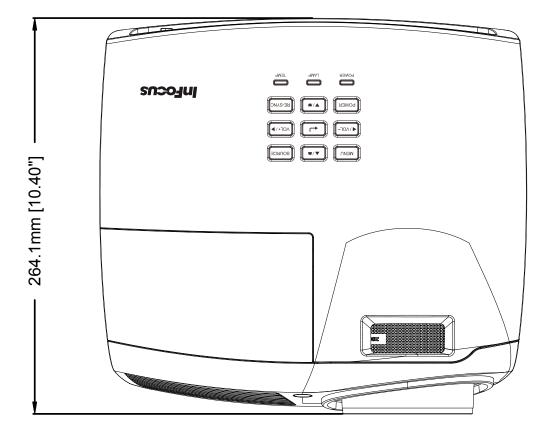

\star The native resolution of the panel is 1920x1080

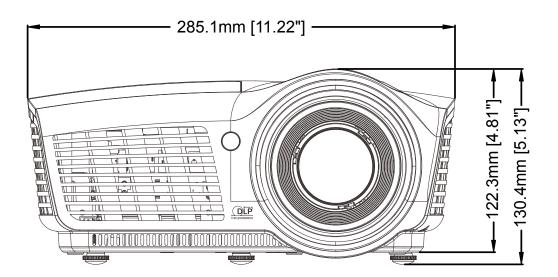

Resolutions listed above other than 1920 x 1080 (the native resolution of the projector) will be resized and displayed, however they may contain lines or uneven looking text. This is normal.

 \star A yellow background means that the resolution will be displayed in a 4:3 aspect ratio.

★A blue background means that these resolutions may display some video noise. This is normal.

Projector Dimensions

REGULATORY COMPLIANCE

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his/her own expense.

Changes or modifications not expressly approved by the parties responsible for compliance could void the user's authority to operate the equipment.

Canada

This class B digital apparatus complies with Canadian ICES-003.

Safety Certifications

FCC-B, cUL, UL, CE, C-tick, CCC, PSB, EAC, TUV-Safety

APPENDIX I

Serial Communication

The following table describes the serial communication configuration that should be used when interfacing to CLI via the serial port.

Windows HyperTerminal or ProComm are two tools that can be used to send CLI commands across the serial port.

Setting	Value
Bits per second	19200
Data bits	8
Parity	None
Stop bits	1
Flow control	None
Emulation	VT100

Control Command Structure
